

CONTENTS

The institute and its scientific board	V
The staff and field of work	VI
1. INTRODUCTION	1
2. RESERVOIRS	6
2.1 Dissolved and dispersed substances in reservoir water (Slapy and Římov)	6
2.2 Sedimentation processes and phosphorus uptake in the Římov reservoir	7
2.3 Microbial characteristics of reservoirs Slapy and Římov	7
2.4 Mechanisms of microbial transformation of pollution with biodegradable organic carbon and nutrients in the inflow zone of canyon-shaped reservoir	8
2.5 The role of protistan bacterivory along longitudinal transects of two canyon-shaped reservoirs	11
2.6 Growth rate of ciliates in longitudinal profile of the Římov reservoir	13
2.7 Species composition and biomass of phytoplankton summer maxima in the Římov reservoir in last two consecutive years (2000–2001)	16
2.8 Site-specific preferences of zooplankton on the longitudinal profile of the reservoir	17
2.9 Seasonal dynamics of rotifer fecundity in the Římov reservoir	17
2.10 Diurnal vertical distribution of <i>Daphnia</i> species in the Římov reservoir in the spring period	19
2.11 Fish stock composition in the Římov reservoir in 2001	20
2.12 Diversity and density of fish fry assemblages in different habitats of a canyon-shaped reservoir	22
2.13 Diet spectra of bleak (<i>Alburnus alburnus</i>) and bream (<i>Abramis brama</i>) along the longitudinal profile of a canyon-shaped reservoir	22
2.14 Nutrient sources in the Jordán reservoir catchment	23
2.15 Impacts of climate change on reservoir ecosystems	24
2.16 Long term development and ageing of the Klíčava reservoir	26
3. LAKES	29
3.1 Sulphur and nitrogen fluxes and budgets in the Bohemian Forest and Tatra Mountains during the Industrial Revolution (1850–2000)	29
3.2 Element budgets in three Bohemian Forest lakes and their watersheds in the 2000 hydrological year	29
3.3 Pelagic bacteria abundance and biomass in lakes of European mountains	30
4. SPECIAL INVESTIGATIONS	33
4.1 The effect of climate change on the concentration of dissolved organic matter in a temperate stream (the Malše River, South Bohemian)	33
4.2 Fractionation of dissolved organic matter in water	33
4.3 Dynamics of microbial activity along the Vltava River and its reservoir cascade	35
4.4 Changes in bacterial community composition, dynamics and viral mortality rates associated with enhanced grazing and change of nutrient status	36
4.5 The life at high pH	37
4.6 Analyses of the crustacean zooplankton for the phosphorus content	42
4.7 Species and size dependent food selectivity in filtering zooplankton	42

4.8	Acoustic methods for assessment of biotic and abiotic parameters of water environment	43
4.9	Fish as a potential load of pollutants in otter diet in the Upper Lužnice River	44
4.10	Feeding behaviour of two size groups of naïve (pellet reared) and wild largemouth bass (<i>Micropterus salmoides</i>) in a laboratory experiment	44
