Preface . . . . vii  
Acknowledgments . . . . ix  
Contributors . . . . xiii

## **Part 1. Introduction to Basic Toxicological Principles**

- 1. Introduction** 1
- 2. Risk Assessment and Regulatory Toxicology** 7
- 3. Therapeutic Monitoring of Adverse Drug Reactions** 20
- 4. Classification of Toxins in Humans** 37
- 5. Exposure** 54
- 6. Effects** 61
- 7. Dose Response** 71
- 8. Descriptive Animal Toxicity Tests** 79
- 9. In Vitro Alternatives to Animal Toxicity** 84
- 10. Toxicokinetics** 89
- 11. Chemical and Drug Receptor Interactions** 115  
*Zacharoula Konsoula*
- 12. Toxicogenomics** 126  
*Zacharoula Konsoula*

## **Part 2. Toxicity of Therapeutic Agents**

- 13. Sedative/Hypnotics** 138
- 14. Opioids and Derivatives** 150
- 15. Sympathomimetics** 164

- 16. Hallucinogenic Agents** 183
- 17. Anticholinergic and Neuroleptic Drugs** 203
- 18. Acetaminophen, Salicylates, and Nonsteroidal Anti-inflammatory Drugs** 219
- 19. Anabolic-Androgenic Steroids** 233
- 20. Cardiovascular Toxicology** 242
- 21. Antineoplastic Agents** 257
- 22. Vitamins** 266
- 23. Herbal Remedies** 277

**Part 3. Toxicity of Non-Therapeutic Agents**

- 24. Alcohols and Aldehydes** 291
- 25. Gases** 307
- 26. Metals** 324  
*Louis D. Trombetta and Frank A. Barile*
- 27. Aliphatic and Aromatic Hydrocarbons** 353
- 28. Insecticides** 363
- 29. Herbicides** 376
- 30. Rodenticides** 385
- 31. Chemical Carcinogenesis and Mutagenesis** 395
- 32. Reproductive and Developmental Toxicity** 408
- 33. Radiation Toxicity** 417
- 34. Chemical and Biological Threats to Public Safety** 427
