

EXPERIMENTAL CELL RESEARCH

Volume 315, Number 3, February 1, 2009

CONTENTS

Highlights	v
<i>Research Articles</i>	
Elske J. Schabort, Mathilde van der Merwe, Benjamin Loos, Frances P. Moore, and Carola U. Niesler. TGF- β 's delay skeletal muscle progenitor cell differentiation in an isoform-independent manner	373
Raffaella Solito, Federico Corti, Silvia Fossati, Emiliya Mezhericher, Sandra Donnini, Jorge Ghiso, Antonio Giachetti, Agueda Rostagno, and Marina Ziche. Dutch and arctic mutant peptides of β amyloid ₁₋₄₀ differentially affect the FGF-2 pathway in brain endothelium	385
Po-Feng Lee, Alvin T. Yeh, and Kayla J. Bayless. Nonlinear optical microscopy reveals invading endothelial cells anisotropically alter three-dimensional collagen matrices	396
Michelle N. Yarmo, Anne Landry, André S.D. Molgat, AnneMarie Gagnon, and Alexander Sorisky. Macrophage-conditioned medium inhibits differentiation-induced Rb phosphorylation in 3T3-L1 preadipocytes	411
Nicolás Pregi, Shirley Wenker, Daniela Vittori, Claudia Pérez Leirós, and Alcira Nesse. TNF-alpha-induced apoptosis is prevented by erythropoietin treatment on SH-SY5Y cells	419
Jasleen Shant, Kunrong Cheng, Bernard S. Marasa, Jian-Ying Wang, and Jean-Pierre Raufman. Akt-dependent NF- κ B activation is required for bile acids to rescue colon cancer cells from stress-induced apoptosis	432
Elisabeth Hedström, Natalia Issaeva, Martin Enge, and Galina Selivanova. Tumor-specific induction of apoptosis by a p53-reactivating compound	451
Piotr Rieske, Brian J. Augelli, Robert Stawski, John Gaughan, S. Ausim Azizi, and Barbara Krynska. A population of human brain cells expressing phenotypic markers of more than one lineage can be induced <i>in vitro</i> to differentiate into mesenchymal cells	462
Hisashi Ideno, Rieko Takanabe, Akemi Shimada, Kazuhiko Imaizumi, Ryoko Araki, Masumi Abe, and Akira Nifuji. Protein related to DAN and cerberus (PRDC) inhibits osteoblastic differentiation and its suppression promotes osteogenesis <i>in vitro</i>	474

Philipp Baumann, Sonja Mandl-Weber, Fuat Oduncu, and Ralf Schmidmaier. The novel orally bioavailable inhibitor of phosphoinositol-3-kinase and mammalian target of rapamycin, NVP-BEZ235, inhibits growth and proliferation in multiple myeloma	485
Anja Apel, Ariane Groth, Sabine Schlesinger, Helge Bruns, Peter Schemmer, Markus W. Büchler, and Ingrid Herr. Suitability of human mesenchymal stem cells for gene therapy depends on the expansion medium	498
Claire Robinson and Andreas F. Kolb. Analysis of mammary specific gene locus regulation in differentiated cells derived by somatic cell fusion	508
Michelle L. Milstein, Timothy D. Houle, and Steven E. Cala. Calsequestrin isoforms localize to different ER subcompartments: Evidence for polymer and heteropolymer-dependent localization.	523
M.L. Fanarraga, J.C. Villegas, G. Carranza, R. Castaño, and J.C. Zabala. Tubulin cofactor B regulates microtubule densities during microglia transition to the reactive states	535
Elena Kolobova, Andrey Efimov, Irina Kaverina, Arun K. Rishi, John W. Schrader, Amy-Joan Ham, M. Cecilia Larocca, and James R. Goldenring. Microtubule-dependent association of AKAP350A and CCAR1 with RNA stress granules	542

Covered in the abstract and citation database BIOBASE, Biological & Agricultural Index, Biological Abstracts, Biosis Previews, Chemical Abstracts, Current Awareness in Biological Sciences, Current Contents, EMBASE, EMBiology, Genetics Abstracts, MEDLINE®, Science Citation Index, and SCOPUS®. Full text available on ScienceDirect®.
