

# Contents

Preface	ix
About the editors	xiii
Contributors	xv
Abbreviations	xvii
<b>1 Introduction to forensic toxicology</b>	<b>1</b>
AC Moffat, MD Osselton, B Widdop, S Jickells, A Negrusz	
Introduction	1
Principles of forensic toxicology	2
Range of cases submitted	4
Case investigation	5
Classification of poisons	7
Samples	7
Sample analysis	8
Conclusions	9
Reference	10
Further reading	10
<b>2 Pharmacokinetics and metabolism</b>	<b>11</b>
OH Drummer, SHY Wong	
Introduction	11
Basic concepts of pharmacokinetics	11
Drug metabolism	20
Adverse drug interactions and pharmacogenetics	26
Drug concentration and pharmacological response	31
Postmortem redistribution	32
Interpretation	33
References	37
Further reading	38
<b>3 Drugs of abuse</b>	<b>39</b>
LA King, SD McDermott, S Jickells, A Negrusz	
Introduction	39
Commonly abused drugs	40
Analysis of seized drugs	55
Clandestine laboratories	65

Analysis of the main drugs of abuse	66
Conclusion	72
References	73
<b>4 Other substances encountered in clinical and forensic toxicology</b>	<b>75</b>
RJ Flanagan, M Kala, R Braithwaite, FA de Wolff, JF de Wolff	
General introduction	75
Volatile substances	76
Pesticides	86
Metals and anions	96
Natural toxins	111
Summary	123
References	123
<b>5 Workplace drug testing</b>	<b>131</b>
A Verstraete, M Peat	
Introduction	131
Evolution of workplace testing in the USA	132
Prevalence of drug use in the workforce and in the workplace	133
Regulatory process in the USA	133
Legislation in Europe	134
Workplace policies on drugs and alcohol	135
Proposed changes to the DHHS <i>Guidelines</i>	141
Adulterated and substituted specimens	143
Collection of specimens	145
Role of the medical review officer	146
Conclusion	149
References	150
Further reading	151
<b>6 Alternative specimens</b>	<b>153</b>
P Kintz, V Spiehler, A Negrusz, GAA Cooper	
Introduction	153
Hair analysis	153
Drugs in oral fluid	165
Detection of drugs in sweat	179
References	181
Further reading	187
<b>7 Postmortem toxicology</b>	<b>189</b>
GR Jones	
Introduction	189
Specimens and other exhibits	189
Analytical toxicology	196
Interpretation of postmortem toxicology results	204
Summary	212
References	212
Further reading	213

<b>8</b>	<b>Clinical toxicology, therapeutic drug monitoring, <i>in utero</i> exposure to drugs of abuse</b>	<b>215</b>
	DRA Uges, M Hallworth, C Moore, A Negrusz	
	Introduction	215
	Clinical toxicology	215
	Therapeutic drug monitoring	253
	<i>In utero</i> exposure to drugs of abuse	261
	References	265
	Further reading	266
<b>9</b>	<b>Drug abuse in sport</b>	<b>267</b>
	DA Cowan, E Houghton, S Jickells	
	Introduction	267
	Rules	268
	Reported analytical findings	271
	Sampling	274
	Analytical approach	276
	Confirmatory methods	280
	References	284
<b>10</b>	<b>Drug-facilitated sexual assault</b>	<b>289</b>
	A Negrusz, RE Gaensslen	
	Introduction and basic terms	289
	The extent of the problem	290
	History and legislation	292
	Drugs used to facilitate sexual assault	292
	Specimens and analytical methods	300
	Summary	300
	References	301
	Further reading	301
<b>11</b>	<b>Alcohol, drugs and driving</b>	<b>303</b>
	BK Logan, RG Gullberg, A Negrusz, S Jickells	
	Introduction	303
	Alcohol and driving	313
	Drugs and driving	322
	References	324
<b>12</b>	<b>Forensic chemistry and solid dosage form identification</b>	<b>325</b>
	J Ramsey	
	Introduction	325
	Dosage forms	326
	Examination of unknown products	333
	References	334
<b>13</b>	<b>Sampling, storage and stability</b>	<b>335</b>
	S Kerrigan	
	Introduction	335
	Specimen selection considerations	335

Sample handling	345
Contamination	346
Stability	350
References	354
<b>14 Extraction</b>	<b>357</b>
T Stimpfl	
Introduction	357
The fundamental principles of extraction	358
Practical aspects of extraction	362
Conclusions	369
References	370
Further reading	370
<b>15 Colour tests and thin-layer chromatography</b>	<b>371</b>
W Jeffery, CF Poole	
Introduction	371
Colour tests	371
Thin-layer chromatography	378
References	406
Further reading	407
<b>16 Immunoassays</b>	<b>409</b>
C Hand, D Baldwin	
Introduction	409
Basic principles of immunoassay	411
Heterogeneous immunoassays	416
Homogeneous immunoassays	420
Automation of immunoassay	421
Analysis of alternative samples to urine	422
Quality control, calibration, standardisation and curve fitting	423
References	424
<b>17 Ultraviolet, visible and fluorescence spectrophotometry</b>	<b>425</b>
J Cordonnier, J Schaep	
Introduction and theoretical background	425
UV and Visible Spectrophotometry	426
Instrumentation	430
Instrument performance checks	433
Sample preparation and presentation	434
Data processing and presentation of results	436
Interpretation of spectra and qualitative analysis	439
Quantitative analysis	441
Fluorescence Spectrophotometry	443
Instrumentation	445
Instrument performance checks	446
Sample preparation and presentation	447
Data processing and presentation of results	447

Interpretation of spectra and qualitative analysis	448
Quantitative analysis	449
References	450
Collections of data	450
Further reading	451
<b>18 Infrared spectroscopy</b>	<b>453</b>
A Drake, RD Jee	
Introduction	453
Instrumentation	456
Data processing	460
Instrument calibration	460
Sample preparation	463
Sample presentation	463
Interpretation of spectra	472
Qualitative analysis	473
Quantitative analysis	478
Collections of data	478
Near infrared	478
References	483
Further reading	484
<b>19 Gas chromatography</b>	<b>485</b>
S Dawling, S Jickells, A Negrusz	
Introduction	485
Gas chromatography columns	486
Inlet systems	500
Detector systems	509
Specimen preparation	515
Quantitative determinations	521
Optimising operation conditions to customise applications	522
Specific applications	524
References	526
Further reading	527
<b>20 High-performance liquid chromatography</b>	<b>529</b>
T Kupiec, M Slawson, F Pragst, M Herzler	
Introduction	529
Practical aspects of HPLC theory	530
Hardware	531
Columns	537
Maintenance	540
Separation techniques	541
Quantitative analysis	543
Validation	544
New emerging trends	545
Systems for drug analysis	545

Selection of chromatographic systems	547
Analysis of drugs in pharmaceutical preparations	549
Analysis of drugs in biological fluids and tissues	549
References	550
Further reading	551
<b>21 Mass spectrometry</b>	<b>553</b>
D Watson, S Jickells, HH Maurer, A Negrusz	
Introduction	553
Theory	555
Instrumentation	559
Coupled techniques	563
Data processing	567
System suitability tests	568
Sample preparation and presentation	569
Data interpretation	569
Mass spectrometry in qualitative analysis	574
Mass spectrometry in quantitative analysis	578
Collections of data	581
References	582
<b>22 Quality assurance and control in the toxicology laboratory</b>	<b>585</b>
AC Moffat, GAA Cooper, FT Peters, MA LeBeau	
Introduction	585
Quality assurance terminology	586
Quality standards	587
Guidelines	587
Quality systems	589
Management requirements	589
Technical requirements	591
External quality assessment	599
Use of new techniques	601
The accreditation process	602
The future	602
References	602
Further reading	603
