Preface *xiii*

PART 1 ORGANIC CHEMICALS 1.1-1

- 1.1 Halcon SD Group Acetic Anhydride Process 1.1-3**
- 1.2 Nippon Shokubai Kagaku Kogyo Acrylic Acid and Esters Process 1.2-1**
- 1.3 Halcon SD Group Ethylene Glycol Process 1.3-1**
- 1.4 Hüls Synthetic Ethanol Process 1.4-1**
- 1.5 Halcon SD Group Ethylene Oxide Process 1.5-1**
- 1.6 Shell Ethylene Oxide/Ethylene Glycol Process 1.6-1**
- 1.7 Montefibre-Monsanto Hexamethylenediamine Process 1.7-1**
- 1.8 Hüls Isopropyl Alcohol Process 1.8-1**
- 1.9 Halcon SD Group Maleic Anhydride Process 1.9-1**
- 1.10 Lurgi Pure Maleic Anhydride from C₄ Fractions (Bayer Process) 1.10-1**
- 1.11 UCB Maleic-Anhydride-Recovery Process 1.11-1**
- 1.12 Phillips Methyltertiarybutyl Ether Process 1.12-1**
- 1.13 Hüls Methyltertiarybutyl Ether Synthesis and Decomposition Processes
1.13-1**
- 1.14 Davy McKee Low-Energy Phthalic Anhydride Process 1.14-1**

- 1.15 BP Chemicals-Hercules Phenol and Acetone from Cumene Process 1.15-1
1.16 UOP Cumox Process—Phenol and Acetone by Cumene Oxidation 1.16-1
1.17 Nippon Shokubai Kagaku Kogyo Phthalic Anhydride Process 1.17-1
1.18 Lummus Propylene Oxide Process 1.18-1
1.19 Hüls *tert*-Butyl Alcohol Synthesis and Decomposition Processes 1.19-1

PART 2 POLYMERS 2.1-1

- 2.1 Phillips Cis-Polybutadiene Process 2.1-3
2.2 Hoechst High-Density Polyethylene Process 2.2-1
2.3 Phillips High-Density Polyethylene Process 2.3-1
2.4 Imhausen Low-Density Polyethylene Process 2.4-1
2.5 Stamicarbon "Compact" Polyethylene Solution Process 2.5-1
2.6 BASF Novolen Polypropylene Process 2.6-1
2.7 Phillips Polypropylene Process 2.7-1
2.8 Hoechst Suspension Polyvinylchloride Process 2.8-1
2.9 Hoechst Emulsion Polyvinylchloride Process 2.9-1

PART 3 INORGANIC CHEMICALS 3.1-1

- 3.1 Boliden Aluminum Sulfate Process 3.1-3
3.2 ICI Chlor-Alkali Process 3.2-1
3.3 Hüls Process for Sodium Carbonate and Hydrogen Chloride from Sodium Chloride and Carbonic Acid 3.3-1
3.4 BAMAG Weak Nitric Acid Processes 3.4-1
3.5 BAMAG Strong Nitric Acid Process 3.5-1
3.6 Uhde Nitric Acid Processes 3.6-1
3.7 Ruhrstickstoff Phosphoric Acid Process 3.7-1
3.8 Norsk Hydro Fertilizers Hemihydrate Phosphoric Acid Processes 3.8-1
3.9 Davy McKee Processes for Sulfuric Acid Production from Sulfurous Spent Acids 3.9-1
3.10 Davy McKee Processes for Sulfuric Acid Production from Sulfur or Sulfurous Ores 3.10-1
3.11 Stamicarbon Carbon Dioxide Stripping Urea Process 3.11-1
3.12 Toyo Urea Process—Advanced Process for Cost and Energy Savings 3.12-1

Abbreviations and Acronyms A-1

Index I-1
