

Contents

1	Preface	3
2	Introduction	5
2.1	Molecular beams and clusters	5
2.2	Clusters and their relevance	8
2.2.1	Atmospheric chemistry	12
2.2.2	Biomolecules in clusters	15
2.2.3	Clusters as nano-cryo-reactors	17
3	Experiment	21
3.1	General description	21
3.2	Expansions and beams	24
3.3	Scattering, size selection	31
3.4	Photodissociation	35
3.4.1	Willey-McLaren Time-of-Flight Spectrometer	38
3.4.2	Photodissociation of a molecule in cluster	40
3.5	Laser system	45
4	Results	48
4.1	HX in rare gas clusters	48
4.1.1	Photodissociation of hydrogen halides on argon clusters	49
4.1.2	Photodissociation of HBr and HCl in neon clusters . .	53
4.2	Atmospherically relevant clusters	56
4.2.1	Hydrogen halides on water clusters	56
4.2.2	Pure water clusters	62
4.3	Biomolecules in clusters	65

4.4	Novel rare gas molecules	73
5	Conclusions and outlook	78
6	Bibliography	85
A	List of abbreviations	95
B	Thesis publications	96
