

## Contents

1. Introduction . . . . .	3
2. The relation of karst phenomena to tectonics . . . . .	4
3. Cave sediments and patterns of sedimentation in cave systems . . . . .	9
4. Geomorphological cave development, karst processes, the palaeohydrographic situation and development of the river system . . . . .	16
4.1 Palaeohydrographic characteristics based on sedimentary — petrographic approaches . . . . .	16
4.1.1 Development of the surface karst forms and the surface river system . . . . .	17
4.1.2 Development of the subterranean river system . . . . .	18
4.1.2.1 Area of disappearance of surface watters . . . . .	18
4.1.2.2 The throughflow area . . . . .	20
4.1.2.3 The area of resurgence . . . . .	21
4.2 Development of cave levels and the principal stages in the course of karst processes . . . . .	26
4.2.1 The cave levels . . . . .	26
4.2.2 The cave system . . . . .	28
4.2.3 The development of the karst processes during the Pliocene to Quaternary period . . . . .	28
4.2.4 Main stages in the course of the karst processes . . . . .	29
5. New findings . . . . .	31
6. Резюме . . . . .	34
7. Literature . . . . .	35
