

## CONTENTS

The institute and its scientific board	V
The staff and field of work	VI
<b>1. INTRODUCTION</b>	<b>1</b>
<b>2. RESERVOIRS</b>	<b>7</b>
2.1 Dissolved and dispersed substances in reservoir water (Slapy and Římov)	7
2.2 Seasonal pattern of temperature and transparency in the Slapy reservoir during 2002–2003	8
2.3 Phosphate release from sediments in a hypertrophic reservoir – seasonal and spatial variations	9
2.4 Microbial characteristics of the Slapy and Římov reservoirs	11
2.5 Structure–function analysis of the bacterioplankton assemblage in the Římov reservoir	11
2.6 Fish stock composition in the Římov reservoir in 2003	11
2.7 Diel vertical migrations of bathypelagic perch fry ( <i>Perca fluviatilis</i> L.): a case study in the Slapy reservoir	13
2.8 Longitudinal and vertical spatial gradients in the distribution of fish within a canyon-shaped reservoir	14
<b>3. LAKES</b>	<b>15</b>
3.1 Modelling reversibility of central European mountain lakes from acidification	15
3.2 Modelling air temperature at Čertovo Lake	16
3.3 Impact of alpine soils on water composition	16
3.4 Primary production and microbial activity in the euphotic zone of Lake Baikal (Southern Basin) during late winter	17
3.5 Protozooplankton and their activity in a deep monomictic saline lake in a semi-desert area	19
<b>4. SPECIAL INVESTIGATIONS</b>	<b>21</b>
4.1 Members of a small subcluster of Beta-Proteobacteria sensitively respond to top-down and bottom-up manipulations with bacterioplankton in the Římov reservoir	21
4.2 Protistan feeding preferences studied by means of FISH conducted in food vacuoles	21
4.3 The occurrence of bloom-forming green alga <i>Pleodorina indica</i> (Iyengar) Nozaki (Volvocales) in the downstream reach of the Malše River	22
4.4 Fish dispersal in a network of temporal and permanent water-bodies in subtropics	23
<b>PUBLICATIONS</b>	<b>25</b>
