Preface to the Fourth Edition.....	xv
Preface to the Third Edition	xvii
Preface to the Second Edition.....	xix
Preface to the First Edition	xxi
Authors.....	xxiii
List of Units, Prefixes, and Constants.....	xxv

Chapter 1 An Introduction to Crystal Structures.....	1
1.1 Introduction	1
1.2 Close Packing	2
1.3 Body-Centred and Primitive Structures.....	6
1.4 Symmetry	8
1.4.1 Symmetry Notation.....	9
1.4.2 Axes of Symmetry	9
1.4.3 Planes of Symmetry	10
1.4.4 Inversion.....	11
1.4.5 Inversion Axes and Improper Symmetry Axes and the Identity Element	11
1.4.6 Operations	13
1.4.7 Symmetry in Crystals.....	13
1.5 Lattices and Unit Cells	14
1.5.1 Lattices	14
1.5.2 One- and Two-Dimensional Unit Cells	15
1.5.3 Translational Symmetry Elements	16
1.5.4 Three-Dimensional Lattices and Their Unit Cells.....	18
1.5.5 Miller Indices	23
1.5.6 Interplanar Spacings.....	25
1.5.7 Packing Diagrams	25
1.6 Crystalline Solids	27
1.6.1 Ionic Solids with Formula MX.....	28
1.6.2 Solids with General Formula MX_2	33
1.6.3 Other Important Crystal Structures	37
1.6.4 Ionic Radii	40
1.6.5 Extended Covalent Arrays.....	47
1.6.6 Bonding in Crystals.....	49
1.6.7 Atomic Radii	51
1.6.8 Molecular Structures	51
1.6.9 Silicates	54
1.6.10 Quasicrystals	57

1.7	Lattice Energy	59
1.7.1	Born–Haber Cycle.....	59
1.7.2	Calculating Lattice Energies	61
1.7.3	Calculations Using Thermochemical Cycles and Lattice Energies.....	67
1.8	Conclusion	69
	Questions	70

Chapter 2	Physical Methods for Characterising Solids	75
2.1	Introduction	75
2.2	X-Ray Diffraction.....	75
2.2.1	Generation of X-Rays	75
2.2.2	Diffraction of X-Rays.....	77
2.3	Powder Diffraction	79
2.3.1	Powder Diffraction Patterns.....	79
2.3.2	Absences Due to Lattice Centring	80
2.3.3	Systematic Absences Due to Screw Axes and Glide Planes.....	84
2.3.4	Uses of Powder X-Ray Diffraction.....	86
2.4	Single Crystal X-Ray Diffraction.....	90
2.4.1	Importance of Intensities.....	90
2.4.2	Solving Single Crystal Structures	93
2.4.3	High-Energy X-Ray Diffraction.....	95
2.5	Neutron Diffraction	96
2.5.1	Uses of Neutron Diffraction.....	100
2.6	Electron Microscopy	101
2.6.1	Scanning Electron Microscopy	102
2.6.2	Transmission Electron Microscopy.....	104
2.6.3	Energy Dispersive X-Ray Analysis.....	107
2.6.4	Scanning Transmission Electron Microscopy.....	108
2.6.5	Electron Energy Loss Spectroscopy	108
2.6.6	superSTEM.....	111
2.7	Scanning Probe Microscopy	111
2.7.1	Scanning Tunnelling Microscopy	112
2.8	Atomic Force Microscopy	114
2.9	X-Ray Absorption Spectroscopy	116
2.9.1	Extended X-Ray Absorption Fine Structure	116
2.9.2	X-Ray Absorption Near-Edge Structure and Near-Edge X-Ray Absorption Fine Structure	122
2.10	Solid-State Nuclear Magnetic Resonance Spectroscopy.....	124
2.11	Thermal Analysis	128
2.11.1	Differential Thermal Analysis	128
2.11.2	Thermogravimetric Analysis.....	129
2.11.3	Differential Scanning Calorimetry	130

2.12	Temperature-Programmed Reduction	131
2.13	Other Techniques.....	131
	Questions.....	132
Chapter 3	Synthesis of Solids	137
3.1	Introduction	137
3.2	High-Temperature Ceramic Methods.....	138
3.2.1	Direct Heating of Solids.....	138
3.2.2	Reducing the Particle Size and Lowering the Temperature.....	141
3.3	Microwave Synthesis	145
3.3.1	High-Temperature Superconductor $\text{YBa}_2\text{Cu}_3\text{O}_{7-x}$	146
3.3.2	Batteries and Fuel Cells.....	147
3.3.3	Graphene	147
3.4	Combustion Synthesis	147
3.5	High-Pressure Methods	149
3.5.1	Hydrothermal Methods	149
3.5.2	High-Pressure Gases	153
3.5.3	Hydrostatic Pressures	153
3.5.4	Using Ultrasound.....	155
3.5.5	Detonation	155
3.6	Chemical Vapour Deposition	155
3.6.1	Preparation of Semiconductors	156
3.6.2	Diamond Films.....	157
3.6.3	Optical Fibres	157
3.6.4	Lithium Niobate	158
3.7	Preparing Single Crystals.....	159
3.7.1	Epitaxy Methods	159
3.7.2	Chemical Vapour Transport.....	160
3.7.3	Melt Methods	161
3.7.4	Solution Methods.....	163
3.8	Intercalation.....	164
3.8.1	Graphite Intercalation Compounds	164
3.9	Synthesis of Nanomaterials	166
3.9.1	Top-Down Methods.....	166
3.9.2	Bottom-Up Methods: Manipulating Atoms and Molecules.....	170
3.9.3	Synthesis Using Templates.....	173
3.10	Choosing a Method.....	177
	Questions.....	177
Chapter 4	Solids: Their Bonding and Electronic Properties	179
4.1	Introduction	179
4.2	Bonding in Solids: Free-Electron Theory	179
4.2.1	Electronic Conductivity.....	184

4.3	Bonding in Solids: Molecular Orbital Theory	185
4.3.1	Simple Metals.....	188
4.4	Semiconductors: Si and Ge.....	189
4.4.1	Photoconductivity.....	191
4.4.2	Doped Semiconductors	192
4.4.3	<i>p-n</i> Junction and Field Effect Transistors.....	193
4.5	Bands in Compounds: Gallium Arsenide.....	195
4.6	Bands in d-Block Compounds: Transition Metal Monoxides	196
4.7	Classical Modelling.....	197
4.7.1	Intrinsic Defects in Alkali Halide Crystals.....	197
4.7.2	Zeolites.....	198
4.7.3	Ionic Conductors for Fuel Cells.....	199
	Questions.....	199
Chapter 5	Defects and Nonstoichiometry	201
5.1	Point Defects: An Introduction.....	201
5.2	Defects and Their Concentration.....	201
5.2.1	Intrinsic Defects	201
5.2.2	Concentration of Defects.....	204
5.2.3	Extrinsic Defects	208
5.3	Ionic Conductivity in Solids	208
5.4	Solid Electrolytes.....	214
5.4.1	Fast-Ion Conductors: Silver Ion Conductors.....	214
5.4.2	Fast-Ion Conductors: Oxygen Ion Conductors	218
5.4.3	Fast-Ion Conductors: Sodium Ion Conductors	220
5.5	Applications of Solid Electrolytes.....	223
5.5.1	Batteries.....	224
5.5.2	Fuel Cells.....	229
5.5.3	Oxygen Sensor.....	234
5.5.4	Oxygen Separation Membranes	236
5.5.5	Electrochromic Devices	237
5.6	Colour Centres.....	239
5.7	Nonstoichiometric Compounds	240
5.7.1	Introduction	240
5.7.2	Nonstoichiometry in Wustite (FeO) and MO-Type Oxides	242
5.7.3	Uranium Dioxide.....	246
5.7.4	Titanium Monoxide Structure.....	248
5.8	Extended Defects.....	250
5.8.1	Crystallographic Shear Planes	252
5.8.2	Planar Intergrowths.....	256
5.9	Three-Dimensional Defects	257
5.9.1	Block Structures	257

5.9.2	Pentagonal Columns.....	259
5.9.3	Infinitely Adaptive Structures	260
5.10	Electronic Properties of Nonstoichiometric Oxides.....	260
5.11	Conclusions.....	266
	Questions.....	266
Chapter 6	Microporous and Mesoporous Solids.....	271
6.1	Zeolites	271
6.1.1	Composition and Structure of Zeolites	271
6.1.2	Frameworks	272
6.1.3	Synthesis of Zeolites	275
6.1.4	Zeolite Nomenclature.....	277
6.1.5	Si/Al Ratios in Zeolites	277
6.1.6	Exchangeable Cations	277
6.1.7	Channels and Cavities	278
6.1.8	Structure Determination.....	285
6.1.9	Zeolites as Dehydrating Agents	286
6.1.10	Zeolites as Ion Exchangers.....	286
6.1.11	Zeolites as Adsorbents	287
6.1.12	Zeolites as Catalysts.....	289
6.2	Other Microporous Framework Structures	296
6.3	Mesoporous Structures.....	297
6.3.1	Mesoporous Aluminosilicate Structures.....	297
6.3.2	Modified Mesoporous Aluminosilicates	299
6.3.3	Periodic Mesoporous Organosilicas.....	300
6.3.4	Metal Organic Frameworks.....	301
6.3.5	Metal Oxide Frameworks.....	310
6.4	New Materials	310
6.5	Clay Minerals	311
6.6	Summary	313
6.7	Postscript	313
	Questions.....	314
Chapter 7	Optical Properties of Solids	315
7.1	Introduction	315
7.2	Interaction of Light with Atoms	316
7.2.1	Ruby Laser	318
7.2.2	Phosphors in Fluorescent Lights	320
7.3	Absorption and Emission of Radiation in Continuous Solids	322
7.3.1	Light-Emitting Diodes.....	325
7.3.2	Gallium Arsenide Laser	326
7.3.3	Quantum Wells: Blue Lasers.....	327

7.4	Refraction	328
7.4.1	Calcite.....	330
7.4.2	Optical Fibres	331
7.5	Photonic Crystals.....	333
7.6	Metamaterials: Cloaks of Invisibility	335
	Questions	338

Chapter 8 Magnetic and Electrical Properties 341

8.1	Introduction	341
8.2	Magnetic Susceptibility	341
8.3	Paramagnetism in Metal Complexes	344
8.4	Ferromagnetic Metals.....	346
8.4.1	Ferromagnetic Domains.....	348
8.4.2	Permanent Magnets	351
8.5	Ferromagnetic Compounds: Chromium Dioxide	351
8.6	Antiferromagnetism: Transition Metal Monoxides.....	352
8.7	Ferrimagnetism: Ferrites	353
8.7.1	Magnetic Strips on Swipe Cards.....	355
8.8	Spiral Magnetism	355
8.9	Giant, Tunnelling and Colossal Magnetoresistance	356
8.9.1	Giant Magnetoresistance	356
8.9.2	Tunnelling Magnetoresistance	358
8.9.3	Hard-Disk Read Heads.....	359
8.9.4	Colossal Magnetoresistance: Manganites	360
8.10	Electrical Polarisation	361
8.11	Piezoelectric Crystals: α -Quartz	362
8.12	Ferroelectric Effect.....	363
8.12.1	Multilayer Ceramic Capacitors	366
8.13	Multiferroics	367
8.13.1	Type I Multiferroics: Bismuth Ferrite	368
8.13.2	Type II Multiferroics: Terbium Manganite	368
	Questions	370

Chapter 9 Superconductivity..... 373

9.1	Introduction	373
9.2	Conventional Superconductors	373
9.2.1	Discovery of Superconductors	373
9.2.2	Magnetic Properties of Superconductors	374
9.2.3	BCS Theory of Superconductivity	377
9.3	High-Temperature Superconductors.....	378
9.3.1	Cuprate Superconductors	379
9.3.2	Iron Superconductors	384
9.3.3	Theory of High T_C Superconductors	385

9.4	Uses of High-Temperature Superconductors	386
	Questions	387
Chapter 10	Nanostructures and Solids with Low-Dimensional Properties	389
10.1	Nanoscience	389
10.2	Consequences of the Nanoscale	390
10.2.1	Nanoparticle Morphology	390
10.2.2	Electronic Structure	390
10.2.3	Optical Properties	394
10.2.4	Magnetic Properties	396
10.2.5	Mechanical Properties	398
10.2.6	Melting	398
10.3	Low-Dimensional and Nanostructural Carbon	399
10.3.1	Carbon Black	399
10.3.2	Graphite	399
10.3.3	Intercalation Compounds of Graphite	400
10.3.4	Graphene	402
10.3.5	Buckminster Fullerene	403
10.3.6	Carbon Nanotubes	404
10.4	Carbon-Based Conducting Polymers	405
10.4.1	Discovery of Polyacetylene	405
10.4.2	Bonding in Polyacetylene and Related Polymers	407
10.4.3	Organic LEDs and Photovoltaic Cells	408
10.4.4	Polymers and Ionic Conduction: Rechargeable Lithium Batteries	409
10.5	Noncarbon Nanoparticles	412
10.5.1	Fumed Silica	412
10.5.2	Quantum Dots	413
10.5.3	Explosives	414
10.5.4	Magnetic Nanoparticles	415
10.5.5	Medical and Cosmetic Use	415
10.6	Noncarbon Nanofilms and Nanolayers	416
10.7	Noncarbon Nanotubes, Nanorods and Nanowires	417
	Questions	418
	Further Reading	421
	Answers to Questions	425
	Index	453
