Preface	ix
1 Basic Concepts	1
1.1 Introduction: What is Probability?	1
1.1.1 An Example: Communication Systems	2
1.2 Review of Set Theory	2
1.2.1 Venn Diagrams	5
1.2.2 Set Operations	6
1.2.3 Cardinality: Countable and Uncountable Sets	11
1.2.4 Functions	15
1.2.5 Solved Problems	16
1.3 Random Experiments and Probabilities	20
1.3.1 Random Experiments	20
1.3.2 Probability	21
1.3.3 Finding Probabilities	23
1.3.4 Discrete Probability Models	27
1.3.5 Continuous Probability Models	30
1.3.6 Solved Problems	33
1.4 Conditional Probability	39
1.4.1 Independence	46
1.4.2 Law of Total Probability	51
1.4.3 Bayes' Rule	54
1.4.4 Conditional Independence	57
1.4.5 Solved Problems	59
1.5 End of Chapter Problems	69
2 Combinatorics: Counting Methods	81
2.1 Finding Probabilities Using Counting Methods	81
2.1.1 Ordered Sampling with Replacement	84
2.1.2 Ordered Sampling without Replacement: Permutations	85
2.1.3 Unordered Sampling without Replacement: Combinations	87
2.1.4 Unordered Sampling with Replacement	94
2.1.5 Solved Problems	96
2.2 End of Chapter Problems	103

3	Discrete Random Variables	107
3.1	Basic Concepts	107
3.1.1	Random Variables	107
3.1.2	Discrete Random Variables	108
3.1.3	Probability Mass Function (PMF)	109
3.1.4	Independent Random Variables	113
3.1.5	Special Distributions	114
3.1.6	Solved Problems	126
3.2	More about Discrete Random Variables	134
3.2.1	Cumulative Distribution Function (CDF)	135
3.2.2	Expectation	139
3.2.3	Functions of Random Variables	143
3.2.4	Variance	145
3.2.5	Solved Problems	149
3.3	End of Chapter Problems	155
4	Continuous and Mixed Random Variables	161
4.1	Continuous Random Variables and their Distributions	161
4.1.1	Probability Density Function (PDF)	163
4.1.2	Expected Value and Variance	167
4.1.3	Functions of Continuous Random Variables	170
4.1.4	Solved Problems	175
4.2	Special Distributions	179
4.2.1	Uniform Distribution	180
4.2.2	Exponential Distribution	180
4.2.3	Normal (Gaussian) Distribution	183
4.2.4	Gamma Distribution	190
4.2.5	Other Distributions	193
4.2.6	Solved Problems	194
4.3	Mixed Random Variables	199
4.3.1	Mixed Random Variables	199
4.3.2	Using the Delta Function	202
4.3.3	Solved Problems	209
4.4	End of Chapter Problems	214
5	Joint Distributions: Two Random Variables	219
5.1	Two Discrete Random Variables	219
5.1.1	Joint Probability Mass Function (PMF)	219
5.1.2	Joint Cumulative Distribution Function (CDF)	223
5.1.3	Conditioning and Independence	226
5.1.4	Functions of two random variables	235
5.1.5	Conditional Expectation (Revisited) and Conditional Variance	237
5.1.6	Solved Problems	246
5.2	Two Continuous Random Variables	256
5.2.1	Joint Probability Density Function (PDF)	256
5.2.2	Joint Cumulative Distribution Function (CDF)	262
5.2.3	Conditioning and Independence	264

5.2.4	Functions of Two Continuous Random Variables	277
5.2.5	Solved Problems	283
5.3	More Topics on Two Random Variables	291
5.3.1	Covariance and Correlation	291
5.3.2	Bivariate Normal Distribution	296
5.3.3	Solved Problems	303
5.4	End of Chapter Problems	310
6	Multiple Random Variables	319
6.1	Methods for more than Two Random Variables	319
6.1.1	Joint Distributions and Independence	319
6.1.2	Sums of Random Variables	321
6.1.3	Moment Generating Functions	324
6.1.4	Characteristic Functions	330
6.1.5	Random Vectors	331
6.1.6	Solved Problems	343
6.2	Probability Bounds	352
6.2.1	The Union Bound and its Extensions	353
6.2.2	Markov and Chebyshev Inequalities	358
6.2.3	Chernoff Bounds	360
6.2.4	Cauchy-Schwarz Inequality	362
6.2.5	Jensen's Inequality	363
6.2.6	Solved Problems	365
6.3	End of Chapter Problems	372
7	Limit Theorems and Convergence of Random Variables	377
7.1	Limit Theorems	377
7.1.1	Law of Large Numbers	377
7.1.2	Central Limit Theorem (CLT)	379
7.1.3	Solved Problems	385
7.2	Convergence of Random Variables	392
7.2.1	Convergence of a Sequence of Numbers	392
7.2.2	Sequence of Random Variables	393
7.2.3	Different Types of Convergence for Sequences of Random Variables	396
7.2.4	Convergence in Distribution	396
7.2.5	Convergence in Probability	400
7.2.6	Convergence in Mean	402
7.2.7	Almost Sure Convergence	405
7.2.8	Solved Problems	410
7.3	End of Chapter Problems	418
8	Statistical Inference I: Classical Methods	423
8.1	Introduction	423
8.1.1	Random Sampling	424
8.2	Point Estimation	428
8.2.1	Evaluating Estimators	429
8.2.2	Point Estimators for Mean and Variance	432

8.2.3	Maximum Likelihood Estimation (MLE)	435
8.2.4	Asymptotic Properties of MLEs	443
8.2.5	Solved Problems	443
8.3	Interval Estimation (Confidence Intervals)	448
8.3.1	The general framework of Interval Estimation	449
8.3.2	Finding Interval Estimators	450
8.3.3	Confidence Intervals for Normal Samples	460
8.3.4	Solved Problems	469
8.4	Hypothesis Testing	474
8.4.1	Introduction	474
8.4.2	General Setting and Definitions	477
8.4.3	Hypothesis Testing for the Mean	480
8.4.4	P-Values	487
8.4.5	Likelihood Ratio Tests	490
8.4.6	Solved Problems	494
8.5	Linear Regression	498
8.5.1	Simple Linear Regression Model	500
8.5.2	The First Method for Finding β_0 and β_1	500
8.5.3	The Method of Least Squares	506
8.5.4	Extensions and Issues	507
8.5.5	Solved Problems	507
8.6	End of Chapter Problems	513
9	Statistical Inference II: Bayesian Inference	519
9.1	Bayesian Inference	519
9.1.1	Prior and Posterior	522
9.1.2	Maximum A Posteriori (MAP) Estimation	523
9.1.3	Comparison to ML Estimation	525
9.1.4	Conditional Expectation (MMSE)	526
9.1.5	Mean Squared Error (MSE)	528
9.1.6	Linear MMSE Estimation of Random Variables	533
9.1.7	Estimation for Random Vectors	538
9.1.8	Bayesian Hypothesis Testing	541
9.1.9	Bayesian Interval Estimation	545
9.1.10	Solved Problems	547
9.2	End of Chapter Problems	556
10	Introduction to Random Processes	561
10.1	Basic Concepts	561
10.1.1	PDFs and CDFs	567
10.1.2	Mean and Correlation Functions	567
10.1.3	Multiple Random Processes	571
10.1.4	Stationary Processes	573
10.1.5	Gaussian Random Processes	582
10.1.6	Solved Problems	585
10.2	Processing of Random Signals	590
10.2.1	Power Spectral Density	590

10.2.2	Linear Time-Invariant (LTI) Systems with Random Inputs	592
10.2.3	Power in a Frequency Band	596
10.2.4	White Noise	599
10.2.5	Solved Problems	602
10.3	End of Chapter Problems	606
11	Some Important Random Processes	611
11.1	Poisson Processes	611
11.1.1	Counting Processes	611
11.1.2	Basic Concepts of the Poisson Process	613
11.1.3	Merging and Splitting Poisson Processes	621
11.1.4	Nonhomogeneous Poisson Processes	625
11.1.5	Solved Problems	626
11.2	Discrete-Time Markov Chains	630
11.2.1	Introduction	630
11.2.2	State Transition Matrix and Diagram	631
11.2.3	Probability Distributions	633
11.2.4	Classification of States	636
11.2.5	Using the Law of Total Probability with Recursion	641
11.2.6	Stationary and Limiting Distributions	647
11.2.7	Solved Problems	657
11.3	Continuous-Time Markov Chains	665
11.3.1	Introduction	665
11.3.2	Stationary and Limiting Distributions	669
11.3.3	The Generator Matrix	673
11.3.4	Solved Problems	680
11.4	Brownian Motion (Wiener Process)	685
11.4.1	Brownian Motion as the Limit of a Symmetric Random Walk	685
11.4.2	Definition and Some Properties	687
11.4.3	Solved Problems	689
11.5	End of Chapter Problems	693
12	Introduction to Simulation Using MATLAB (Available Online)	703
13	Introduction to Simulation Using R (Available Online)	705
14	Recursive Methods (Available Online)	707
	Appendix	709
	Index	731
