<b>CHAPTER 1 Milestones in the Development of Capillary Electromigration Techniques .....</b>	<b>1</b>
Gerhardus de Jong	
1.1 Introduction .....	1
1.2 Instrumentation .....	3
1.2.1 Apparatus and Capillaries .....	3
1.2.2 Detection .....	3
1.2.3 Microchip Capillary Electrophoresis .....	5
1.3 Electrokinetic Chromatography .....	6
1.4 Special CE Modes .....	8
1.4.1 Capillary Gel Electrophoresis .....	8
1.4.2 Capillary Isoelectric Focusing .....	10
1.4.3 Affinity Capillary Electrophoresis .....	10
1.5 Preconcentration in CE .....	11
1.6 Applicability .....	13
References .....	17
<b>CHAPTER 2 Theoretical Principles of Capillary Electromigration Methods .....</b>	<b>21</b>
Wolfgang Thormann	
2.1 Introduction .....	21
2.2 Theoretical Aspects of CE .....	24
2.2.1 Electrokinetic Phenomena and Fundamental Aspects of Electrophoretic Transport .....	24
2.2.2 The Concept of Mobility and Other Separation Aspects .....	28
2.2.3 The Continuity Equation and Simulation of Electrophoretic Separations .....	31
2.3 Survey of Selected CE Aspects Explored Through Theoretical Approaches .....	35
2.4 Concluding Remarks .....	38
References .....	39
<b>CHAPTER 3 Column Technology for Capillary Electromigration Methods .....</b>	<b>45</b>
Laura Sola	
3.1 Introduction .....	45
3.2 Dynamic Coatings .....	46

3.2.1 Small Molecules .....	47
3.2.2 Polymeric Additives .....	50
<b>3.3 Permanent Coatings.....</b>	<b>55</b>
3.3.1 Silanization .....	56
3.3.2 Hydrophilic Coatings .....	56
<b>3.4 Nanomaterial Layers .....</b>	<b>59</b>
3.4.1 Nanoparticles .....	59
3.4.2 Carbon Nanomaterials .....	60
<b>3.5 Conclusions.....</b>	<b>63</b>
References .....	64
 <b>CHAPTER 4 Capillary Electrophoresis in Organic Solvents.....</b>	<b>69</b>
Ernst Kenndler, Norbert M. Maier	
<b>4.1 Preface .....</b>	<b>70</b>
<b>4.2 Acid-Base Reactions in Organic Solvents .....</b>	<b>73</b>
4.2.1 $pK_a$ and pH in Organic Solvents.....	73
<b>4.3 Electrically Driven Migration .....</b>	<b>80</b>
4.3.1 Electroosmosis: Flow of Bulk Solvent .....	80
4.3.2 Ion Migration, Mobility, and Solvent .....	82
<b>4.4 Peak Broadening: Separation Efficiency, Plate Height, and Plate Number in Different Solvents .....</b>	<b>89</b>
4.4.1 Extracolumn Effects .....	90
4.4.2 Longitudinal Diffusion: The Inevitable Source of Peak Broadening .....	91
4.4.3 Influence of Solvent on Peak Broadening by Other Sources than Diffusion .....	97
<b>4.5 Applications.....</b>	<b>103</b>
4.5.1 Exploiting $pK_a$ Shifts of Neutral Acids to Create BGEs Buffering for Amines in Methanol .....	103
4.5.2 Using $pK_a$ Shifts in Acetonitrile to Achieve Protonation of Very Weak Bases to Enable CZE Analysis of Acrylamide in Real-World Samples.....	105
4.5.3 Exploiting Heteroconjugation in Acetonitrile to Generate Charged Phenol-Salicylate Associates Amenable for CZE Analysis .....	106
4.5.4 Improving CZE Separation of Peptides With Ethanol as Solvent for Microchip CZE/Electrospray Mass Spectrometry .....	107
<b>4.6 Conclusions.....</b>	<b>108</b>
References .....	109

**CHAPTER 5 Micellar and Microemulsion Electrokinetic Chromatography ..... 113**  
Ute Pyell

<b>5.1</b>	Introduction and Terminology .....	113
<b>5.2</b>	Physicochemical Background .....	115
5.2.1	Micelles .....	115
5.2.2	Sodium Dodecyl Sulfate .....	118
5.2.3	Microdroplets.....	120
<b>5.3</b>	Separation of Neutral Solutes .....	120
5.3.1	The Pseudophase Model.....	120
5.3.2	Elution Modes .....	122
5.3.3	Resolution.....	123
5.3.4	Method Development .....	125
<b>5.4</b>	Separation of Weak Electrolytes.....	130
5.4.1	Thermodynamic Models.....	130
5.4.2	Pseudostationary Ion Exchangers .....	133
<b>5.5</b>	Comparison of MEKC to MEEKC .....	134
<b>5.6</b>	Online Focusing.....	135
<b>5.7</b>	Conclusions.....	136
	References .....	136

**CHAPTER 6 Capillary Gel and Sieving Electrophoresis ..... 143**  
Ivan Mikšík

<b>6.1</b>	Introduction .....	143
<b>6.2</b>	Gels .....	144
<b>6.3</b>	Protein Analysis.....	145
6.3.1	Gels .....	145
6.3.2	Capillary Coatings.....	150
6.3.3	CGE in Two-Dimensional Separation of Proteins .....	152
<b>6.4</b>	Nucleic Acid Analysis.....	152
6.4.1	Gels .....	154
<b>6.5</b>	Miniaturization—Lab-on-a-Chip .....	158
6.5.1	Commercially Available Chip Electrophoresis .....	160
<b>6.6</b>	Conclusions.....	161
	Acknowledgments .....	161
	References .....	161

<b>CHAPTER 7 Capillary Isoelectric Focusing.....</b>	<b>167</b>
Kiyohito Shimura	
<b>7.1 Introduction .....</b>	<b>168</b>
<b>7.2 Resolving Power of IEF .....</b>	<b>169</b>
<b>7.3 Capillary Wall Coating .....</b>	<b>170</b>
7.3.1 Fused-Silica Capillary .....	170
7.3.2 Coating on the Inner Wall.....	170
<b>7.4 The Natural pH Gradient .....</b>	<b>171</b>
7.4.1 The Carrier Ampholyte .....	171
7.4.2 Nonlinearity of the Natural pH Gradient.....	172
7.4.3 Electrode Solutions.....	172
7.4.4 The Spacer .....	173
<b>7.5 Focusing.....</b>	<b>174</b>
7.5.1 Coalescence of Focusing Double Peaks .....	174
7.5.2 Drift of the Natural pH Gradient .....	175
7.5.3 Obstacles.....	177
<b>7.6 Estimation of pI.....</b>	<b>177</b>
7.6.1 pI Markers .....	178
7.6.2 Use of two Flanking pI Markers.....	178
<b>7.7 Detection.....</b>	<b>179</b>
7.7.1 Detection Principles .....	179
7.7.2 Static Single-Point Detection .....	182
7.7.3 Whole-Column Detection.....	183
<b>7.8 Conclusion .....</b>	<b>184</b>
References .....	185
<b>CHAPTER 8 Capillary Isotachophoresis.....</b>	<b>189</b>
Takeshi Hirokawa	
<b>8.1 Introduction .....</b>	<b>190</b>
<b>8.2 Principles of ITP.....</b>	<b>190</b>
8.2.1 Electrophoretic Mobility of Ions.....	190
8.2.2 Electrolyte System.....	191
8.2.3 Separation Process.....	192
8.2.4 Steady State .....	193
8.2.5 Qualitative and Quantitative Analysis .....	194
8.2.6 Separation Optimization.....	195
<b>8.3 Apparatus .....</b>	<b>196</b>
8.3.1 Instrumentation .....	196
8.3.2 Detectors .....	197

<b>8.4</b>	Typical Applications of Conventional ITP .....	198
8.4.1	Separation of Weak Ions Using pH Effect .....	198
8.4.2	Separation Using the Solvent Effect.....	198
8.4.3	Separation of Inorganic Ions Using Complex Formation .....	199
8.4.4	Note on Minor Component Analysis .....	200
<b>8.5</b>	ITP as a Preconcentration Technique for CE .....	201
8.5.1	Transient Isotachophoresis .....	202
8.5.2	Electrokinetic Supercharging .....	203
<b>8.6</b>	Computer Simulation .....	207
<b>8.7</b>	Conclusion .....	207
	References .....	208

## **CHAPTER 9 Capillary Electrochromatography ..... 209**

Chao Yan, Yun Xue, Yan Wang

<b>9.1</b>	Background of Capillary Electrochromatography .....	209
<b>9.2</b>	Fundamentals of CEC .....	211
<b>9.3</b>	Basic Instrumentation for CEC.....	214
<b>9.4</b>	Classification of CEC Columns .....	216
9.4.1	Packed Columns .....	216
9.4.2	Monolithic Columns .....	219
9.4.3	Open-Tubular Columns .....	220
<b>9.5</b>	Detection Methods in CEC .....	220
9.5.1	Ultraviolet Detector .....	221
9.5.2	Laser-Induced Fluorescence .....	221
9.5.3	Amperometric Detector .....	221
9.5.4	Chemiluminescence Detector.....	221
9.5.5	Microflow Evaporative Light-Scattering Detector .....	222
9.5.6	Condensation Nucleation Light-Scattering Detection .....	222
9.5.7	NMR Spectrometry .....	222
9.5.8	Mass Spectrometry .....	223
<b>9.6</b>	Applications .....	225
<b>9.7</b>	Future Trends.....	226
	Acknowledgments .....	226
	References .....	226

## **CHAPTER 10 Method Development and Validation of Capillary Electromigration Methods ..... 235**

Cari E. Sänger-van de Griend, Ann Van Schepdael

<b>10.1</b>	Introduction .....	236
<b>10.2</b>	Analytical Quality by Design and Method Life Cycle Management .....	237

<b>10.3</b>	<b>Method Development .....</b>	<b>239</b>
10.3.1	Method Development Plan.....	239
10.3.2	Background Electrolyte.....	242
10.3.3	Capillary .....	247
10.3.4	Sample Introduction .....	250
10.3.5	Detection.....	253
10.3.6	Method Optimization .....	255
<b>10.4</b>	<b>Method Validation.....</b>	<b>257</b>
10.4.1	Specificity .....	260
10.4.2	Linearity.....	260
10.4.3	Range .....	260
10.4.4	Accuracy .....	261
10.4.5	Precision .....	261
10.4.6	Detection Limit.....	261
10.4.7	Quantitation Limit .....	262
10.4.8	System Suitability Testing .....	262
<b>10.5</b>	<b>Conclusions.....</b>	<b>264</b>
	References .....	264

## **CHAPTER 11 Instrumental Platforms for Capillary and Microchip Electromigration Separation Techniques..... 269**

Cyro L.S. Chagas, Roger C. Moreira, Lucas P. Bressan, Dosil P. de Jesus,  
José A.F. da Silva, Wendell K.T. Coltro

<b>11.1</b>	<b>Introduction .....</b>	<b>270</b>
<b>11.2</b>	<b>High-Voltage Power Supplies .....</b>	<b>270</b>
<b>11.3</b>	<b>Sample Injection for Conventional CE.....</b>	<b>271</b>
11.3.1	HD Injection .....	271
11.3.2	EK Injection .....	272
<b>11.4</b>	<b>Temperature Control .....</b>	<b>273</b>
<b>11.5</b>	<b>Detectors for Conventional CE.....</b>	<b>273</b>
11.5.1	Optical Detection.....	274
11.5.2	Electrochemical Detection .....	275
<b>11.6</b>	<b>CE Coupled to Flow Injection .....</b>	<b>277</b>
<b>11.7</b>	<b>Chip-Based Platforms.....</b>	<b>278</b>
11.7.1	Microfabrication .....	279
<b>11.8</b>	<b>Sample Introduction Methods for ME .....</b>	<b>281</b>
11.8.1	HD Injection .....	281
11.8.2	EK Injection .....	281
<b>11.9</b>	<b>Detection Systems for ME .....</b>	<b>284</b>

<b>11.10</b>	High-Throughput Analysis .....	285
	Acknowledgments .....	287
	References .....	287

## **CHAPTER 12 Coupling of Capillary Electromigration Techniques to Mass Spectrometry ..... 293**

Christian Neusüß, Jennifer Römer, Oliver Höcker, Kevin Jooß

<b>12.1</b>	Introduction .....	293
<b>12.2</b>	Coupling of Electromigration Techniques to Mass Spectrometry .....	294
<b>12.3</b>	Interfaces for CE-ESI-MS Coupling .....	295
	12.3.1 Sheath Liquid Interfaces .....	295
	12.3.2 Sheathless Interfaces .....	297
<b>12.4</b>	Methods and Applications in CE-MS .....	299
	12.4.1 Back Ground Electrolytes for CE-MS .....	299
	12.4.2 Capillary Coatings for CE-MS .....	300
	12.4.3 Parameters of Sheath Liquid in CE-MS .....	301
	12.4.4 Important Applications of CE-MS .....	302
<b>12.5</b>	Combining MS-Interfering CE Electrolytes With Mass Spectrometry .....	303
	12.5.1 Complete Exchange of the Background Electrolyte .....	305
	12.5.2 Compromise Between Separation and Ionization Efficiency .....	305
	12.5.3 Alternative CE-ESI-Interface .....	306
	12.5.4 Alternative Ionization Techniques .....	306
	12.5.5 Two-Dimensional Separation Techniques .....	307
<b>12.6</b>	Future Trends .....	309
	References .....	309

## **CHAPTER 13 Stacking and Multidimensional Techniques for Capillary Electromigration Methods ..... 313**

Wojciech Grochocki, Michal J. Markuszewski, Joselito P. Quirino

<b>13.1</b>	Introduction .....	314
<b>13.2</b>	Stacking Techniques .....	315
	13.2.1 Stacking Based on Field Enhancement/Amplification .....	315
	13.2.2 Transient Isotachophoresis and Transient Pseudo Isotachophoresis .....	317
	13.2.3 Dynamic pH Junction .....	318
	13.2.4 Sweeping .....	318
	13.2.5 Analyte Focusing by Micelle Collapse .....	319
	13.2.6 Micelle to Solvent Stacking .....	319
	13.2.7 Combination of Different Stacking Techniques .....	320
<b>13.3</b>	Multidimensional Capillary Electrophoresis .....	322

13.3.1 Comprehensive Two-Dimensional Capillary Electrophoresis .....	324
13.3.2 Heart-Cutting Two-Dimensional Capillary Electrophoresis .....	326
13.3.3 Online Sample Concentration Techniques in Two-Dimensional Capillary Electrophoresis .....	326
<b>13.4 Conclusions.....</b>	<b>330</b>
Acknowledgment.....	330
References .....	330
<b>CHAPTER 14 Capillary Electrophoresis-Mass Spectrometry for Proteomics .....</b>	<b>335</b>
Claudia Martelli, Claudia Desiderio	
<b>14.1 Introduction .....</b>	<b>335</b>
14.1.1 Strategies in MS-Based Proteomics.....	337
<b>14.2 Bottom-Up Proteomics by CE-MS .....</b>	<b>339</b>
<b>14.3 Top-Down Proteomics by CE-MS .....</b>	<b>342</b>
<b>14.4 CE-MS Operating Conditions for Proteomic Analysis: Critical Issues         and Actual Developments .....</b>	<b>345</b>
<b>14.5 Conclusions.....</b>	<b>347</b>
References .....	348
<b>CHAPTER 15 Separation of Small-Mass Ions .....</b>	<b>353</b>
Laurel Jones, Michael C. Breadmore	
<b>15.1 Introduction .....</b>	<b>353</b>
<b>15.2 Comparison With Ion Chromatography.....</b>	<b>354</b>
15.2.1 Developmental Overview.....	354
15.2.2 Separation Selectivity.....	355
15.2.3 Reproducibility .....	355
15.2.4 Separation Efficiency .....	356
15.2.5 Sensitivity .....	356
<b>15.3 Simultaneous Separation of Anions and Cations .....</b>	<b>357</b>
<b>15.4 Applications.....</b>	<b>360</b>
15.4.1 Analysis of Metal Ions .....	360
15.4.2 Forensics .....	360
15.4.3 Pharmaceutical Analysis .....	365
15.4.4 Agrochemical Analysis .....	365
15.4.5 Environmental Monitoring .....	365
15.4.6 Water Quality Analysis .....	367
15.4.7 Clinical Diagnostic Applications .....	367
15.4.8 Food Quality Control .....	367
<b>15.5 Conclusions.....</b>	<b>368</b>
References .....	368

**CHAPTER 16 Capillary Electrophoresis of Herbal Carbohydrates ..... 373**

Shao-Ping Li, Feng-Qing Yang, Qian Zhang, Jing Zhao

<b>16.1</b>	Introduction .....	373
<b>16.2</b>	Overview of Herbal Carbohydrates .....	374
16.2.1	Mono-, Oligo-, and Polysaccharides.....	374
16.2.2	Glycoconjugates: Glycoproteins, Glycolipids, and Glycosaminoglycans.....	384
<b>16.3</b>	Sample Preparation of Carbohydrates From Herbs.....	385
<b>16.4</b>	Separation and Detection of Herbal Carbohydrates in CE Analysis .....	387
16.4.1	Complexation With Borate .....	389
16.4.2	Strongly Alkaline Conditions.....	390
<b>16.5</b>	Applications of CE in Herbal Carbohydrates Analysis.....	390
<b>16.6</b>	Conclusions.....	391
	Acknowledgments .....	391
	References .....	392

**CHAPTER 17 Electrophoretic Methods for Characterizing Nanoparticles  
and Evaluating Their Bio-interactions for Their Further Use as  
Diagnostic, Imaging, or Therapeutic Tools ..... 397**Gonzalo Ramírez-García, Laura Trapiella-Alfonso, Fanny d'Orlyé,  
Anne Varenne

<b>17.1</b>	Introduction .....	398
<b>17.2</b>	Fundamentals of Electrokinetic Methods for the Characterization of NPs .....	398
17.2.1	Relevance of Electrophoresis for the Characterization of NPs in View of Biomedical Applications.....	398
17.2.2	Electrokinetic Methodologies for Controlling and Optimizing the Synthesis and Functionalization of NPs .....	399
17.2.3	Evaluating the Behavior of NPs in the Presence of Biologically Relevant Elements.....	403
17.2.4	Determination of Binding Parameters From Electrophoretic Data.....	407
<b>17.3</b>	Application of Electromigration Methods to the Analysis of NPs .....	408
17.3.1	Control and Characterization of NPs Synthesis and Their Physicochemical Properties.....	408
17.3.2	Nano-Bio Interactions .....	412
17.3.3	Characterization of NPs as Drug Delivery Systems.....	414
<b>17.4</b>	Conclusions and Perspectives .....	415
	References .....	415

**CHAPTER 18 Clinical Chemistry Applications of Capillary Electromigration**

<b>Methods .....</b>	<b>423</b>
Chenhua Zhang, David S. Hage	
<b>18.1 Introduction .....</b>	<b>423</b>
<b>18.2 Protein Profiling .....</b>	<b>424</b>
<b>18.3 Hematology .....</b>	<b>425</b>
<b>18.4 Enzymology .....</b>	<b>426</b>
<b>18.5 Immunology and Immunoassays .....</b>	<b>427</b>
<b>18.6 Endocrinology .....</b>	<b>430</b>
<b>18.7 Therapeutic Drug Monitoring .....</b>	<b>432</b>
<b>18.8 Toxicology .....</b>	<b>435</b>
<b>18.9 Tumor Biomarkers .....</b>	<b>438</b>
<b>18.10 DNA Diagnostics .....</b>	<b>440</b>
<b>18.11 Conclusion .....</b>	<b>442</b>
Acknowledgments .....	442
References .....	442

**CHAPTER 19 Biopharmaceutical Applications of Capillary Electromigration**

<b>Methods .....</b>	<b>453</b>
Rabah Gahoual, Jérémie Giorgetti, Alain Beck, Emmanuelle Leize-Wagner, Yannis-Nicolas François	
<b>19.1 Introduction: Biopharmaceutical Products Analysis .....</b>	<b>454</b>
<b>19.2 Capillary Gel Electrophoresis .....</b>	<b>455</b>
19.2.1 Method Description .....	455
19.2.2 Example of a Practical Protocol .....	456
19.2.3 Applications .....	457
<b>19.3 Capillary Isoelectric Electrophoretic Focusing .....</b>	<b>460</b>
19.3.1 Method Description .....	460
19.3.2 Example of Practical Protocols .....	461
19.3.3 Applications .....	463
<b>19.4 Capillary Electrophoresis .....</b>	<b>464</b>
19.4.1 Method Description .....	464
19.4.2 Example of Practical Protocol .....	465
19.4.3 Applications .....	466
<b>19.5 CE Hyphenated With Mass Spectrometry .....</b>	<b>468</b>
19.5.1 Method Description .....	468
19.5.2 Example of Practical Protocol .....	469
19.5.3 Applications .....	470
<b>19.6 Conclusion .....</b>	<b>474</b>
References .....	474

<b>CHAPTER 20 Neuroscience Applications of Capillary Electrophoretic Methods .....</b>	<b>481</b>
Elena Sánchez-López, María Luisa Marina	
<b>20.1 Introduction .....</b>	<b>481</b>
20.1.1 Microdialysis and Other Sampling Strategies in CE.....	482
20.1.2 CE-Based Metabolomics.....	483
20.1.3 Single-Cell Analysis by CE .....	484
20.1.4 Role of d-Enantiomers in Neurotransmission.....	485
<b>20.2 Applications of CE to Neuroscience.....</b>	<b>486</b>
20.2.1 Addiction .....	494
20.2.2 Depression .....	495
20.2.3 Epilepsy .....	496
20.2.4 Ischemic Stroke .....	497
20.2.5 Neurodegeneration.....	499
20.2.6 Pain .....	499
20.2.7 Miscellaneous Applications .....	500
<b>20.3 Conclusions and Future Trends.....</b>	<b>503</b>
Acknowledgments .....	504
References .....	504
<b>CHAPTER 21 Food Safety Applications of Capillary Electromigration Methods .....</b>	<b>511</b>
Francisco J. Lara, David Moreno-González, Maykel Hernández-Mesa, Ana M. García-Campaña	
<b>21.1 Introduction .....</b>	<b>511</b>
<b>21.2 Veterinary Drugs .....</b>	<b>512</b>
<b>21.3 Pesticides .....</b>	<b>520</b>
<b>21.4 Natural Toxins .....</b>	<b>525</b>
<b>21.5 Other Contaminants and Pollutants .....</b>	<b>529</b>
<b>21.6 Allergens.....</b>	<b>532</b>
<b>21.7 Conclusions.....</b>	<b>534</b>
Acknowledgments .....	534
References .....	534
<b>CHAPTER 22 Application of Capillary Electromigration Methods for Physicochemical Measurements.....</b>	<b>547</b>
Sille Štěpánová, Václav Kašička	
<b>22.1 Introduction .....</b>	<b>548</b>
<b>22.2 Determination of Acidity Constants, Ionic Mobilities, and Stokes Radii by CE .....</b>	<b>549</b>

22.2.1 Nonlinear Regression Analysis of pH Dependence of Effective Mobility .....	549
22.2.2 Internal Standard-Based Method.....	556
<b>22.3</b> Determination of Effective Charges .....	557
22.3.1 Calculation from $pK_a$ Values .....	557
22.3.2 Determination by CE.....	557
22.3.3 Determination by CITP .....	559
<b>22.4</b> Determination of Relative Molecular Masses of Proteins by CGE .....	560
<b>22.5</b> Determination of the Isoelectric Points of Proteins and Peptides by CIEF and CE .....	561
<b>22.6</b> Semiempirical Relations Between Electrophoretic Mobility of Peptides and Proteins and Their Charge/Size Ratio.....	562
<b>22.7</b> Determination of Binding Constants of Complexes by CE Methods .....	564
22.7.1 Mobility Shift ACE .....	564
22.7.2 Multiple-Injection ACE.....	567
22.7.3 Partial Filling ACE.....	568
22.7.4 Preequilibrated CE .....	569
22.7.5 Hummel-Dreyer and Vacancy Peak Methods .....	569
22.7.6 Frontal Analysis and Continuous Frontal Analysis CE.....	569
22.7.7 Kinetic Capillary Electrophoresis .....	570
<b>22.8</b> Determination of Partition Constants by MEKC and MEEKC .....	571
<b>22.9</b> Determination of Diffusion Coefficients .....	574
<b>22.10</b> Determination of Rate Constants for Chemical and Enzymatic Reactions .....	576
<b>22.11</b> Conclusions.....	582
Acknowledgments .....	582
References .....	582
<b>Index .....</b>	593
