Preface	ix
1 Preliminaries	1
1.1 Inequalities for eigenvalues and singular numbers	1
1.2 Inequalities for convex functions	3
1.3 Perturbations of entire Banach valued functions	4
1.4 Functions defined on quasi-normed spaces	5
1.5 Upper bounds for Weierstrass factors	7
1.6 Lower bounds for Weierstrass factors	10
1.7 Perturbations of determinants of finite dimensional operators	13
1.8 Proof of Theorem 1.7.1	15
1.9 Matrices with dominant principal diagonals	16
1.10 Additional inequalities for determinants of matrices	17
1.11 Comments to Chapter 1	19
2 Determinants of Schatten-von Neumann Operators	21
2.1 Schatten-von Neumann ideals	21
2.2 Examples of Hilbert-Schmidt and nuclear operators	23
2.2.1 Infinite matrices	23
2.2.2 Integral operators	25
2.3 The characteristic determinant of a nuclear operator	27
2.4 Regularized determinants of Schatten-von Neumann operators	30
2.5 Upper bounds for regularized determinants	31
2.6 Lower bounds for regularized determinants	34
2.7 Perturbations of determinants of Schatten-von Neumann oper- ators	35
2.8 Invertibility of infinite matrices	38
2.9 Comments to Chapter 2	39
3 Determinants of Nakano Operators	41
3.1 Nakano type operators	41
3.2 Bounds for eigenvalues of Nakano operators	45
3.3 Dual Nakano sets	49

3.4	Upper bounds for determinants of Nakano operators	52
3.5	Lower bounds for determinants of Nakano operators	55
3.6	Comments to Chapter 3	57
4	Determinants of Orlicz Type Operators	59
4.1	The Orlicz type operators	59
4.2	Upper bounds for determinants of Orlicz type operators . . .	61
4.3	Lower bounds for determinants of Orlicz type operators . . .	62
4.4	Comments to Chapter 4	63
5	Determinants of p-summing Operators	65
5.1	Definitions and preliminaries	65
5.2	Regularized determinants in quasi-normed ideals	67
5.3	Perturbations of operators from Γ_p	70
5.4	p -summing operators	72
5.5	Hille-Tamarkin integral operators in L^p	73
5.6	Hille-Tamarkin infinite matrices in l^p	74
5.7	Comments to Chapter 5	75
6	Multiplicative Representations of Resolvents	77
6.1	Representations of resolvents in a Euclidean space	77
6.1.1	The first multiplicative representation for resolvents	77
6.1.2	The second representation for resolvents	82
6.2	Triangular representations of compact operators	84
6.3	Representations for resolvents of compact operators	86
6.3.1	Operators with complete systems of root vectors	86
6.3.2	Multiplicative integrals	87
6.3.3	The resolvent of a Volterra operator	88
6.3.4	General compact operators	90
6.4	Formulas for determinants and resolvents of nuclear operators	92
6.5	Comments to Chapter 6	93
7	Inequalities Between Determinants and Inverse Operators	95
7.1	Inequalities for finite dimensional operators	95
7.1.1	The first inequality	95
7.1.2	Proof of Theorem 7.1.1	96
7.1.3	Auxiliary results	97
7.1.4	The second inequality	100
7.2	Nuclear operators	102
7.3	Carleman's inequality for Hilbert-Schmidt operators	105
7.4	Carleman's type inequalities for Schatten-von Neumann operators	111

7.4.1	The general case	111
7.4.2	Normal Schatten-von Neumann operators	115
7.5	Positive invertibility of infinite matrices	117
7.6	Comments to Chapter 7	118
8	Bounds for Eigenvalues and Determinants via Self-Commutators	
	121	
8.1	Series of eigenvalues	121
8.2	Proof of Theorem 8.1.1	122
8.3	Partial sums of eigenvalues	125
8.4	Proof of Theorem 8.3.1	125
8.5	Estimates for determinants via self-commutators	128
8.6	Bounds for determinants via Hermitian components	128
8.7	Proof of Theorem 8.6.1	129
8.8	A sharp bound for the self-commutator	130
	8.8.1 Statement of the result	130
	8.8.2 Proof of Theorem 8.8.1	132
8.9	Comments to Chapter 8	133
9	Spectral Variations of Compact Operators in a Hilbert Space	135
9.1	Estimates for resolvents of finite dimensional operators	135
9.2	Proof of Theorem 9.1.2	136
9.3	Resolvents of Hilbert-Schmidt operators	139
9.4	Resolvents of Schatten-von Neumann operators	141
9.5	Spectral variations of operators in a Banach space	142
9.6	Perturbations of finite dimensional operators	143
	9.6.1 Application of Lemma 9.5.1	143
	9.6.2 Application of the Hadamard inequality	145
9.7	Spectral variations of compact operators	148
9.8	An additional identity for resolvents	150
9.9	Eigenvectors of perturbed operators	154
9.10	Comments to Chapter 9	156
10	Discrete Spectra of Compactly Perturbed Normal Opera-	
	tors	159
10.1	The counting function	159
10.2	Proof of Theorem 10.1.1	161
10.3	Eigenvalues in different domains	164
10.4	Jacobi operators	167
10.5	Operators in a Banach space	168
10.6	Comments to Chapter 10	169

11	Perturbations of Non-Normal Noncompact Operators	171
11.1	Operators with Hilbert-Schmidt components	171
11.2	Proof of Theorem 11.1.1	173
11.2.1	Maximal chains	173
11.2.2	Diagonal and nilpotent parts	176
11.3	Interpolation in the scale of Schatten-von Neumann operators	178
11.4	Inequalities between components of quasi-nilpotent operators	181
11.5	Operators with Schatten-von Neumann Hermitian components	184
11.6	Operators close to unitary ones	186
11.7	Proofs of Theorem 11.6.1	187
11.7.1	The first proof	187
11.7.2	The second proof	188
11.8	Comments to Chapter 11	190
12	Operators on Tensor Products of Euclidean Spaces and Matrix Equations	191
12.1	Preliminaries	192
12.2	Simultaneously triangularizable operators	195
12.3	Linear matrix equations	196
12.4	Perturbations of matrix equations	199
12.5	Differentiability of solutions to matrix equations with a parameter	201
12.6	Bounds for determinants of bilinear operators close to triangular ones	203
12.7	Perturbations of invariant subspaces of matrices	205
12.8	Comments to Chapter 12	207
13	Two-Parameter Matrix Eigenvalue Problems	209
13.1	Statement of the result	209
13.2	Proof of Theorem 13.1.1	211
13.3	A bound for the spectral radius of $\tilde{K}_0^{-1}K_j$	213
13.4	Comments to Chapter 13	214
	Bibliography	215
	List of Symbols	221
	Index	223
