Preface	xv	2.8 Plate Tectonics and the Generation of Rocks	30
Acknowledgments to First Edition	xviii	2.8.1 Midocean-ridge Rock Factory	30
Acknowledgments to Second Edition	xix	2.8.2 Convergent-plate-boundary Rock Factory	30
1		2.8.3 Continental Divergent-plate-boundary Rock Factory (Rift Valley)	32
Introduction	1	2.8.4 Mantle Plume Hot-spot Rock Factory	32
1.1 Formation of Earth's Chemical Elements in Supernovae	2	2.8.5 Passive-margin Rock Factories	32
1.2 Birth of the Solar System and Earth	2	2.8.6 Epeiric-sea Rock Factories	32
1.3 Accretion and Early History of the Earth	5	2.8.7 Metamorphic Rock Factories	33
1.4 Internal Structure of the Earth	5	Summary	33
1.5 Cooling of the Planet and Plate Tectonics	6	Review Questions	34
1.6 Plate Tectonics and the Formation of Rocks	7	Online Resources	35
1.6.1 Divergent Plate Boundaries	8	Further Reading	35
1.6.2 Convergent Plate Boundaries	9	3	
1.6.3 Transform Boundaries	9	How Are Minerals Identified?	37
1.6.4 Mantle Plumes and Hot Spots	9	3.1 Habit	38
1.7 Outline of Subsequent Chapters	9	3.2 State of Aggregation	39
Summary	10	3.3 Color and Luster	40
Review Questions	11	3.3.1 Reasons for Color	43
Online Resources	11	3.4 Cleavage	47
Further Reading	11	3.5 Hardness	49
2		3.6 Specific Gravity (Relative Density)	50
Materials of the Solid Earth	13	3.6.1 Specific Gravity and Atomic Structure	51
2.1 Definition of a Mineral	14	3.7 Magnetism, Solubility in Acid, and Radioactivity	51
2.1.1 Examples of Some Familiar Minerals	15	3.8 Instrumental Methods for the Quantitative Characterization of Minerals	52
2.2 How Are Minerals Classified?	18	3.8.1 X-Ray Powder Diffraction	53
2.3 How Are Minerals Named?	19	3.8.2 Electron Beam Techniques: Scanning Electron Microscopy, Electron Microprobe Analysis, and Transmission Electron Microscopy	54
2.4 What Is a Crystal, and What Is the Crystalline State?	20	Summary	58
2.5 What Is a Rock?	21	Review Questions	58
2.6 How Do Rocks Form? Classification into Igneous, Sedimentary, and Metamorphic	23	Further Reading	59
2.7 Examples of Some Familiar Rocks	25		

4

Fundamentals of Crystal Structures	61
4.1 Naturally Occurring Chemical Elements	62
4.2 Atomic and Ionic Radii	62
4.3 What Factors Control the Packing of Ions (and Atoms) in Mineral Structures?	65
4.4 Pauling's Rules	66
4.5 What Forces Hold Crystal Structures Together?	73
4.5.1 Electronic Configuration of Atoms and Ions	74
4.5.2 Chemical Bonding	75
4.6 Atomic Substitutions	79
4.6.1 Factors Responsible for the Extent of Atomic Substitution (Solid Solution)	79
4.6.2 Types of Solid Solution	82
Summary	82
Review Questions	84
Further Reading	85

5

Introduction to Crystallography	87
5.1 Symmetry Elements and Operations	89
5.2 Combinations of Symmetry Elements	90
5.3 The Six Crystal Systems	91
5.3.1 Crystallographic Axes	91
5.3.2 Hermann–Mauguin Symmetry Notation	91
5.3.3 Crystallographic Notation for Planes in Crystals	93
5.3.4 Definition of Crystal Form	96
5.3.5 Crystallographic Notation for Directions in Crystals	98
5.4 Crystal Projections	98
5.5 Seven of the Thirty-two Point Groups	101
5.6 Twins	112
5.7 Some Aspects of Space Groups	115
5.7.1 Space Groups	119
5.8 Polymorphism	122
Summary	131
Review Questions	132
Further Reading	133

6

Minerals and Rocks Observed under the Polarizing Optical Microscope	135
6.1 Light and the Polarizing Microscope	136
6.2 Passage of Light through a Crystal: Refractive Index and Angle of Refraction	138

6.3 Passage of Polarized Light through Minerals	139
6.4 Accessory Plates and Determination of Fast and Slow Vibration Directions	143
6.5 Extinction Positions and the Sign of Elongation	144
6.6 Anomalous Interference Colors, Pleochroism, and Absorption	144
6.7 Mineral Identification Chart	145
6.8 Uniaxial Optical Indicatrix	146
6.9 Biaxial Optical Indicatrix	148
6.10 Uniaxial Interference Figures	149
6.11 Determination of Optic Sign from Uniaxial Optic Axis Figure	151
6.12 Biaxial Interference Figures, Optic Sign, and Optic Angle (2V)	151
6.13 Modal analysis	153
Summary	154
Review Questions	156
Online Resources	157
Further Reading	157

7

Igneous Rock-forming Minerals	159
7.1 Common Chemical Elements in the Earth's Crust and in Mineral and Rock Analyses	160
7.2 Calculation of Mineral Formulas	161
7.3 Triangular Diagrams	163
7.4 Systematic Mineralogical Descriptions of Common Igneous Minerals	164
7.5 Plagioclase Feldspar	166
7.6 K-Feldspar	168
7.7 Quartz and Silica Polymorphs	169
7.8 Nepheline	170
7.9 Leucite	171
7.10 Sodalite	172
7.11 Enstatite	173
7.12 Pigeonite	173
7.13 Augite	175
7.14 Aegirine	176
7.15 Hornblende	177
7.16 Muscovite	178
7.17 Phlogopite	179
7.18 Biotite	180
7.19 Olivine	182
7.20 Zircon	182
7.21 Tourmaline	183
7.22 Allanite	184

7.23	Melilite	185	8.10	Rates of Geologic Processes	225
7.24	Magnetite	185	8.10.1	Transport Laws	226
7.25	Chromite	186	8.10.2	Rates of Activated Processes and the Arrhenius Relation	227
7.26	Hematite	187	8.11	Radioactive Decay	229
7.27	Ilmenite	187	8.11.1	Rate of Radioactive Decay	230
7.28	Rutile	189	8.11.2	Calculation of Absolute Age Based on Radioactive Decay	230
7.29	Uraninite	189	8.11.3	Absolute Dating by the ^{87}Rb to ^{87}Sr Decay	231
7.30	Pyrite	190	8.11.4	Absolute Dating by the ^{40}K to ^{40}Ar Decay	232
7.31	Pyrrhotite	191	8.11.5	Absolute Dating Using Uranium and Lead	233
7.32	Chalcopyrite	192	8.11.6	Absolute Dating by the ^{147}Sm to ^{143}Nd Decay	234
7.33	Apatite	192	8.11.7	Blocking Temperature	234
	Summary	193	8.11.8	Absolute Dating by the Fission-track Method	234
	Review Questions	194		Summary	235
	Further Reading	195		Review Questions	237

8

The Direction and Rate of Natural Processes: An Introduction to Thermodynamics and Kinetics

8.1	Basic Thermodynamic Terms	198
8.2	Heat, Work, and the First Law of Thermodynamics	200
8.3	Entropy and the Second and Third Laws of Thermodynamics	202
8.4	Gibbs Free Energy	203
8.5	Variation of Gibbs Free Energy with Temperature and Pressure	205
8.6	Variation of Gibbs Free Energy with Composition	206
8.7	Thermodynamic Equilibrium	207
8.8	Thermodynamic Phase Diagrams	207
8.9	Multicomponent Phase Diagrams	208
8.9.1	A Simple Two-component System H_2O – NaCl	208
8.9.2	Melting of a Pair of Minerals: the Eutectic	210
8.9.3	Congruent Melting and the Granite and Nepheline Syenite Eutectics	214
8.9.4	Incongruent Melting and the Peritectic	214
8.9.5	Melting Relations of Solid Solutions	217
8.9.6	A Simple Ternary Phase Diagram	220
8.9.7	The Ternary Quartz–Albite–Orthoclase “Granite” System	223
8.9.8	A Simple Ternary Basalt System: Diopside–Albite–Anorthite	224
8.9.9	More Complex Phase Diagrams	225

9

How Do Igneous Rocks Form?

9.1	Why, and How, Does Solid Rock Become Molten?	242
9.1.1	Composition of the Upper Mantle	243
9.1.2	Melting Range of Upper Mantle Peridotite	244
9.1.3	Latent Heat of Fusion	245
9.1.4	Geothermal Gradient and the Geotherm	245
9.2	Three Primary Causes of Melting and their Plate Tectonic Settings	245
9.2.1	Raising the Temperature of Mantle Peridotite to the Melting Range over Hot Spots	246
9.2.2	Decompression Melting at Divergent Plate Boundaries	246
9.2.3	Fluxing with Water at Convergent Plate Boundaries (Subduction Zones)	246
9.3	Effect of Pressure on Melting	248
9.3.1	Pressure in the Earth	249
9.3.2	Effect of Pressure on the Anhydrous Melting of Rock	249

9.3.3	Hydrous Melting of Rock and the Solubility of Water in Magma	250
9.3.4	Effect of Water Undersaturation on the Melting of Rocks	251
9.3.5	Solubility of Other Gases in Magma	251
9.3.6	Exsolution of Magmatic Gases and Explosive Volcanism	251
9.4	Physical Properties of Magma	256
9.4.1	Magma Density	256
9.4.2	Magma Viscosity	256
9.4.3	Diffusion in Magma, Crystal Growth, and Grain Size of Igneous Rocks	258
9.5	Magma Ascent	260
9.5.1	Buoyancy	260
9.5.2	Buoyant Rise of Magma	261
9.6	Processes Associated with the Solidification of Magma in the Crust	262
9.6.1	Cooling of Bodies of Magma by Heat Conduction	262
9.6.2	Cooling of Bodies of Magma by Convection and Radiation	266
9.6.3	Magmatic Differentiation by Crystal Settling	266
9.6.4	Compaction of Crystal Mush	270
9.6.5	Assimilation and Fractional Crystallization	270
9.6.6	Liquid Immiscibility	271
9.7	Evolution of Isotopic Reservoirs in the Earth and the Source of Magma	272
9.7.1	Evolution of $^{143}\text{Nd}/^{144}\text{Nd}$ Reservoirs in the Bulk Earth, Mantle, and Crust	272
9.7.2	Evolution of $^{87}\text{Sr}/^{86}\text{Sr}$ Reservoirs in the Bulk Earth, Mantle, and Crust	273
	Summary	274
	Review Questions	275
	Online Resources	276
	Further Reading	277

10

Igneous Rocks: Their Mode of Occurrence, Classification, and Plate Tectonic Setting 279

10.1	Why an Igneous Rock Classification Is Necessary	280
10.2	Mode of Occurrence of Igneous Rocks	280
10.2.1	Shallow Intrusive Igneous Bodies: Dikes, Sills, Laccoliths, Cone Sheets, Ring Dikes, and Diatremes	280

10.2.2	Plutonic Igneous Bodies: Lopoliths, Batholiths, and Stocks	284
10.2.3	Extrusive Igneous Bodies: Flood Basalts, Shield Volcanoes, Composite Volcanoes, Domes, Calderas, Ash-fall and Ash-flow Deposits	288
10.3	International Union of Geological Sciences Classification of Igneous Rocks	301
10.3.1	Mode and Norm	301
10.3.2	IUGS Classification of Igneous Rocks	301
10.3.3	Composition of Common Plutonic Igneous Rocks	305
10.3.4	IUGS Classification of Volcanic Igneous Rocks	308
10.3.5	Irvine–Baragar Classification of Volcanic Rocks	308
10.4	Igneous Rocks and their Plate Tectonic Setting	310
10.4.1	Igneous Rocks Formed at Mid-ocean-ridge Divergent Plate Boundaries	310
10.4.2	Igneous Rocks of Oceanic Islands Formed above Hot Spots	313
10.4.3	Continental Flood Basalts and Large Igneous Provinces	314
10.4.4	Alkaline Igneous Rocks Associated with Continental Rift Valleys	315
10.4.5	Igneous Rocks Formed near Convergent Plate Boundaries	318
10.5	Special Precambrian Associations	323
10.5.1	Komatiites	324
10.5.2	Massif-type Anorthosites	324
10.5.3	Rocks Associated with Large Meteorite Impacts	326
	Summary	329
	Review Questions	330
	Online Resources	331
	Further Reading	331

11

Sedimentary Rock-forming Minerals and Materials 333

11.1	The Interaction of the Earth's Atmosphere with Minerals	334
11.2	Ice	335
11.3	Goethite	336
11.4	Kaolinite	337
11.5	Calcite	338

11.6	Aragonite	339
11.7	Dolomite	341
11.8	Magnesite	341
11.9	Siderite	343
11.10	Rhodochrosite	343
11.11	Halite	343
11.12	Sylvite	344
11.13	Gypsum	344
11.14	Anhydrite	345
11.15	Chert and agate	346
11.16	Phosphorite	346
11.17	Soil	348
	Summary	350
	Review Questions	351
	Further Reading	351
12 Formation, Transport, and Lithification of Sediment 353		
12.1	Importance of Sediments in Understanding the History of the Earth	354
12.2	Sediment Formed from Weathering of Rock	355
12.2.1	Role of Carbon Dioxide in Weathering	355
12.2.2	Weathering Products of Rock	356
12.2.3	Detrital Grain Size	358
12.2.4	Detrital Grain Roundness and Resistance to Abrasion	358
12.3	Organically Produced Sediment	360
12.3.1	Formation of Carbonate and Siliceous Sediment	360
12.3.2	Formation of Hydrocarbons in Sediment	363
12.4	Chemically Produced Sediment	363
12.5	Sediment Produced by Glacial Erosion	364
12.6	Transport of Sediment	366
12.6.1	Laminar and Turbulent Flow	366
12.6.2	Movement of Particles by Fluid Flow	367
12.6.3	Movement of Particles in Turbidity Currents	370
12.6.4	Movement of Sediment in Debris Flows	371
12.7	Layering in Sediments and Sedimentary Rocks	372
12.7.1	Law of Superposition	372
12.7.2	Milankovitch Cycles	373

12.7.3	Sediments Related to Tectonic Processes	374
12.8	Sites of Deposition and Tectonic Significance	375
12.8.1	Convergent Plate Boundaries	375
12.8.2	Passive Continental Margins	376
12.8.3	Rift and Pull-apart Basins	376
12.9	Conversion of Unconsolidated Sediment to Sedimentary Rock: Lithification	377
12.9.1	Porosity and Compaction	378
12.9.2	Cementation of Sediment	378
12.9.3	Pressure Solution	378
12.9.4	Recrystallization, Replacement, Dolomitization	380
	Summary	380
	Review Questions	381
	Online Resources	382
	Further Reading	383

13

Sedimentary Rock Classification, Occurrence, and Plate Tectonic Significance		385
13.1	Siliciclastic Sedimentary Rocks	386
13.1.1	Mudrocks (Includes Shales)	386
13.1.2	Sandstones	390
13.1.3	Conglomerates and Breccias	396
13.2	Carbonate Sedimentary Rocks	399
13.2.1	Limestones	399
13.2.2	Dolostones	407
13.2.3	Tectonic Settings of Carbonate Rocks	407
13.3	Coals	408
13.4	Oil and Natural Gas	409
13.5	Evaporites	410
13.6	Phosphorites	410
13.7	Iron-formations	410
	Summary	411
	Review Questions	412
	Online Resources	413
	Further Reading	413

14

Metamorphic Rock-forming Minerals		415
14.1	Systematic Mineralogical Descriptions of Common Metamorphic Minerals	416
14.2	Garnet	416
14.3	Andalusite	418

14.4	Sillimanite	419	15.5	Simple Descriptive Classification of Metamorphic Rocks	455
14.5	Kyanite	419	15.6	Metamorphism of Mudrock	455
14.6	Staurolite	419	15.6.1	Graphical Representation of a Simple Metamorphic Reaction	456
14.7	Diopside	420	15.6.2	A Simple Pressure–Temperature Petrogenetic Grid	457
14.8	Anthophyllite	420	15.6.3	Metamorphic Field Gradients	458
14.9	Cummingtonite–Grunerite	421	15.6.4	Graphical Representation of Mineral Assemblages in Metapelites	458
14.10	Tremolite–Ferroactinolite	422	15.6.5	Mineral Assemblages in Barrow’s Metamorphic Zones and Part of the Petrogenetic Grid for Metapelites	460
14.11	Glaucophanite	422	15.7	Metamorphism of Impure Dolomitic Limestone	462
14.12	Wollastonite	423	15.8	Metamorphism and Partial Melting: Migmatites	466
14.13	Rhodonite	424	15.9	Geothermometers and Geobarometers	467
14.14	Talc	424	15.10	Plate Tectonic Significance of Metamorphism	468
14.15	Chlorite	425	15.10.1	Pressure–Temperature–Time (P – T – t) Paths	469
14.16	Antigorite	425	15.10.2	Plate Tectonic Setting of Metamorphic Facies	470
14.17	Chrysotile	426	Summary	472	
14.18	Graphite	428	Review Questions	474	
14.19	Epidote and Clinozoisite	429	Further Reading	475	
14.20	Cordierite	429			
14.21	Vesuvianite	430			
14.22	Titanite (Sphene)	431			
14.23	Scapolite	431			
14.24	Lawsonite	432			
14.25	Pumpellyite	432			
14.26	Topaz	433			
14.27	Corundum	433			
14.28	Chabazite	435			
Summary		436			
Review Questions		437			
Further Reading		437			
15			16		
Metamorphic Rocks		439	Some Economic Minerals, Mainly from Veins and Pegmatites	477	
15.1	What Changes Occur during Metamorphism?	440	16.1	Gold	478
15.1.1	An Example of Metamorphic Change	440	16.2	Silver	479
15.2	Why Do Rocks Change?	442	16.3	Copper	480
15.2.1	The Gibbs Free Energy, the Driving Force for Metamorphic Change	442	16.4	Diamond	480
15.2.2	Rates of Metamorphic Reactions	443	16.5	Sulfur	481
15.2.3	Gibbs Phase Rule and the Number of Minerals a Metamorphic Rock Can Contain	443	16.6	Galena	482
15.3	Metamorphic Grade and Facies	444	16.7	Sphalerite	483
15.4	Textures of Metamorphic Rocks	446	16.8	Bornite	484
15.4.1	Textures of Contact Metamorphic Rocks	448	16.9	Chalcocite	485
15.4.2	Deformation and Textures of Regional Metamorphic Rocks	448	16.10	Marcasite	485
			16.11	Molybdenite	486
			16.12	Arsenopyrite	487
			16.13	Bauxite	488
			16.14	Fluorite	489
			16.15	Barite	489

16.16	Spodumene	490	18.2	Soils and Human Health	524
16.17	Lepidolite	491	18.2.1	What Constitutes a Fertile Soil?	524
16.18	Several Gem Minerals	491	18.2.2	Increasing Crop Production from Agricultural Land, and Soil Depletion	525
	Summary	494	18.2.3	The Need for Fertilizers	526
	Review Questions	496	18.3	Carcinogenic and Chemical Hazards Posed by Earth Materials	528
	Further Reading	497	18.3.1	Erionite	528

17

Some Selected Earth Materials Resources 499

17.1	Construction Materials	500	18.3.2	Asbestos Minerals	528
17.1.1	Building Stones	501	18.3.3	Silica Minerals	530
17.1.2	Bricks, Cement, and Concrete	502	18.3.4	Arsenic, an Example of a Chemically Hazardous Earth Material	530
17.1.3	Crushed Stone, Sand, and Gravel	504	18.3.5	Health Hazards Due to Radioactivity	531
17.2	Iron Ore	504	18.3.6	Carbon Sequestration to Mitigate Climate Change	533
17.3	Clay Minerals	505	18.4	Hazards from Volcanic Eruptions	533
17.4	Copper Ore	507	18.4.1	Monitoring Active Volcanoes	535
17.5	Lithium Ore	509	18.4.2	Lahars	536
17.6	Rare Earth Elements	509	18.5	Tsunamis	536
17.7	Zeolites	510	18.6	Ejecta from Meteorite Impacts	537
17.8	Energy Resources	510		Summary	538
17.8.1	Oil, Natural Gas, and Coal Reserves	511		Review Questions	540
17.8.2	Shale Gas and Hydraulic Fracturing	512		Online Resources	541
17.8.3	Nuclear Energy	516		Further Reading	541
17.8.4	Geothermal Energy	516		Glossary	543
	Summary	517		Minerals and Varieties	571
	Review Questions	519		Common Igneous, Sedimentary, and Metamorphic Rocks	573
	Online Resources	520		Common Units of Measure	575
	Further Reading	520		Index	577
