Contents

Preface	*ix*
Introduction	*xiii*
Lecture 1: The Lorentz Transformation	1
Lecture 2: Velocities and 4-Vectors	63
Lecture 3: Relativistic Laws of Motion	79
Lecture 4: Classical Field Theory	115
Lecture 5: Particles and Fields	155
Interlude: Crazy Units	193
Lecture 6: The Lorentz Force Law	205
Lecture 7: Fundamental Principles and Gauge Invariance	255
Lecture 8: Maxwell's Equations	269
Lecture 9: Physical Consequences of Maxwell's Equations	303
Lecture 10: Maxwell From Lagrange	325
Lecture 11: Fields and Classical Mechanics	353
Appendix A: Magnetic Monopoles: Lenny Fools Art	*395*
Appendix B: Review of 3-Vector Operators	*411*
Index	*416*
