

CONTENTS

CONTRIBUTORS	vii	
PREFACE	ix	
1	Introduction to Quality Assurance—Joan H. Howanitz, M.D., and Peter J. Howanitz, M.D.	1
2	The Statistics of Quality Control—Irwin M. Weisbrot, M.D.	20
3	General Principles of Patient Preparation and Specimen Handling—Edward P. Fody, M.D.	55
4	General Aspects of Laboratory Quality Assurance—Steven J. Steindel, Ph.D.	80
5	Manufacture of Quality Control Materials—Richard S. Thuma, Joseph L. Giegel, Ph.D., and Alan H. Posner, Ph.D.	101
6	Performance Characteristics and Analytic Goals—John W. Ross, M.D., and Noel S. Lawson, M.D.	124
7	Components of Biologic and Analytic Variation—Per Winkel, M.D., Doc. Med. Sci., and Adam Uldall, Ph.D.	166
8	Assessment of Analytic Variability in Clinical Chemistry—John A. Lott, Ph.D., and Suman T. Patel, Ph.D.	185
9	Quality Assurance in Hematology—Paul Bachner, M.D.	214
10	Quality Assurance in Microbiology—Ron B. Schiffman, M.D.	244
11	Quality Control in the Blood Center and Transfusion Service: Current Practices—Herbert F. Polesky, M.D.	270
12	Qualitative and Semiquantitative Tests: Clinical Microscopy, Physician's Office, Bedside, and Self-Performed—Carl E. Speicher, M.D., and Thomas D. Stevenson, M.D.	287
13	Quality Assurance in Anatomic Pathology—Donald W. Penner, M.D.	296
14	Proficiency Testing—John H. Rippey, M.D.	317
15	Laboratory Licensure and Accreditation—John K. Duckworth, M.D.	334

16	Quality Assurance and Laboratory Information Flow— David Chou, M.D., Donald P. Connelly, M.D., Ph.D., and James S. Fine, M.D.	354
17	Future Trends in Laboratory Quality Assurance— Peter J. Howanitz, M.D. and Joan H. Howanitz, M.D.	371
