

Contents in Brief

Chapter One

The Remarkable Body 1

Controversy: Our Ancestors' Diet: Is It Best for Us? 19

Chapter Two

Nutrients, Requirements, Foods, and Diet Planning 29

Controversy: Who Speaks on Nutrition? 59

Chapter Three

The Carbohydrates: Sugar, Starch, and Fiber 69

Controversy: Sugar and Sugar Substitutes 92

Chapter Four

The Lipids: Fats and Oils 105

Controversy: Nutrition and Atherosclerosis 131

Chapter Five

The Proteins and Amino Acids 145

Controversy: Nutrition and Cancer 170

Chapter Six

The Vitamins 181

Controversy: Vitamin Supplements 216

Chapter Seven

Minerals and Water 225

Controversy: Nutrition and Hypertension 264

Chapter Eight

Energy Balance and Weight Control 273

Controversy: Fad Diets—Fact *and* Fiction? 311

Chapter Nine

Fitness, Nutrition, and Exercise 327

Controversy: Eating Disorders and Society 362

Chapter Ten

Food Technology and Food Safety 371

Controversy: Nonnutrients in Foods 405

Chapter Eleven

Mother and Newborn Infant 419

Controversy: Drinking during Pregnancy 453

Chapter Twelve

Child and Teen 457

Controversy: Alcohol and Nutrition 489

Chapter Thirteen

Adulthood and the Later Years 499

Controversy: Food, Mood, and Time of Day 527

Chapter Fourteen

Nutrition Status: Domestic and World 537

Controversy: Must the Rainforest Die for Fast Food? 568

Contents

Chapter One

The Remarkable Body 1

- The Cells and Their Inheritance 2
 - The Body Fluids and the Circulatory System 4
 - The Immune System 7
 - The Hormonal and Nervous System 7
 - The Excretory System 8
 - Temperature Regulation 9
 - The Digestive System 9
 - Storage Systems 11
 - Other Systems 12
- Human Food Behavior 13
- Self Study:** Record What You Eat 18
- Controversy:** Our Ancestors' Diet: Is It Best for Us? 19

Chapter Two

Nutrients, Requirements, Foods, and Diet Planning 29

- Dietary Ideals 29
- The Nutrients 30
 - The Energy-Yielding Nutrients 31
 - The Essential Nutrients 32
- Recommended Nutrient Intakes 33
 - The RDA 33
 - The RDA for Nutrients 34
 - The RDA for Energy 36
 - The U.S. RDA 37
 - Other Recommendations 38
- Dietary Goals and Guidelines 38
- Diet Planning With Food Groups and Other Tools 40
 - Food Group Plans 41
 - Exchange Lists 41
 - Diet Planning 45
- Ethnic and Vegetarian Diets 48
 - The Chinese Diet 49

- Vegetarian Diets 52
- Problems with Ethnic and Vegetarian Diets 53
- Self-Study:** Calculate Your Nutrient Intakes 58
- Controversy:** Who Speaks on Nutrition? 59

Chapter Three

The Carbohydrates: Sugar, Starch, and Fiber 69

- A Close Look at Carbohydrates 69
 - Sugars and Starch 70
 - Fiber 71
- The Need for Starch and Fiber 73
- The Body's Use of Glucose 79
 - Storing Glucose as Glycogen 79
 - Splitting Glucose for Energy 80
 - Maintaining the Blood Glucose Level 81
 - Converting Glucose to Fat 82
- Abnormal Use of Carbohydrate 83
 - Lactose Intolerance 83
 - Hypoglycemia 84
 - Diabetes 85
- Consumer Box:** White Sugar versus Purified Fructose versus Honey 72
- Consumer Box:** Refined, Enriched, and Whole-Grain Bread 76
- Self-Study:** Examine Your Carbohydrate Intake 91
- Controversy:** Sugar and Sugar Substitutes 92

Chapter Four

The Lipids: Fats and Oils 105

- Usefulness of Fats 105
- Terminology 107

Contents

- A Chemist's View of Fats 109
 - Fatty Acids 110
 - Hydrogenation of Fats 114
 - Triglycerides in the Body 115
- Lipid Transport within the Body 116
- Lecithin and Cholesterol 117
- Fat in the Diet 122
 - The Fats 122
 - The Meats 123
 - Other Foods 124

- Consumer Box:** Fish Oils and Omega-3 Fatty Acids 111
- Consumer Box:** Lecithin 120
- Self-Study:** Examine Your Fat Intake 130
- Controversy:** Nutrition and Atherosclerosis 131

Chapter Five

The Proteins and Amino Acids 145

- The Structure of Proteins 145
 - Amino Acids and Their Side Chains 145
 - Proteins: Strands of Amino Acids 146
 - Denaturation of Proteins 148
- The Roles of Body's Proteins 149
- The Body's Handling of Protein 153
 - Digestion and Absorption in the Stomach and Small Intestine 153
 - Use of Amino Acids inside Cells 154
- Food Proteins: Quality and Use 155
- The Protein RDA 157
- Protein and Health 159
 - Protein-Energy Malnutrition 159
 - Protein Excess 161
 - Animal versus Vegetable Protein 163

- Consumer Box:** Protein and Amino Acid Supplements 162
- Self-Study:** Evaluate Your Protein Intake 169
- Controversy:** Nutrition and Cancer 170

Chapter Six

The Vitamins 181

- Definition and Classification of Vitamins 182
- The Fat-Soluble Vitamins 183
 - Vitamin A 183
 - Vitamin D 187
 - Vitamin E 189
 - Vitamin K 191

- The B Vitamins and Their Relatives 192
 - B Vitamin Roles in Metabolism 192
 - B Vitamin Deficiencies and Toxicities 194
 - Non-B Vitamins 197
- Vitamin C 201
- Consumer Box:** Vitamin B₆ Supplements 198
- Self-Study:** Evaluate Your Vitamin Intakes 215
- Controversy:** Vitamin Supplements 216

Chapter Seven

Minerals and Water 225

- Water 226
 - The Water Supply 227
 - The Body Fluids 229
- The Major Minerals 231
 - Calcium 231
 - Sodium 240
 - Potassium 241
 - Other Major Minerals 242
- The Trace Minerals 244
 - Iodine 244
 - Iron 245
 - Zinc 250
 - Fluoride 252
 - Other Trace Minerals 254
- Consumer Box:** Calcium Supplements 238
- Consumer Box:** Iron-Fortified Foods and Iron Supplements 249
- Self-Study:** Evaluate Your Mineral Intakes 262
- Controversy:** Nutrition and Hypertension 264

Chapter Eight

Energy Balance and Weight Control 273

- The Mystery of Obesity 274
 - Metabolic Causes 274
 - Behavioral Causes 276
- Definition of Appropriate Weight 278
 - Body Composition 283
 - Deciding to Gain Weight 285
- Energy Balance 286
 - Energy In versus Energy Out 286
 - Estimation of Energy Output 290
- Weight Gain and Loss 291
 - Weight Gain 291
 - Weight Loss and Fasting 292

- The Low-Carbohydrate Diet 294
- Very-Low-Calorie Diets 295
- Other Approaches (Not Recommended) 296
- Consumer Box:** Diet Pills and Other Aids 298
- Self-Study:** Practice Diet Planning 308
- Controversy:** Fad Diets—Fact *and* Fiction? 311

- Preventing Food Poisoning 392
 - Food Safety in the Kitchen 393
 - Food Safety While Traveling 396
- Self-Study:** Evaluate Your Food Choices 403
- Controversy:** Nonnutrients in Foods 405

Chapter Nine

Fitness, Nutrition, and Exercise 327

- Why Exercise? 327
- Exercise and Heart Health 329
- Oxygen, Fuels, and Muscular Work 334
 - Oxygen 335
 - Exercise and Glucose Use 336
 - Exercise and Fatty Acid Use 340
- Vitamins and Minerals—Keys to Energy Use 341
 - Vitamins 341
 - Iron and Sports Anemia 343
 - Calcium and the Bones 346
- Fluids and Electrolytes 347
- Food for Performance 352
 - Planning the Diet 353
 - The Pregame Meal 356
- Consumer Box:** Supplements Athletes Take 344
- Consumer Box:** Sports Drinks 349
- Consumer Box:** Drugs, Blood Doping, and Hormones 351
- Self-Study:** Estimate Your Fitness Level 359
- Controversy:** Eating Disorders and Society 362

Chapter Ten

Food Technology and Food Safety 371

- Food Additives 371
 - Regulations Governing Additives 372
 - Antimicrobial Agents 374
 - Antioxidants 375
 - Artificial Colors 376
 - Artificial Flavors and Flavor Enhancers 377
 - Nutrient Additives 378
 - Radiation 378
 - Incidental Food Additives 380
- Pesticides 380
- Contaminants in Foods 384
- Food Processing and Nutrient Density 388

Chapter Eleven

Mother and Newborn Infant 419

- Pregnancy: The Impact of Nutrition on the Future 419
 - Implantation and Embryonic Development 420
 - Maternal Physiological Adjustments 422
 - Nutrient Needs 423
 - Eating Pattern and Weight Gain 425
 - Practices to Avoid 427
 - Troubleshooting 428
 - Preparing for Breastfeeding 429
- Breastfeeding: The Mother's Nutrition Needs 430
- Feeding the Infant 432
 - Nutrient Needs 433
 - Breastfeeding 435
 - Formula Feeding 439
 - Weaning to Milk 442
 - First Foods 443
 - Looking Ahead 448
- Consumer Box:** Supplements for the Infant 437
- Controversy:** Drinking during Pregnancy 453

Chapter Twelve

Child and Teen 457

- Growth Trends 457
- The Early Years 458
 - Growth and Nutrient Needs 459
 - The Effects of Nutrient Deficiencies on Behavior 462
 - Nutrition at School 464
 - Television's Influence on Nutrition 466
 - Food Allergies 467
 - Hyperactivity and Diet 469
 - Looking Ahead 471
- The Teen Years 473
 - Growth and Nutrient Needs 473
 - Nutrition and the Menstrual Cycle 476
 - Teenage Pregnancy 479
 - Eating Patterns and Food Choices 482
- Consumer Box:** Acne 474

Contents

- Consumer Box:** Oral Contraceptives 478
Consumer Box: Nutrition and Premenstrual Syndrome 480
Controversy: Alcohol and Nutrition 489

Chapter Thirteen

Adulthood and the Later Years 499

- Nutrition and Disease Prevention 500
The Aging Process 503
 Aging of Cells 504
 Aging of Systems 505
 Can Aging Be Prevented? 508
Nutrition Needs of Older Adults 509
 Energy 510
 Nutrients 511
The Effects of Drugs on Nutrients 515
Sources of Assistance 519
 Public Programs 519
 Nursing Homes and Day Care 521
Consumer Box: Supplements for the Elderly 512
Controversy: Food, Mood, and Time of Day 527

Chapter Fourteen

Nutrition Status: Domestic and World 537

- The Basics 537
 What Is Hunger? 538
 Prevalence of Malnutrition 539
Hunger in the United States 542
 The Past 542

- The Present 544
 Causes of Hunger in the United States 545
 Toward a Solution 546
World Hunger 546
 Causes and Dimensions 547
 Colonialism 547
 Overpopulation 550
 Distribution of Resources/Land Reform 551
 Food for Profit 553
 Toward a Solution 554
 Personal Action 558

- Consumer Box:** Routes to Involvement 565
Controversy: Must the Rainforest Die for Fast Food? 568

Appendixes

- A Table of Food Composition 576
B Recommended Nutrient Intakes for Canadians 667
C Aids to Calculation 671
D Vitamin/Mineral Supplements Compared 673
E Food Exchange Systems 679
F Nutrition Resources 695
G Supplementary Glossary 701
H Self-Study Forms 703
I Summary of Digestion and Absorption 713
