

Contents

Preface XV

List of Contributors XVIII

| | | |
|-------|--------------------------------------------------------------------|----|
| I | Fabrication of Nanomaterials | 1 |
| 1 | Synthetic Approaches to Metallic Nanomaterials | 3 |
| | <i>Ryan Richards and Helmut Bönnemann</i> | |
| 1.1 | Introduction | 3 |
| 1.2 | Wet Chemical Preparations | 4 |
| 1.3 | Reducing Agents | 7 |
| 1.4 | Electrochemical Synthesis | 14 |
| 1.5 | Decomposition of Low-Valency Transition Metal Complexes | 17 |
| 1.6 | Particle Size Separations | 18 |
| 1.7 | Potential Applications in Materials Science | 20 |
| 2 | Synthetic Approaches for Carbon Nanotubes | 33 |
| | <i>Bingqing Wei, Robert Vajtai, and Pulickel M. Ajayan</i> | |
| 2.1 | Introduction | 33 |
| 2.1.1 | Structure of Carbon Nanomaterials | 33 |
| 2.1.2 | Wide Range of Properties | 34 |
| 2.2 | Family of Carbon Nanomaterials | 35 |
| 2.2.1 | Fullerenes | 35 |
| 2.2.2 | Carbon Onions (Nested Fullerenes) | 36 |
| 2.2.3 | Carbon Nanofibers | 38 |
| 2.2.4 | Carbon Nanotubes | 39 |
| 2.2.5 | Nanoscale Diamonds and Diamond-Like Carbon | 41 |
| 2.2.6 | Nanoporous Activated Carbon | 42 |
| 2.3 | Synthesis of Carbon Nanotubes | 43 |
| 2.3.1 | Nanotube Growth via the Arc-Discharge Method | 43 |
| 2.3.2 | Carbon Nanotubes Produced by Laser Ablation | 44 |
| 2.3.3 | Chemical Vapor Deposition as a Tool for Carbon Nanotube Production | 45 |

| | | |
|----------|--------------------------------------------------------------------|-----------|
| 2.4 | Controllable Synthesis of Carbon Nanotube Architectures | 45 |
| 2.4.1 | Substrate-Site-Selective Growth | 46 |
| 2.4.2 | Three-Dimensional Nanotube Architectures | 47 |
| 2.4.3 | Super-Long SWNT Strands | 48 |
| 2.5 | Perspective on Biomedical Applications | 49 |
| 2.5.1 | Imaging and Diagnostics | 49 |
| 2.5.2 | Biosensors | 50 |
| 2.6 | Conclusion | 52 |
| 3 | Nanostructured Systems from Low-Dimensional Building Blocks | 57 |
| | <i>Donghai Wang, Maria P. Gil, Guang Lu, and Yunfeng Lu</i> | |
| 3.1 | Introduction | 57 |
| 3.2 | Nanostructured System by Self-Assembly | 58 |
| 3.2.1 | Nanoparticle Assemblies | 58 |
| 3.2.1.1 | Role of Capping Molecules | 58 |
| 3.2.1.2 | Multicomponent Assembly | 60 |
| 3.2.2 | 1D Nanostructure Assemblies | 61 |
| 3.3 | Biomimetic and Biomolecular Recognition Assembly | 62 |
| 3.3.1 | Assembly by Biomolecular Recognition | 62 |
| 3.3.1.1 | DNA-Assisted Assembly | 62 |
| 3.3.1.2 | Protein-Assisted Assemblies | 63 |
| 3.3.1.3 | Virus-Assisted Assemblies | 64 |
| 3.3.2 | Biomimetic Assembly Process | 65 |
| 3.4 | Template-Assisted Integration and Assembly | 67 |
| 3.4.1 | Template-Assisted Self-Assembly | 67 |
| 3.4.1.1 | Templating with Relief Structures | 67 |
| 3.4.1.2 | Templating with Functionalized Patterned Surfaces | 69 |
| 3.4.2 | Patterning of Nanoscale Component Assemblies | 69 |
| 3.5 | External-Field-Induced Assembly | 70 |
| 3.5.1 | Flow-Directed Assembly | 70 |
| 3.5.2 | Electric-Field-Induced Assembly | 71 |
| 3.5.3 | Electrophoretic Assembly | 71 |
| 3.5.4 | Assembly Using Langmuir–Blodgett Techniques | 72 |
| 3.6 | Direct Synthesis of 2D/3D Nanostructure | 73 |
| 3.6.1 | Templated Synthesis | 73 |
| 3.6.1.1 | Mesoporous Silica-Templated Synthesis | 74 |
| 3.6.1.2 | Direct Nanostructures Synthesis Using Soft Templates | 76 |
| 3.6.2 | Direct Synthesis of Oriented 1D Nanostructure Arrays | 78 |
| 3.6.2.1 | Oriented Arrays by Chemical Vapor Deposition | 78 |
| 3.6.2.2 | Seeded Solution Growth | 79 |
| 3.7 | Applications | 81 |
| 3.7.1 | Chemical and Biological Sensing Applications | 81 |
| 3.7.1.1 | Carbon-Nanotube-Based Sensing | 81 |
| 3.7.1.2 | Semiconducting-Nanowire-Based Sensing | 82 |
| 3.7.1.3 | Metallic-Nanowire-Based Sensing | 83 |

| | | |
|-------|-----------------------------------------------------------------|----|
| 3.7.2 | Other Applications of Integrated Nanoscale Component Assemblies | 83 |
| 3.8 | Concluding Remarks | 85 |

4 Nanostructured Collagen Mimics in Tissue Engineering 95

Sergey E. Paramonov and Jeffrey D. Hartgerink

| | | |
|------|----------------------------------------------------------------|-----|
| 4.1 | Introduction | 95 |
| 4.2 | Collagen Structural Hierarchy | 96 |
| 4.3 | Amino Acid Sequence and Secondary Structure | 97 |
| 4.4 | Experimental Observation of the Collagen Triple Helix | 99 |
| 4.5 | Folding Kinetics | 101 |
| 4.6 | Stabilization Through Sequence Selection | 102 |
| 4.7 | Stabilization via Hydroxyproline: The Pyrrolidine Ring Pucker | 104 |
| 4.8 | Triple Helix Stabilization Through Forced Aggregation | 106 |
| 4.9 | Extracellular Matrix and Collagen Mimics in Tissue Engineering | 108 |
| 4.10 | Sticky Ends and Supramolecular Polymerization | 110 |
| 4.11 | Conclusion | 114 |

5 Molecular Biomimetics: Building Materials Natures Way, One Molecule at a Time 119

Candan Tamerler and Mehmet Sarikaya

| | | |
|-------|---------------------------------------------------------------|-----|
| 5.1 | Introduction | 119 |
| 5.2 | Inorganic Binding Peptides via Combinatorial Biology | 122 |
| 5.3 | Physical Specificity and Molecular Modeling | 124 |
| 5.4 | Applications of Engineered Polypeptides as Molecular Erectors | 125 |
| 5.4.1 | Self-Assembly of Inorganic-Binding Polypeptides as Monolayers | 126 |
| 5.4.2 | Morphogenesis of Inorganic Nanoparticles via GEPIs | 127 |
| 5.4.3 | Assembly of Inorganic Nanoparticles via GEPIs | 128 |
| 5.5 | Future Prospects and Potential Applications in Nanotechnology | 129 |

II Characterization Tools for Nanomaterials and Nanosystems 135

6 Electron Microscopy Techniques for Characterization of Nanomaterials 137

Jian-Min (Jim) Zuo

| | | |
|-------|---------------------------------------------------------------|-----|
| 6.1 | Introduction | 137 |
| 6.2 | Electron Diffraction and Geometry | 138 |
| 6.2.1 | Selected-Area Electron Diffraction | 139 |
| 6.2.2 | Nano-Area Electron Diffraction | 139 |
| 6.2.3 | Convergent-Beam Electron Diffraction | 141 |
| 6.3 | Theory of Electron Diffraction | 142 |
| 6.3.1 | Kinematic Electron Diffraction and Electron Atomic Scattering | 142 |
| 6.3.2 | Kinematical Electron Diffraction from an Assembly of Atoms | 144 |
| 6.4 | High-Resolution Electron Microscopy | 147 |
| 6.5 | Experimental Analysis | 151 |

| | | |
|----------|------------------------------------------------------------------------------------------|------------|
| 6.5.1 | Experimental Diffraction Pattern Recording | 151 |
| 6.5.2 | The Phase Problem and Inversion | 152 |
| 6.5.3 | Electron Diffraction Oversampling and Phase Retrieval for Nanomaterials | 153 |
| 6.6 | Applications | 156 |
| 6.6.1 | Structure Determination of Individual Single-Wall Carbon Nanotubes | 156 |
| 6.6.2 | Structure of Supported Small Nanoclusters and Epitaxy | 158 |
| 6.7 | Conclusions and Future Perspectives | 160 |
| 7 | X-Ray Methods for the Characterization of Nanoparticles | 163 |
| | <i>Hartwig Modrow</i> | |
| 7.1 | Introduction | 163 |
| 7.2 | X-Ray Diffraction: Getting to Know the Arrangement of Atoms | 164 |
| 7.3 | Small-Angle X-Ray Scattering: Learning About Particle Shape and Morphology | 169 |
| 7.4 | X-Ray Absorption: Exploring Chemical Composition and Local Structure | 172 |
| 7.5 | Applications | 176 |
| 7.5.1 | Co Nanoparticles with Varying Protection Shells | 176 |
| 7.5.2 | Pd _x Pt _y Nanoparticles | 180 |
| 7.5.3 | Formation of Pt Nanoparticles | 183 |
| 7.6 | Summary and Conclusions | 186 |
| A.1 | General Approach | 187 |
| A.2 | X-Ray Diffraction | 188 |
| A.3 | Small-Angle Scattering | 189 |
| A.4 | X-Ray Absorption | 190 |
| 8 | Single-Molecule Detection and Manipulation in Nanotechnology and Biology | 197 |
| | <i>Christopher L. Kuyper, Gavin D. M. Jeffries, Robert M. Lorenz, and Daniel T. Chiu</i> | |
| 8.1 | Introduction | 197 |
| 8.2 | Optical Detection of Single Molecules | 198 |
| 8.2.1 | Detecting Single Molecules with Confocal Fluorescence Microscopy | 198 |
| 8.2.2 | Visualizing Single Molecules with Epifluorescence Detection | 200 |
| 8.2.3 | Total Internal-Reflection Fluorescence (TIRF) Microscopy | 201 |
| 8.2.4 | Single-Molecule Surface-Enhanced Resonance Raman Spectroscopy | 202 |
| 8.3 | Single-Molecule Manipulations Using Optical Traps | 203 |
| 8.3.1 | Force Studies Using Single-Beam Gradient Traps | 203 |
| 8.3.2 | Optical Vortex Trapping | 205 |
| 8.3.3 | Optical Arrays | 206 |

| | | |
|-------|-------------------------------------------------------------|-----|
| 8.4 | Applications in Single-Molecule Spectroscopy | 207 |
| 8.4.1 | Conformational Dynamics of Single DNA Molecules in Solution | 207 |
| 8.4.2 | Probing the Kinetics of Single Enzyme Molecules | 209 |
| 8.4.3 | Single-Molecule DNA Detection, Sorting, and Sequencing | 211 |
| 8.4.4 | Single-Molecule Imaging in Living Cells | 213 |
| 8.5 | Single-Molecule Detection with Bright Fluorescent Species | 214 |
| 8.5.1 | Optical Probes | 214 |
| 8.5.2 | Quantum Dots | 215 |
| 8.6 | Nanoscale Chemistry with Vesicles and Microdroplets | 215 |
| 8.7 | Perspectives | 217 |

9 Nanotechnologies for Cellular and Molecular Imaging by MRI 227

*Patrick M. Winter, Shelton D. Caruthers, Samuel A. Wickline,
and Gregory M. Lanza*

| | | |
|-------|---------------------------------------------------|-----|
| 9.1 | Introduction | 227 |
| 9.2 | Cardiovascular Disease | 228 |
| 9.3 | Cellular and Molecular Imaging | 229 |
| 9.4 | Cellular Imaging with Iron Oxides | 233 |
| 9.5 | Molecular Imaging with Paramagnetic Nanoparticles | 234 |
| 9.5.1 | Optimization of Formulation Chemistry | 236 |
| 9.5.2 | Optimization of MRI Techniques | 240 |
| 9.5.3 | In Vivo Molecular Imaging of Angiogenesis | 242 |
| 9.6 | Conclusions | 245 |

III Application of Nanotechnology in Biomedical Research 251

10 Nanotechnology in Nonviral Gene Delivery 253

*Latha M. Santhakumaran, Alex Chen, C. K. S. Pillai, Thresia Thomas, Huixin He,
and T. J. Thomas*

| | | |
|----------|------------------------------------------------|-----|
| 10.1 | Introduction | 253 |
| 10.2 | Agents That Provoke DNA Nanoparticle Formation | 255 |
| 10.2.1 | Polyamines | 255 |
| 10.2.2 | Cationic Lipids | 259 |
| 10.2.3 | Polyethylenimine | 260 |
| 10.2.4 | Dendrimers | 262 |
| 10.2.5 | Proteins and Polypeptides | 265 |
| 10.2.6 | Polymers | 267 |
| 10.3 | Characterization of DNA Nanoparticles | 267 |
| 10.3.1 | Laser Light Scattering | 268 |
| 10.3.2 | Electron Microscopy | 269 |
| 10.3.3 | Atomic Force Microscopy | 271 |
| 10.3.3.1 | DNA Nanoparticle Studies by AFM | 272 |
| 10.3.3.2 | Limitation of AFM Technique | 274 |

| | | |
|-----------|----------------------------------------------------------------------------------------------------------------------------|------------|
| 10.4 | Mechanistic Considerations in DNA Nanoparticle Formation | 276 |
| 10.5 | Systemic Gene Therapy Applications | 279 |
| 10.6 | Future Directions | 280 |
| 11 | Nanoparticles for Cancer Drug Delivery | 289 |
| | <i>Carola Leuschner and Challa Kumar</i> | |
| 11.1 | Introduction | 289 |
| 11.2 | Cancer: A Fatal Disease and Current Approaches to Its Cure | 290 |
| 11.3 | Characteristics of Tumor Tissues | 292 |
| 11.4 | Drug Delivery to Tumors | 293 |
| 11.5 | Physicochemical Properties of Nanoparticles in Cancer Therapy | 294 |
| 11.5.1 | <i>In Vivo</i> Circulation Pathways of Nanoparticles | 296 |
| 11.5.2 | Surface Treatment or Coating of Nanoparticles | 298 |
| 11.5.3 | Polymers for Encapsulation | 298 |
| 11.6 | Site-Specific Delivery of Chemotherapeutic Agents Using Nanoparticles | 299 |
| 11.6.1 | Passive Targeting | 300 |
| 11.6.1.1 | Targeting Lymph Nodes with Nanoparticles | 300 |
| 11.6.1.2 | Increasing Bioavailability of a Compound | 300 |
| 11.6.2 | Active Targeting | 303 |
| 11.6.2.1 | Magnetically Directed Targeting to Tumor Tissue | 303 |
| 11.6.2.2 | Ligand-Directed Active Targeting | 306 |
| 11.6.2.3 | Targeted Drug Delivery Using Magnetic Guidance | 307 |
| 11.7 | Nonviral Gene Therapy with Nanoparticles | 307 |
| 11.8 | Hyperthermia | 309 |
| 11.9 | Controlled Delivery of Chemotherapeutic Drugs Using Nanoparticles | 312 |
| 11.10 | Nanoparticles to Circumvent MDR | 313 |
| 11.11 | Potential Problems in Using Nanoparticles for Cancer Treatment | 315 |
| 11.12 | Future Outlook | 315 |
| 12 | Diagnostic and Therapeutic Applications of Metal Nanoshells | 327 |
| | <i>Christopher Loo, Alex Lin, Leon Hirsch, Min-Ho Lee, Jennifer Barton, Naomi Halas, Jennifer West, and Rebekah Drezek</i> | |
| | Abstract | 327 |
| 12.1 | Introduction | 327 |
| 12.2 | Methodology | 332 |
| | Gold nanoshell fabrication | 332 |
| | Antibody conjugation | 332 |
| | Cell culture | 333 |
| | Molecular imaging, cytotoxicity, and silver staining | 333 |
| | Optical coherence tomography | 333 |
| | In vitro photothermal nanoshell therapy | 334 |

| | | |
|-----------|---------------------------------------------------------------------------------------------|------------|
| 12.3 | Results and Discussion | 334 |
| 12.4 | Conclusions | 340 |
| 13 | Decorporation of Biohazards Utilizing Nanoscale Magnetic Carrier Systems | 343 |
| | <i>Axel J. Rosengart and Michael D. Kaminski</i> | |
| | Disclaimer | 343 |
| 13.1 | introduction | 343 |
| 13.2 | Technological Need | 345 |
| 13.3 | Technical Basis | 347 |
| 13.3.1 | Difference Between Drug Sequestration and Drug Delivery Using Nanospheres and Microspheres | 348 |
| 13.3.2 | Vascular Survival of Nanospheres | 349 |
| 13.3.3 | Toxicity of Components | 349 |
| 13.3.4 | Magnetic Filtration of Nanospheres from Circulation | 350 |
| 13.4 | Technology Specifications | 351 |
| 13.4.1 | Development of Biostabilized, Magnetic Nanospheres | 351 |
| 13.4.1.1 | Nanosphere Size | 352 |
| 13.4.1.2 | Surface Properties | 353 |
| 13.4.1.3 | Biodegradability | 354 |
| 13.4.1.4 | Surface Receptors | 355 |
| 13.3.2 | Magnetic Filtration of Toxin-Bound Magnetic Nanospheres | 357 |
| 13.4 | Technical Progress | 359 |
| 14 | Nanotechnology in Biological Agent Decontamination | 365 |
| | <i>Peter K. Stoimenov and Kenneth J. Klabunde</i> | |
| 14.1 | Introduction | 365 |
| 14.2 | Standard Methods for Chemical Decontamination of Biological Agents | 366 |
| 14.3 | Nanomaterials for Decontamination | 367 |
| 14.4 | Magnesium Oxide | 367 |
| 14.5 | Mechanism of Action | 369 |
| 14.6 | Titanium Dioxide | 371 |
| 14.7 | Summary | 371 |
| IV | Impact of Biomedical Nanotechnology on Industry, Society, and Education | 373 |
| 15 | Too Small to See: Educating the Next Generation in Nanoscale Science and Engineering | 375 |
| | <i>Anna M. Waldron, Keith Sheppard, Douglas Spencer, and Carl A. Batt</i> | |
| 15.1 | Introduction | 375 |
| 15.2 | Nanotechnology as a Motivator for Engaging Students | 375 |

| | | |
|-----------|-----------------------------------------------------------------------------------------------------------------------------|------------|
| 15.3 | The Nanometer Scale | 377 |
| 15.3.1 | Too Small to See | 377 |
| 15.3.2 | How Do We See Things Too Small to See? | 377 |
| 15.3.3 | How Do We Make Things Too Small to See? | 379 |
| 15.4 | Understanding Things Too Small to See | 382 |
| 15.4.1 | What They Know | 382 |
| 15.4.2 | Particle Theory | 383 |
| 15.5 | Creating Hands-On Science Learning Activities to Engage the Mind | 384 |
| 15.6 | Things That Scare Us | 386 |
| 15.6.1 | The Societal Concerns of Nanotechnology | 386 |
| 15.6.2 | The Next Generation | 387 |
| 15.7 | The Road Ahead | 388 |
| 16 | Nanobiomedical Technology: Financial, Legal, Clinical, Political, Ethical, and Societal Challenges to Implementation | 391 |
| | <i>Steven A. Edwards</i> | |
| 16.1 | Introduction | 391 |
| 16.2 | Drexler and the Dreaded Universal Assembler | 393 |
| 16.3 | Financial | 395 |
| 16.4 | Legal and Regulatory | 397 |
| 16.4.1 | Diagnostics | 399 |
| 16.4.2 | European and Canadian Regulation | 399 |
| 16.4.3 | General Regulation of Nanotechnology | 400 |
| 16.5 | Operational | 402 |
| 16.6 | Clinical | 403 |
| 16.7 | Political, Ethical And Social Challenges | 404 |
| 16.7.1 | The Gray Goo Scenario | 407 |
| 16.7.2 | The Green Goo Scenario | 407 |
| 16.7.3 | Environmental Disaster Due to Inhalable or Ingestible Nanoparticles | 408 |
| 16.7.4 | End of Shortage-Based Economics | 409 |
| 16.7.5 | People Will Live for Ever, Leading to Overpopulation | 409 |
| 16.7.6 | Only Rich People Will Live Forever: Nanotech Benefits Accrue Only to Those in Charge | 411 |
| 16.7.7 | Nanotech Will Turn Us Into Cyborgs | 411 |
| 16.7.8 | Nanotechnology Can Be Used to Create Incredible Weapons of Mass Destruction | 412 |
| 16.8 | Summary | 413 |
| | Abbreviations | 413 |
