

PAPERS

- 5 **On the level of computational model of a human skull: A comparative study**
Chamrad J., Marcián P., Borák L.
- 17 **Identification of several non-stationary loads applied to an elastically deformed structure**
Lachmayer R., Yanchevskiy I., Mozgova I., Gottwald P.
- 33 **Lateral force effects of three-axle locomotive bogie on track**
Michálek T., Haupt L., Zelenka J., Kohout M., Liberová S.
- 45 **Semi-analytical stochastic analysis of the generalized van der Pol system**
Náprstek J., Fischer C.
- 59 **On the application of Sturm's theorem to analysis of dynamic pull-in for a graphene-based MEMS model**
Omarov D., Nurakhmetov D., Wei D., Skrzypacz P.
- 73 **Dynamic analysis of planar rigid multibody systems modeled using natural absolute coordinates**
Pappalardo C. M., Guida D.
- 111 **Torsion dissipated energy of hard rubbers as function of hyperelastic deformation energy of the Yeoh model**
Šulc P., Pešek L., Bula V., Košina J., Cibulka J.
