Introduction ix

1 AN INTRODUCTION TO DRAWING FOR INTERIOR DESIGN 1

Understanding Orthographic Projection Drawings 5

Orthographic Projection Drawings for Interior Environments 7

Floor Plans 7

Interior Elevations 9

Sections 16

Reflected Ceiling Plans 18

Dimensions 19

Lettering 21

More about Orthographic Projections 22

2 THE DESIGN PROCESS AND RELATED GRAPHICS 29

Programming 32

Diagrams and Programming Analysis Graphics 34

Programming Matrices 40

Schematic Design 43

Bubble Diagrams 43

Blocking Diagrams 43

Fit and Stacking Plans 47

Conceptual Design 47

Mood and Inspiration Boards 49

Schematic Presentation Graphics 51

Design Development 60

3 PARALINE AND PERSPECTIVE DRAWINGS 63

Paraline Drawings 64

Plan Oblique Drawings 65

Isometric Drawings 67

Perspective Drawings 68

Perspective Basics 68

One-Point Perspective 73

Two-Point Perspective 73

Three-Point Perspective 74

Developing Visual Skills 74

Ellipses 74

Use of Enclosing Boxes 74

4 DRAWING AND SKETCHING INTERIOR ENVIRONMENTS 81

Estimated One-Point Interior Perspective Drawings 81

Estimated Two-Point Interior Perspective Drawings 87

Prepared Perspective Grid Charts 92

Two-Point Plan Projection Method 94

Using Photographs 97

Drawing Composition and Cropping 99

5 RENDERING BY HAND 103

Rendering as Illumination 104

Materials, Media, and Tools 105

Rendering Media 106

Rendering Orthographic Projection Drawings 107

Rendering Simplified Shadows 108

Materials and Finishes 109

Color Rendering 111

Additional Tips for Manual Rendering 125

Rendering Perspective Drawings 126

Shadows in Perspective Renderings 126

Rendering Perspective Drawings without Color 126

Rendering Interior Perspectives in Color 132

Techniques and Tips for Perspective Rendering 135

Hybrid Rendering: Combining Hand and Digital Rendering 139

6 SKETCHUP AND DIGITAL MODELING 143
Getting Started in SketchUp 144
SketchUp Drawing Basics 147
Drawing First Steps 147
Navigation Basics 149
Selection 149
More Drawing Basics 152
Creating Plan and Section Views 168
Exporting Files 169
Importing Files 170
Working from Imported CAD Files 171
Working with REVIT and Other File Types 173
Rendering and Materials Selection in SketchUp 173

7 DIGITAL RENDERING 175
Rendering in SketchUp 176
SketchUp Extensions 181
Rendering with Photoshop 184
Getting Started with CAD- or Revit-Generated Drawings 184
Rendering Setup 186
Rendering Techniques and Options 189
Rendering Perspectives in Photoshop 197
Revit Rendering 206

8 SCALE MODELS: PHYSICAL AND DIGITAL 209
Materials and Tools 210
Paperboard 211
Wood 215
Plastics and Foam 217
Additional Tools 217
Construction and Use of Models 219
Physical Scale Models in Professional Practice 224
Digital Fabrication and 3D Printing 228
Virtual Reality 234

9 PRESENTING MATERIALS AND FINISHES 239
Materials and Media Used in Making Boards and Physical Presentations 243
Organization and Composition 250
Sample Presentation Board Organizational Approaches 250
Titles, Keys, and Legends 252
Tips for Materials Preparation 255
Digital Presentation 259

10 MAKING THE COMPLETE PRESENTATION 263
Process and Presentation 267
Organization and Composition 268
Physical Presentations 268
Digital Presentation 273
Beyond the Board and Sheet 284
Graphic Design Components 287
Grids 287
Type 288
Creating Hierarchy 291
Public Speaking and Design Communication 293
Verbal Presentation Basics 296
A Few Words from the Experts 298

APPENDIX: COLOR THEORY FOR RENDERING 303
