Table of Contents

Preface

Invited Contributions

Relational Machine Learning 1
Filip Železný

Psychological Theories of Concepts 3
Edouard Machery

Towards Cross-Fertilization between Data Mining and Constraints 5
Lakhdar Sais

Boolean Tensor Factorizations – and Beyond 7
Pauli Miettinen

Regular Papers

K-Chains Problem and Why it Matters for Extremal Contexts 9
Bogdan Chornomaz

A First Study on What MDL Can Do for FCA 25
Tatiana Makhalova, Sergei O. Kuznetsov, and Amedeo Napoli

Average Size of Implicational Bases 37
Giacomo Kahn and Alexandre Bazin

Mining Correlated Association Rules from Multi-Relational Data using Interval Patterns 47
Hirohisa Seki and Masahiro Nagao

k-Partite Graphs as Contexts 59
Alexandre Bazin and Aurélie Bertaux

How Hierarchies of Concept Graphs Can Facilitate the Interpretation of RCA Lattices? 69
Sébastien Ferré and Peggy Cellier

Cover Problems, Dimensions And The Tensor Product Of Complete Lattices 81
Christian Jäkel and Stefan E. Schmidt

Finding Concepts with Unexpected Multi-Label Objects Based on Shared Subspace Method 93
HongJie Zhai, Makoto Haraguchi, Yoshiaki Okubo, and HeYu Liu

Steps Towards Achieving Distributivity in Formal Concept Analysis 105
Alain Gély, Miguel Couceiro, and Amedeo Napoli

A Data Analysis Application of Formal Independence Analysis..... 117
Francisco J. Valverde-Albacete, Carmen Peláez-Moreno, Inma P. Cabrera, Pablo Cordero, and Manuel Ojeda-Aciego

Towards Simplification Logic for Graded Attribute Implications with General Semantics 129
Pablo Cordero, Manuel Enciso, Angel Mora, and Vilem Vychodil

A Similarity Measure to Generalize Attributes 141
Rostand S. Kuitché, Romuald E. A. Temgoua, and Lénard Kwuida

Order-embedded Complete Lattices 153
Bernhard Ganter

The 8M Algorithm from Today's Perspective 167
Radim Belohlavek and Martin Trnecka

Can We Measure the Interpretability of Factors? 179
Martin Trnecka and Marketa Trneckova

Toward Factor Analysis of Educational Data 191
Eduard Bartl, Radim Belohlavek, and Alex Scharaschkin

Interactive Query Refinement using Formal Concept Analysis..... 207
Tim Pattison

Papers with Short Presentation

Efficient Formal Concept Analysis through Recursive Context Partitioning 219
Tim Pattison, Aaron Ceglar, and Derek Weber

Sequential Pattern Mining using FCA and Pattern Structures for Analyzing Visitor Trajectories in a Museum 231
Nyoman Juniarta, Miguel Couceiro, Amedeo Napoli, and Chedy Raïssi

Pattern Setups and Their Completions 243
Aimene Belfodil, Sergei O. Kuznetsov, and Mehdi Kaytoue

A New Method for Inheriting Canonicity Test Failures in Close-by-One Type Algorithms 255
Simon Andrews

The Distributive, Graded Lattice of $\mathcal{EL}$ Concept Descriptions and its Neighborhood Relation 267
Francesco Kriegel

Characterizing Covers of Functional Dependencies using FCA 279
Victor Codocedo, Jaume Baixeries, Mehdi Kaytoue, and Amedeo Napoli

Author Index 291
