ANALYTICAL METHODS

| | | |
|---------------------|---|----------|
| Chapter 1 | Methods of Visualisation | 3 |
| <i>G. Verhoeven</i> | | |
| 1.1 | Introduction | 3 |
| 1.1.1 | Electromagnetic Radiation | 4 |
| 1.1.2 | Light and Beyond-visible Radiation | 6 |
| 1.2 | Detecting and Imaging Optical Radiation | 8 |
| 1.2.1 | Principles | 8 |
| 1.2.2 | Photodetectors | 9 |
| 1.2.3 | Signals and Noise | 12 |
| 1.3 | RGB D-SLRs for NUV, Visible, Fluorescence and NIR Imaging | 14 |
| 1.3.1 | D-SLRs | 14 |
| 1.3.2 | Direct Visible Imaging | 16 |
| 1.3.3 | Reflected Near-ultraviolet Photography | 19 |
| 1.3.4 | Reflected Near-infrared Photography | 22 |
| 1.3.5 | Fluorescence Photography | 25 |
| 1.4 | Uncovering Underdrawings: SWIR Reflectography | 29 |
| 1.4.1 | Principles | 29 |
| 1.4.2 | Tools | 30 |
| 1.4.3 | Results | 32 |
| 1.5 | Spectral Imaging | 33 |
| 1.5.1 | Principles | 33 |
| 1.5.2 | Tools | 34 |
| 1.5.3 | Applications | 35 |
| 1.6 | X-Ray Radiography | 37 |
| 1.6.1 | Principles | 37 |
| 1.6.2 | Tools | 38 |

| | |
|---|-----------|
| 1.6.3 Applications | 40 |
| 1.7 Conclusions | 41 |
| References | 42 |
| Chapter 2 Vibrational Spectroscopy: Theoretical Basis Relevant to Archaeometry and Archaeological Applications | 49 |
| <i>H. G. M. Edwards and P. Vandenabeele</i> | |
| 2.1 Introduction | 49 |
| 2.2 Basic Vibrational Spectroscopy | 51 |
| 2.3 Spectroscopic Instrumentation | 56 |
| 2.4 Conclusions | 56 |
| References | 58 |
| Chapter 3 X-Ray Methods | 59 |
| <i>H. Calvo del Castillo and D. Strivay</i> | |
| 3.1 Introduction | 59 |
| 3.1.1 Energy, Frequency and Wavelength of X-rays | 59 |
| 3.1.2 Production of X-rays: X-Ray Fluorescence Phenomenon | 62 |
| 3.1.3 Different X-ray Emissions Coming from One Element | 63 |
| 3.1.4 Energy of a Given X-ray Emission Coming from Different Elements | 65 |
| 3.1.5 Probability of X-ray Emission | 66 |
| 3.1.6 Penetration of X-rays in Matter | 67 |
| 3.1.7 Means of Producing X-rays | 68 |
| 3.1.8 Summary of X-ray Techniques and their Applications | 70 |
| 3.2 Energy Dispersive X-Ray Fluorescence (EDXRF) | 70 |
| 3.2.1 General Considerations | 70 |
| 3.2.2 Energy Dispersive X-Ray Fluorescence Equipment | 72 |
| 3.2.3 Qualitative and Quantitative EDXRF | 76 |
| 3.2.4 Sample Preparation in EDXRF | 77 |
| 3.2.5 Use of EDXRF in Art and Archaeology | 78 |
| 3.3 Particle Induced X-Ray Emission (PIXE) | 80 |
| 3.3.1 General Considerations | 80 |
| 3.3.2 Qualitative and Quantitative PIXE | 83 |
| 3.3.3 Use of PIXE in Art and Archaeology | 84 |
| 3.4 Scanning Electron Microscopy – Energy Dispersive Spectrometry (SEM-EDS) | 86 |
| 3.4.1 General Considerations | 86 |

| | | |
|-------|---|-----|
| 3.4.2 | The Scanning Electron Microscope | 87 |
| 3.4.3 | Sample Preparation for Scanning Electron Microscopy | 90 |
| 3.4.4 | Other Scanning Electron Microscopes | 91 |
| 3.4.5 | Use of SEM-EDS in Art and Archaeology | 92 |
| 3.5 | X-Ray Diffraction (XRD) | 95 |
| 3.5.1 | General Considerations | 95 |
| 3.5.2 | The X-Ray Diffractometer | 96 |
| 3.5.3 | Sample Preparation | 100 |
| 3.5.4 | Applications in Art and Archaeology | 100 |
| | Further Information | 102 |
| | Acknowledgements | 102 |
| | References | 102 |

Chapter 4 Radiocarbon Dating 114

| | | |
|-------|--|-----|
| | <i>M. Van Strydonck</i> | |
| 4.1 | Introduction | 114 |
| 4.2 | Radiocarbon in Nature | 115 |
| 4.2.1 | The Dawn of the Radiometric Dating Technique | 115 |
| 4.2.2 | The First Radiocarbon Dates | 116 |
| 4.3 | A Complex Dating Technique in all its Simplicity | 119 |
| 4.3.1 | Introduction | 119 |
| 4.3.2 | The Libby Half-life | 119 |
| 4.3.3 | Isotopic Fractionation | 120 |
| 4.3.4 | Atmospheric ^{14}C Variations | 121 |
| 4.3.5 | The Conventional and the Calibrated Radiocarbon Date | 123 |
| 4.4 | Dating a Sample | 125 |
| 4.4.1 | Introduction | 125 |
| 4.4.2 | Precision and Accuracy | 126 |
| 4.4.3 | Sample Quality Assessment | 126 |
| 4.4.4 | Bayesian Approach to Radiocarbon Dating | 129 |
| 4.5 | Conclusions | 130 |
| | References | 130 |

Chapter 5 Separation Techniques in Archaeometry 132

| | | |
|-------|--|-----|
| | <i>S. Saverwyns and I. Vanden Berghe</i> | |
| 5.1 | Introduction | 132 |
| 5.2 | Gas Chromatography | 134 |
| 5.2.1 | Basic Principle | 134 |
| 5.2.2 | Practical Analysis | 136 |

| | | |
|------------------|---|------------|
| 5.3 | Liquid Chromatography | 146 |
| 5.3.1 | Basic Principle | 146 |
| 5.3.2 | Practical Analyses | 146 |
| 5.4 | Capillary Electrophoresis | 151 |
| | References | 152 |
| Chapter 6 | Mass Spectrometry | 163 |
| | <i>I. Kuleff and R. Djingova</i> | |
| 6.1 | Introduction | 163 |
| 6.2 | Short History | 164 |
| 6.3 | Principles Mass Spectrometry | 165 |
| 6.4 | Instrumentation | 165 |
| 6.4.1 | Ionization Sources in Mass Spectrometry | 165 |
| 6.4.2 | Mass Filters | 169 |
| 6.4.3 | Detectors in Mass Spectrometry | 171 |
| 6.4.4 | Mass Spectrometric Systems | 171 |
| 6.4.5 | Interferences in Mass Spectrometry | 172 |
| 6.4.6 | Quantification/Calibration | 174 |
| 6.4.7 | Sample Preparation | 175 |
| 6.5 | Application of Mass Spectrometry in Archaeometry | 176 |
| 6.5.1 | Determination of Elements | 176 |
| 6.5.2 | Isotope Determination | 183 |
| 6.5.3 | Determination of Organic Materials | 191 |
| | References | 192 |
| Chapter 7 | Electrochemical Techniques | 210 |
| | <i>A. Doménech-Carbó</i> | |
| 7.1 | Introduction | 210 |
| 7.2 | Methodology | 211 |
| 7.2.1 | Electrochemical Methods | 211 |
| 7.2.2 | Sampling | 213 |
| 7.2.3 | Electrochemical Processes and Data Treatment | 215 |
| 7.3 | Archaeometric Applications | 217 |
| 7.3.1 | Identification of Components and Provenance Studies | 217 |
| 7.3.2 | Technology and Authentication | 220 |
| 7.3.3 | Chronological Schemes and Dating | 225 |
| 7.4 | Concluding Remarks and Future Developments | 234 |
| | Acknowledgements | 234 |
| | References | 234 |

MATERIALS

| | | |
|-------------------|--|------------|
| Chapter 8 | Pottery, Glass and Enamelled Artefacts: How to Extract Information on their Manufacture Technology, Origin and Age? | 245 |
| | <i>Ph. Colomban</i> | |
| 8.1 | Introduction | 245 |
| 8.2 | The Analytical Techniques and their Potential | 248 |
| 8.3 | Inside the Technology | 251 |
| 8.3.1 | Raw Materials and Body | 251 |
| 8.3.2 | The Firing and Enamelling | 251 |
| 8.3.3 | Pastes, Glazes, Enamels, Gildings and Pigments | 254 |
| 8.3.4 | Dating | 259 |
| 8.4 | Conclusion: the Future, Mobile Instruments and Onsite Analysis | 261 |
| | References | 262 |
| Chapter 9 | Glass | 268 |
| | <i>L. Robinet and K. Eremin</i> | |
| 9.1 | Technology of Ancient Glasses | 268 |
| 9.1.1 | Materials and Composition | 269 |
| 9.1.2 | Manufacturing Process | 275 |
| 9.2 | Chemical Structure of Silicate Glasses | 279 |
| 9.3 | Alteration of Glasses | 281 |
| 9.3.1 | Influence of the Composition | 283 |
| 9.3.2 | Alteration Mechanisms | 284 |
| | References | 288 |
| Chapter 10 | Gemstones and Minerals | 291 |
| | <i>S. Karampelas and L. Kiefer</i> | |
| 10.1 | Introduction | 291 |
| 10.2 | Instruments and Their Use | 292 |
| 10.2.1 | Ultraviolet-Visible-Near Infrared (UV-Vis-NIR) Spectroscopy | 292 |
| 10.2.2 | Fourier Transform Infrared Spectroscopy (FTIR) | 295 |
| 10.2.3 | Raman Spectroscopy | 299 |
| 10.2.4 | Photoluminescence (PL) | 301 |
| 10.2.5 | X-Ray Imaging | 304 |
| 10.2.6 | Energy Dispersive X-Ray Fluorescence (EDXRF) | 308 |

| | | |
|-------------------|---|------------|
| 10.2.7 | Laser Ablation–Inductively Coupled Plasma–Mass Spectrometry (LA-ICP-MS) | 309 |
| 10.3 | Discussion and Conclusion | 313 |
| | References | 314 |
| Chapter 11 | Raman Spectroscopic Studies of Obsidian | 318 |
| | <i>E. A. Carter, S. J. Kelloway, N. Kononenko and R. Torrence</i> | |
| 11.1 | Introduction | 318 |
| 11.1.1 | Geological Sources | 319 |
| 11.1.2 | Characterisation of Obsidian | 320 |
| 11.1.3 | Raman Spectroscopy Studies of Obsidian: A Review | 320 |
| 11.1.4 | Chemical Composition and Molecular Structure | 323 |
| 11.1.5 | Research Aims | 324 |
| 11.2 | Experimental | 325 |
| 11.2.1 | Obsidian Samples | 325 |
| 11.2.2 | Raman Spectroscopy | 326 |
| 11.2.3 | UV-Visible Spectroscopy | 328 |
| 11.2.4 | Data Analysis | 328 |
| 11.3 | Spectroscopic Studies of Obsidian | 329 |
| 11.3.1 | Source Discrimination of Museum Artefacts | 329 |
| 11.3.2 | Sampling Issues: Weathering and Focussing | 331 |
| 11.3.3 | The Luminescence of Obsidian | 335 |
| 11.3.4 | Residue Analysis | 339 |
| 11.4 | Conclusions | 340 |
| | Acknowledgements | 341 |
| | References | 341 |
| Chapter 12 | Pigments and Dyes | 345 |
| | <i>P. Vandenabeele and H.G. M. Edwards</i> | |
| 12.1 | Introduction | 345 |
| 12.2 | Terminology | 345 |
| 12.3 | The Physical Nature of Colour | 346 |
| 12.4 | The Application of Colorants | 347 |
| 12.5 | Classes of Colorants | 348 |
| 12.6 | Analysis of Colorants | 349 |
| 12.7 | Case Study of Historical Pigments: A Survey of Analytical Archaeometric Usage and Terminology | 352 |
| 12.8 | Conclusions | 359 |
| | References | 360 |

Chapter 13 Canvas and Panel Paintings: Techniques and Analyses *E. Kouloumpis, A. P. Moutsatsou and A.-V. Terlixo*

361

| | | |
|--------|--|-----|
| 13.1 | Introduction: Background and Context | 361 |
| 13.2 | Structure and Materials of Panel and Canvas Paintings | 362 |
| 13.3 | A Review of the Physicochemical Methods for the Characterisation of the Materials and Techniques of Panel and Canvas Paintings | 366 |
| 13.3.1 | Non-invasive Techniques for the Study of Panel and Canvas Paintings | 367 |
| 13.3.2 | Invasive Methods | 372 |
| 13.4 | Science in the Service of Original Paintings—The Collection of the National Gallery of Greece | 378 |
| | Acknowledgements | 390 |
| | References | 390 |

Chapter 14 Corrosion of Ferrous Archaeological and Cultural Heritage Artefacts

399

| | | |
|--------|--|-----|
| | <i>Ph. Dillmann and D. Neff</i> | |
| 14.1 | Introduction—General Context | 399 |
| 14.2 | Specificities of Ancient Ferrous Metals | 400 |
| 14.3 | Different Frames for the Study of Corrosion of Archaeological Ferrous Metals | 402 |
| 14.3.1 | Conservation/Restoration | 402 |
| 14.3.2 | Long Term Prediction | 402 |
| 14.4 | Corrosion in Aqueous Media | 404 |
| 14.4.1 | General Mechanisms | 404 |
| 14.4.2 | Nature of the Environments | 408 |
| 14.5 | Characterisation Techniques | 410 |
| 14.5.1 | <i>In Situ</i> Measurements | 411 |
| 14.5.2 | Sampling and Preparation | 412 |
| 14.5.3 | Morphology Observation | 413 |
| 14.5.4 | Microstructural Characterisation | 413 |
| 14.5.5 | Electrochemistry | 416 |
| 14.5.6 | Labelling of Mechanisms | 417 |
| 14.6 | The Corrosion Patterns | 419 |
| 14.6.1 | Terminology | 419 |
| 14.6.2 | Thicknesses and Corrosion Rates | 419 |
| 14.6.3 | Corrosion Patterns and Mechanisms | 419 |
| 14.7 | Conclusion | 422 |
| | References | 423 |

| | | |
|--------|--|-----|

| 15.2 | Classification of Resins, Fossil Resins, Solid Bitumens and Other Carbonaceous Compounds | 429 |
| 15.2.1 | Plant Resins | 430 |
| 15.2.2 | Use of Resins and Fossil Resins | 431 |
| 15.2.3 | Provenancing | 433 |
| 15.3 | Techniques for Investigation of Resins, Fossil Resins and Solid Bitumens | 433 |
| 15.3.1 | Techniques of Elemental Characterisation | 433 |
| 15.3.2 | Gas Chromatography, GC-MS | 434 |
| 15.3.3 | Infrared and Raman Spectroscopy | 435 |
| 15.3.4 | Nuclear Magnetic Resonance | 441 |
| 15.3.5 | Pyrolysis Techniques | 442 |
| 15.4 | Conclusion | 442 |
| | Acknowledgements | 443 |
| | References | 443 |

Chapter 16 Archaeological Ivories: A Challenge for Analytical Raman Spectroscopy 449

| | | |
|--------|--|-----|
| 16.1 | Introduction | 449 |
| 16.2 | Structure and Composition of Ivories and Other Teeth | 450 |
| 16.3 | Visual identification of Ivory Species | 450 |
| 16.3.1 | Limitations of Identification Guides | 450 |
| 16.3.2 | Discrimination of Proboscidean Ivories using Schreger Angles | 451 |
| 16.3.3 | Identification of Other Species of Ivory | 452 |
| 16.4 | Cultural and Legal Implications of Ivory Identification | 452 |
| 16.5 | Raman Spectroscopic Analysis and Ivory Identification | 454 |
| 16.5.1 | Advantages | 454 |
| 16.5.2 | Problems with Fluorescence Emission | 455 |
| 16.5.3 | Interrogation of Modern and Archaeological Specimens | 455 |
| 16.5.4 | Coated Ivories | 457 |
| 16.5.5 | Detection of Fakes and Forgeries | 457 |
| 16.6 | Protocols for Raman Spectroscopic analysis of Ivories | 458 |
| 16.6.1 | Development of Protocols | 458 |
| 16.6.2 | Limitations of Archaeological Specimens | 461 |
| 16.6.3 | Lack of Correlation between Preservation and Age | 462 |

| | |
|---|------------|
| 16.7 Conclusion | 465 |
| Acknowledgements | 466 |
| References | 466 |
| Chapter 17 Spectroscopy of Historic Textiles: a Unique 17th Century Bodice | 468 |
| <i>A. Hernanz, J. M. Gavira-Vallejo, M. C. Álvarez, S. Martín, S. Montero, E. A. Carter, E. Gavrilenko and H. G. M. Edwards</i> | |
| 17.1 Introduction | 468 |
| 17.1.1 Initial remarks | 468 |
| 17.1.2 Historical Background | 469 |
| 17.2 Experimental | 469 |
| 17.3 Results and Discussion | 471 |
| 17.4 Conclusions | 478 |
| Acknowledgements | 479 |
| References | 479 |
| SELECTED RESEARCH THEMES | |
| Chapter 18 Identification and Authentication | 483 |
| <i>R. A. Goodall</i> | |
| 18.1 Introduction | 483 |
| 18.2 Identification | 485 |
| 18.3 Current Research Directions | 487 |
| 18.3.1 Pigments | 487 |
| 18.3.2 Metals | 490 |
| 18.3.3 Glass | 493 |
| 18.3.4 Stone | 494 |
| 18.3.5 Gemstones | 495 |
| 18.3.6 Biomaterials | 496 |
| 18.4 Conclusions | 497 |
| Acknowledgement | 498 |
| References | 498 |
| Chapter 19 Technology of Production: The Master Potter Ali Muhammad Isfahani: Insights into the Production of Decorative Underglaze Painted Tiles in 19th Century Iran | 502 |
| <i>I. Reiche and F. Voigt</i> | |
| 19.1 Introduction | 502 |
| 19.2 Description of Material | 506 |
| 19.2.1 Tiles | 506 |
| 19.2.2 Samples | 507 |

| | | |
|--------|---|-----|
| 19.2.3 | Treatise | 509 |
| 19.3 | Analytical Approach | 512 |
| 19.3.1 | Analysis of Tiles | 514 |
| 19.3.2 | Analysis of the Raw Materials of the Sample Box | 516 |
| 19.4 | Results | 517 |
| 19.4.1 | Characterisation of the Tiles | 517 |
| 19.4.2 | Characterisation of the Raw Materials of the Sample Box | 518 |
| 19.5 | The Production of Decorative Underglaze Painted Tiles | 518 |
| 19.5.1 | Procuring Raw Materials | 521 |
| 19.5.2 | Preparing the Materials | 523 |
| 19.5.3 | Making the Tiles | 528 |
| 19.6 | Conclusions | 528 |
| | Acknowledgement | 528 |
| | References | 529 |

Chapter 20 The Application of Analytical Archaeometry in Underwater Cultural Heritage—A Case Study from Patagonia, Argentina 532
D. Elkin, H.G.M. Edwards and M.S. Maier

| | | |
|--------|--|-----|
| 20.1 | Introduction | 532 |
| 20.2 | The Archaeological Sites and the Materials Studied | 535 |
| 20.2.1 | Raman Spectroscopy | 536 |
| 20.3 | Results and Discussion | 538 |
| 20.4 | Conclusion | 546 |
| | Acknowledgement | 547 |
| | References | 547 |
