

CONTENTS

I. Introduction	6
II. Occurrence of Some Less Known Arboviruses of Central Europe	8
1. Tick-borne arboviruses (D. Málková)	8
1.1. The Tribeč Virus	10
1.2. The Uukuniemi Virus (Z. Marhoul)	15
1.3. The Eyach Virus (Z. Marhoul)	20
1.4. The Bhanja Virus (Z. Marhoul)	22
2. Mosquito-borne Arboviruses (V. Danielová)	25
2.1. The Čalovo Virus	28
2.2. The Sindbis Virus (J. Holubová)	32
2.3. The West Nile Virus (J. Holubová)	37
III. The Lednice Virus (D. Málková)	43
1. Isolation and Classification	43
2. Properties of the Virus	44
2.1. Physico-chemical Properties	44
2.2. Formation of Haemagglutinin	45
2.3. Reproduction	46
2.4. Virus-Cell Interaction	51
2.5. Experimental Infection	51
2.6. Formation of Antibodies	53
3. Diagnostic methods (J. Holubová)	53
3.1. Methods of Virus Isolation	54
3.2. Serological Methods	54
3.3. Immunofluorescence	55
3.4. Tissue Cultures	55
4. The Virus Focus in Southern Moravia (D. Málková)	55
4.1. Natural Conditions in the Area of Virus Occurrence	55
4.2. The Virus Vector (V. Danielová)	56
4.3. Virus Hosts	61
4.3.1. Birds	61
4.3.1.1. Free-Living Birds	61
4.3.1.2. Poultry	63
4.3.2. Mammals	67

4.3.2.1. Free-living Mammals	67
4.3.2.2. Domestic Animals	68
4.4. Serological Examination of Humans	71
4.5. Assumed Virus Circulation in Nature	71
4.6. Geographical Distribution	72
4.7. Health Risk Significance	72
