PART I IoT ECOSYSTEM CONCEPTS AND ARCHITECTURES

CHAPTER 1 Internet of Things: An Overview	3
<i>F. Khodadadi, A.V. Dastjerdi, R. Buyya</i>	
1.1 Introduction	3
1.2 Internet of Things Definition Evolution	5
1.2.1 IoT Emergence.....	5
1.2.2 Internet of Everything.....	5
1.2.3 Industrial IoT	5
1.2.4 Smartness in IoT.....	5
1.2.5 Market Share.....	6
1.2.6 Human in the Loop	7
1.2.7 Improving the Quality of Life.....	7
1.3 IoT Architectures.....	7
1.3.1 SOA-Based Architecture	8
1.3.2 API-Oriented Architecture.....	9
1.4 Resource Management	10
1.4.1 Resource Partitioning.....	10
1.4.2 Computation Offloading	11
1.4.3 Identification and Resource/Service Discovery	12
1.5 IoT Data Management and Analytics.....	12
1.5.1 IoT and the Cloud	13
1.5.2 Real-Time Analytics in IoT and Fog Computing.....	14
1.6 Communication Protocols	15
1.6.1 Network Layer	16
1.6.2 Transport and Application Layer.....	16
1.7 Internet of Things Applications.....	18
1.7.1 Monitoring and Actuating.....	18
1.7.2 Business Process and Data Analysis.....	19
1.7.3 Information Gathering and Collaborative Consumption	19
1.8 Security	19
1.9 Identity Management and Authentication	21

1.10	Privacy	21
1.11	Standardization and Regulatory Limitations	22
1.12	Conclusions	22
	References	23
CHAPTER 2	Open Source Semantic Web Infrastructure for Managing IoT Resources in the Cloud.....	29
	<i>N. Kefalakis, S. Petris, C. Georgoulis, J. Soldatos</i>	
2.1	Introduction	29
2.2	Background/Related Work	30
2.3	OpenIoT Architecture for IoT/Cloud Convergence	32
2.4	Scheduling Process and IoT Services Lifecycle.....	35
2.5	Scheduling and Resource Management.....	41
2.6	Validating Applications and Use Cases	45
2.7	Future Research Directions	46
2.8	Conclusions	46
	References.....	47
CHAPTER 3	Device/Cloud Collaboration Framework for Intelligence Applications.....	49
	<i>Y. Yoon, D. Ban, S. Han, D. An, E. Heo</i>	
3.1	Introduction	49
3.2	Background and Related Work	49
3.3	Device/Cloud Collaboration Framework	50
	3.3.1 Powerful Smart Mobile Devices.....	50
	3.3.2 Runtime Adaptation Engine	51
	3.3.3 Privacy-Protection Solution.....	52
3.4	Applications of Device/Cloud Collaboration	54
	3.4.1 Context-Aware Proactive Suggestion.....	54
	3.4.2 Semantic QA Cache.....	56
	3.4.3 Image and Speech Recognition	57
3.5	Future Work.....	59
3.6	Conclusions	59
	References.....	59
CHAPTER 4	Fog Computing: Principles, Architectures, and Applications	61
	<i>A.V. Dastjerdi, H. Gupta, R.N. Calheiros, S.K. Ghosh, R. Buyya</i>	
4.1	Introduction	61
4.2	Motivating Scenario	62
4.3	Definitions and Characteristics.....	63

4.4	Reference Architecture.....	64
4.5	Applications.....	66
4.5.1	Healthcare.....	66
4.5.2	Augmented Reality.....	66
4.5.3	Caching and Preprocessing.....	68
4.6	Research Directions and Enablers.....	68
4.6.1	Programming Models.....	68
4.6.2	Security and Reliability.....	69
4.6.3	Resource Management.....	69
4.6.4	Energy Minimization.....	70
4.7	Commercial Products.....	70
4.7.1	Cisco IOx.....	70
4.7.2	Data in Motion.....	71
4.7.3	LocalGrid.....	71
4.7.4	ParStream.....	71
4.7.5	Prismtech Vortex.....	71
4.8	Case Study.....	72
4.8.1	Experiment Setup.....	73
4.8.2	Performance Evaluation.....	73
4.9	Conclusions.....	74
	References.....	75

PART II IoT ENABLERS AND SOLUTIONS

CHAPTER 5 Programming Frameworks for Internet of Things..... 79

J. Krishnamurthy, M. Maheswaran

5.1	Introduction.....	79
5.2	Background.....	80
5.2.1	Overview.....	80
5.2.2	Embedded Device Programming Languages.....	80
5.2.3	Message Passing in Devices.....	83
5.2.4	Coordination Languages.....	87
5.2.5	Polyglot Programming.....	89
5.3	Survey of IoT Programming Frameworks.....	91
5.3.1	Overview.....	91
5.3.2	IoT Programming Approaches.....	91
5.3.3	Existing IoT Frameworks.....	92
5.3.4	Summary.....	98
5.4	Future Research Directions.....	100
5.5	Conclusions.....	100
	References.....	101

CHAPTER 6	Virtualization on Embedded Boards as Enabling Technology for the Cloud of Things	103
	<i>B. Bardhi, A. Claudi, L. Spalazzi, G. Taccari, L. Taccari</i>	
6.1	Introduction	103
6.2	Background.....	105
	6.2.1 ARM Virtualization Extensions	107
	6.2.2 XEN ARM Virtualization.....	108
	6.2.3 KVM ARM Virtualization.....	108
	6.2.4 Container-Based Virtualization	109
6.3	Virtualization and Real-Time	110
6.4	Experimental Results.....	112
	6.4.1 Reference Architecture	112
	6.4.2 Benchmarking Tools.....	113
	6.4.3 Discussion.....	113
6.5	Future Research Directions	121
6.6	Conclusions	122
	References.....	122
CHAPTER 7	Micro Virtual Machines (MicroVMs) for Cloud-Assisted Cyber-Physical Systems (CPS)	125
	<i>J.V. Pradilla, C.E. Palau</i>	
7.1	Introduction	125
7.2	Related Work.....	128
	7.2.1 Virtual Machines and Micro Virtual Machines	128
	7.2.2 Other Architectures.....	129
7.3	Architecture for Deploying CPS in the Cloud and the Expansion of the IoT	130
7.4	Extending the Possibilities of the IoT by Cloud Computing.....	132
7.5	Micro Virtual Machines with the Sensor Observation Service, the Path Between Smart Objects and CPS	133
	7.5.1 Virtual Machines and Sensor Observation Service	133
	7.5.2 Implementation	135
7.6	IoT Architecture for Selected Use Cases.....	135
	7.6.1 eHealth.....	136
	7.6.2 Precision Agriculture	137
	7.6.3 Domotic	139
7.7	Future Research Directions	140
7.8	Conclusions	140
	References.....	141

PART III IoT DATA AND KNOWLEDGE MANAGEMENT

CHAPTER 8 Stream Processing in IoT: Foundations, State-of-the-Art, and Future Directions145
X. Liu, A.V. Dastjerdi, R. Buyya

8.1 Introduction 145

8.2 The Foundations of Stream Processing in IoT 147

 8.2.1 Stream 148

 8.2.2 Stream Processing..... 148

 8.2.3 The Characteristics of Stream Data in IoT 151

 8.2.4 The General Architecture of a Stream-Processing System in IoT..... 153

8.3 Continuous Logic Processing System 155

8.4 Challenges and Future Directions 157

 8.4.1 Scalability 157

 8.4.2 Robustness 159

 8.4.3 SLA-Compliance 159

 8.4.4 Load Balancing 159

8.5 Conclusions 159

References..... 160

CHAPTER 9 A Framework for Distributed Data Analysis for IoT163
M. Moshtaghi, C. Leckie, S. Karunasekera

9.1 Introduction 163

9.2 Preliminaries..... 163

9.3 Anomaly Detection..... 165

9.4 Problem Statement and Definitions 168

 9.4.1 Hyperellipsoidal Anomaly Detection 168

9.5 Distributed Anomaly Detection..... 169

 9.5.1 Clustering Ellipsoids..... 169

 9.5.2 Experimental Results 172

9.6 Efficient Incremental Local Modeling..... 173

 9.6.1 Incremental Updates 175

 9.6.2 Implementation of Incremental Updates 176

 9.6.3 Experimental Results 176

9.7 Summary..... 178

References..... 178

PART IV IoT RELIABILITY, SECURITY, AND PRIVACY

CHAPTER 10 Security and Privacy in the Internet of Things183

V. Chellappan, K.M. Sivalingham

10.1	Concepts	183
10.1.1	IoT Reference Model.....	184
10.1.2	IoT Security Threats.....	185
10.1.3	IoT Security Requirements.....	185
10.2	IoT Security Overview	188
10.2.1	IoT Protocols	188
10.2.2	Network and Transport Layer Challenges.....	189
10.2.3	IoT Gateways and Security	190
10.2.4	IoT Routing Attacks	190
10.2.5	Bootstrapping and Authentication.....	192
10.2.6	Authorization Mechanisms.....	192
10.2.7	IoT OAS	193
10.3	Security Frameworks for IoT	193
10.3.1	Light Weight Cryptography	194
10.3.2	Asymmetric LWC Algorithms	195
10.3.3	Key Agreement, Distribution, and Bootstrapping.....	195
10.4	Privacy in IoT Networks	196
10.4.1	Secure Data Aggregation.....	196
10.4.2	Enigma	197
10.4.3	Zero Knowledge Protocols.....	197
10.4.4	Privacy in Beacons	197
10.5	Summary and Conclusions	198
	References	199

CHAPTER 11 Internet of Things—Robustness and Reliability201

S. Sarkar

11.1	Introduction	201
11.2	IoT Characteristics and Reliability Issues	202
11.2.1	IoT Architecture in Brief.....	202
11.2.2	Failure Scenarios	204
11.2.3	Reliability Challenges	205
11.2.4	Privacy and Reliability	207
11.2.5	Interoperability of Devices.....	207
11.2.6	Reliability Issues Due to Energy Constraint	207
11.3	Addressing Reliability	208
11.3.1	Nullifying Impact of Fault.....	208

11.3.2	Error Detection	211
11.3.3	Fault Prevention	213
	References.....	216

CHAPTER 12 Governing Internet of Things: Issues, Approaches, and New Paradigms.....219

M. Maheswaran, S. Misra

12.1	Introduction	219
12.2	Background and Related Work	221
	12.2.1 Overview	221
	12.2.2 Background	221
	12.2.3 Related Work.....	226
12.3	IoT Governance	228
	12.3.1 Overview	228
	12.3.2 An Integrated Governance Idea.....	229
	12.3.3 Governance Models.....	229
	12.3.4 Important Governance Issues	229
	12.3.5 Existing Approaches.....	230
	12.3.6 New Paradigms.....	233
12.4	Future Research Directions	234
12.5	Conclusions	235
	References	236

CHAPTER 13 TinyTO: Two-Way Authentication for Constrained Devices in the Internet of Things239

C. Schmitt, M. Noack, B. Stiller

13.1	Introduction	239
13.2	Security Aspects and Solutions	241
13.3	Design Decisions	243
13.4	TinyTO Protocol.....	245
	13.4.1 Possible Handshake Protocol Candidates.....	245
	13.4.2 BCK with Preshared Keys for TinyTO	246
	13.4.3 Handshake Implementation	249
13.5	Evaluation.....	250
	13.5.1 Memory Consumption.....	250
	13.5.2 Runtime Performance.....	251
	13.5.3 Energy Consumption.....	252
13.6	Summary.....	255
	References	255

CHAPTER 14 Obfuscation and Diversification for Securing the Internet of Things (IoT).....259

S. Hosseinzadeh, S. Hyrynsalmi, V. Leppänen

14.1	Introduction	259
14.2	Distinguishing Characteristics of IoT.....	260
14.2.1	Operating Systems and Software in IoT.....	260
14.2.2	IoT Network Stack and Access Protocols	261
14.2.3	Security and Privacy in IoT.....	264
14.3	Obfuscation and Diversification Techniques.....	265
14.4	Enhancing the Security in IoT Using Obfuscation and Diversification Techniques	267
14.4.1	Motivations and Limitations of the Proposed Ideas.....	268
14.5	Different Use-Case Scenarios on Software Diversification and Obfuscation	270
14.6	Conclusions and Future Work	271
	References.....	272

PART V IoT APPLICATIONS

CHAPTER 15 Applied Internet of Things277

S.J. Johnston, M. Apetroaie-Cristea, M. Scott, S.J. Cox

15.1	Introduction	277
15.2	Scenario	278
15.3	Architecture Overview	278
15.3.1	Sensor to Gateway Communication	279
15.4	Sensors.....	283
15.5	The Gateway.....	286
15.5.1	Gateway Hardware	287
15.5.2	Gateway Software	289
15.5.3	Summary	290
15.6	Data Transmission	290
15.6.1	Advanced Message Queuing Protocol	292
15.6.2	Backend Processing.....	293
15.6.3	To Cloud or not to Cloud	294
15.7	Conclusions	296
	References.....	297

CHAPTER 16 Internet of Vehicles and Applications.....299

W. Wu, Z. Yang, K. Li

16.1	Basics of IoV	299
16.1.1	Background and Concept	299
16.1.2	Network Architecture	299

16.2	Characteristics and Challenges.....	301
16.2.1	Characteristics of IoV.....	301
16.2.2	Challenges in IoV.....	302
16.3	Enabling Technologies	303
16.3.1	MAC Protocols and Standards	303
16.3.2	Routing Protocols.....	306
16.3.3	Broadcasting and Information Dissemination.....	307
16.4	Applications.....	308
16.4.1	Driving Safety Related	309
16.4.2	Transportation Efficiency Related.....	310
16.4.3	Infotainment Services.....	312
16.5	Summary and Future Directions.....	313
	References	314

CHAPTER 17 Cloud-Based Smart-Facilities Management.....319

S. Majumdar

17.1	Introduction	319
17.2	Background and Related Work	320
17.3	A Cloud-Based Architecture for Smart-Facility Management.....	321
17.4	Middleware Services	323
17.5	Resource Management Techniques for Wireless Sensor Networks.....	325
17.5.1	Sensor Allocation	326
17.5.2	Request Scheduling.....	327
17.6	Resource Management Techniques for Supporting Data Analytics.....	328
17.6.1	Streaming Data Analytics.....	329
17.7	Case Study: Management of Sensor-Based Bridges	330
17.8	Case Study: Research Collaboration Platform for Management of Smart Machinery	331
17.9	Conclusions	336
17.9.1	Future Research Directions	336
	References	337

Index	341
