

CONTENTS

The institute and its scientific board	V
The staff and the field of work	VI
1. INTRODUCTION	1
2. RESERVOIRS	7
2.1. Dissolved and dispersed substances in reservoir waters	7
2.2. Microbes and BOD	10
2.2.1 BOD in the Římov Reservoir and its tributaries	10
2.2.2 Bacteria in the Římov Reservoir	12
2.3. Phytoplankton	14
2.3.1 Long-term study of phytoplankton in the Římov Reservoir	14
2.3.2 Fate of the spring phytoplankton bloom in Římov Reservoir: grazing, lysis and sedimentation	18
2.4. Zooplankton	19
2.4.1 Net zooplankton in the Slapy and Římov Reservoirs	19
2.4.2 Taxonomic surveys of ciliates in the Římov and Slapy Reservoirs	19
2.5. Fish	23
2.5.1 Monitoring of Fish Populations	23
2.5.2 Ichthyoplankton of the Římov Reservoir	24
3. SPECIAL INVESTIGATIONS	26
3.1. Photosensitized oxidation of atrazine by molecular oxygen	26
3.2. Semi-micro determination of total phosphorus and direct determination of particulate phosphorus in water	26
3.3. Semi-micro determination of ammonia in water	27
3.4. Byproducts formation during chlorination of aquatic humic substances	27
3.5. Bacterial selection under anaerobic-oxic conditions	28
3.6. Prey-size selection by bacterivorous ciliate - <i>Cyclidium sp.</i>	32
3.7. Relationship between an extracellular enzyme activity and protozoan bacterivory	36
3.8. Release of chitinolytic enzyme by moulting of <i>Daphnia</i>	40
3.9. Fish chemical influence on <i>Daphnia</i>	42
3.10. Investigation of zooplankton in the pools of the inundation area of the River Lužnice in Southern Bohemia (J. Hrbáček)	42
3.11. Structure of zooplankton in London reservoirs	43
