Introduction	1
1 Social media: Why they matter and what they can do	9
1.1 What are social media?	12
1.1.1 Defining social media	12
1.1.2 What social media are	13
1.1.3 Social media platforms and their popularity	15
1.1.4 What social media are not	15
1.2 The history of social media	16
1.2.1 From ARPANET to the World Wide Web	16
1.2.2 Web 2.0	17
1.2.3 Smartphones and apps	18
1.3 Social media as an influential force in the world	18
1.3.1 Social media and politics: The Arab Spring, #blacklivesmatter and beyond	19
1.3.2 Social media and campaigning: Nonprofits to human rights to health	22
1.3.3 Social media and business: Profits, losses and lives	23
1.4 Social media in education, research and digital scholarship	24
1.4.1 Social media in practice in the research environment	25
1.4.2 Social media in practice in teaching and learning	27
1.4.3 Social media in practice in think tanks and research bodies	28
1.4.4 Reflections on the individual benefits of social media for researchers	29
1.4.5 Critical reflections on social media in academia and research settings	31
1.5 Conclusion	35
1.6 Further Reading	36

2	Social media and the Research Lifecycle	37
2.1	Models for understanding the research environment	39
2.1.1	Model one: The linear model of communication	39
2.1.2	Model two: The convergence model of communication	41
2.1.3	Model three: The Digital Scholar	42
2.2	The Research Lifecycle: An inclusive framework	43
2.2.1	Inspiration	47
2.2.2	Collaboration	50
2.2.3	Primary Research process	53
2.2.4	Dissemination	56
2.2.5	Public engagement/outreach	61
2.2.6	Impact	64
2.3	Conclusion	67
2.4	Further reading	68
3	Creating and sharing blog posts	70
3.1	What is a blog? Defining blogs	71
3.1.1	Differences between blogs and websites	74
3.1.2	Differences between blogs and journal articles	77
3.2	History of blogs and blogging: From pamphlets to Orwell – blogging’s antecedents	80
3.3	Why blogging is useful across the Research Lifecycle	83
3.3.1	Blogs can be inspiring	84
3.3.2	Blogs can have policy impacts	84
3.3.3	Blogs can influence the media	85
3.3.4	Blogs can highlight your research	85
3.4	How to create and maintain successful blogs and blog posts	92
3.4.1	Different types of blog and blog post	92
3.4.2	Tools for making successful blogs	98
3.5	Sharing your blog posts on social media	107
3.5.1	Sharing blog posts through social media channels	108
3.5.2	Sharing blog posts by targeted emails	110
3.5.3	Sharing blog posts in the ‘real world’	111
3.6	Considerations	111
3.7	Further reading	112
4	Creating and sharing infographics and data visualisations	113
4.1	Defining infographics and data visualisations	115
4.2	Infographics and data visualisations: A history in research communication	117

4.2.1	William Playfair invents line, bar and pie charts	117
4.2.2	Charles Booth's poverty maps change the way we understand demographics in London	119
4.2.3	Vienna's Isotype brings 'dead statistics' to life	120
4.2.4	Internet + open data = infographics overload	121
4.3	Why infographics and data visualisations are useful across the Research Lifecycle	124
4.3.1	Infographics and data visualisations can help make policy impacts	126
4.3.2	Infographics and data visualisations can provide evidence-based arguments to challenge dominant media rhetoric	127
4.3.3	Infographics and data visualisations can transcend language barriers to help spread vital information	129
4.3.4	Infographics and data visualisations can make sense of multiple unwieldy open datasets	130
4.4	How you can create successful infographics and data visualisations for your project	133
4.4.1	The questions to ask before you create anything	133
4.4.2	Different types of data visualisations and infographics for you to design	135
4.4.3	Tools for making your own infographics and data visualisations	145
4.4.4	Checklist: Are you ready to share?	151
4.5	Sharing your infographics and data visualisations on social media	152
4.5.1	Sharing infographics and data visualisations through blogs	152
4.5.2	Sharing infographics and data visualisations through social media channels	153
4.5.3	Sharing infographics and data visualisations in the 'real world'	155
4.5.4	Sharing infographics and data visualisations through targeted emails	156
4.6	Considerations	157
4.7	Further reading	157
5	Creating and sharing audio and podcasts	159
5.1	Defining podcasts	161
5.2	A recent history of podcasts	162
5.2.1	Podcasts go mainstream	162
5.2.2	What drives the popularity of podcasts?	164
5.2.3	Academic soundscapes	165

5.3	Why podcasting is useful across the Research Lifecycle	168
5.3.1	Podcasting helps you reach wider audiences	169
5.3.2	No topic is too niche: Riding out the long tail	171
5.3.3	Podcasting fits easily into the Research Lifecycle	173
5.3.4	Podcasts are research	174
5.3.5	Podcasting can be cheap and easy to make	176
5.4	How to create a successful podcast series	177
5.4.1	The questions to ask before you record anything	177
5.4.2	Different types of podcast	179
5.4.3	Hiring a professional to create your podcasts	187
5.4.4	Tools for making your own podcasts	188
5.5	Sharing your podcasts on audio platforms and social media	191
5.5.1	Sharing podcasts on audio platforms	192
5.5.2	Sharing podcasts through social media channels	192
5.5.3	Sharing podcasts through blogs	195
5.5.4	Sharing podcasts in the ‘real world’	195
5.5.5	Sharing podcasts through targeted emails	196
5.6	Considerations	196
5.7	Further reading	198
6	Creating and sharing photos and videos on social media	199
6.1	Defining photos and videos on social media	201
6.2	Photos and videos: A history in research communication	203
6.2.1	Social documentary photography: From Victorian London to going viral on Facebook	203
6.2.2	Dorothea Lange’s Dust Bowl photographs define an era and inspire today’s Pinterest users	206
6.2.3	Photos and videos in science communication: Iconic NASA moon landings to Instagramming astronauts	209
6.3	Why photos and videos on social media are useful across the Research Lifecycle	214
6.3.1	Photos and videos on social media can help academic discussions become more accessible and useful to the public	214
6.3.2	Photos and videos can challenge entrenched researcher–participant barriers	216
6.3.3	Photos and videos on social media can extend the life, value and impact of your research	218
6.3.4	Photos and videos on social media can help charities raise money and awareness	220

6.4	How to create successful photos and videos for social media	222
6.4.1	The questions to ask before you create anything	222
6.4.2	Different types of photo	225
6.4.3	Different types of video	229
6.4.4	Tools for making your own digital photos and videos for social media	233
6.5	Sharing your photos and videos on social media	238
6.5.1	Sharing photos and videos through social media channels	238
6.5.2	Sharing photos and videos through blogs	242
6.5.3	Sharing photos and videos in the ‘real world’	243
6.5.4	Sharing photos and videos through targeted emails	243
6.6	Considerations	244
6.7	Further reading	245

7 Digital strategies for research dissemination, engagement and impact **246**

7.1	Crafting a coherent social media strategy	247
7.1.1	What are you looking to get out of online activities?	249
7.1.2	Audience mapping	252
7.1.3	Trends in social media platforms and dealing with ‘context collapse’	254
7.1.4	Online listening as a deliberate social media strategy	258
7.2	Measuring dissemination, engagement and impact	260
7.2.1	Overview of measuring social media in research settings	261
7.2.2	Qualitative and quantitative indicators	263
7.2.3	What funders want	265
7.3	Navigating the risks of online visibility	267
7.4	Conclusions	270
7.5	Further reading	271
