

Table of Contents

List of Notation	xi
Chapter 1. Introduction	1
1.1 Overview of author's new results	2
Chapter 2. Time scale theory	5
2.1 Basic notation	5
2.2 Time scale derivative	6
2.3 Nabla calculus on time scales	7
2.4 Integration on time scales	9
2.5 Bibliographical notes	10
Chapter 3. Trigonometric and hyperbolic systems on time scales	11
3.1 Symplectic dynamic systems on time scales	13
3.2 Time scale trigonometric systems	14
3.3 Time scale hyperbolic systems	23
3.4 Concluding remarks	29
3.5 Bibliographical notes	30
Chapter 4. Weyl–Titchmarsh theory for symplectic dynamic systems	31
4.1 Perturbed symplectic systems on time scales	33
4.2 $M(\lambda)$ -function for regular spectral problem	37
4.3 Geometric properties of Weyl disks	44
4.4 Limiting Weyl disk and Weyl circle	47
4.5 Limit point and limit circle criteria	52
4.6 Nonhomogeneous time scale symplectic systems	56
4.7 Bibliographical notes	61
Chapter 5. Second order Sturm–Liouville equations on time scales	63
5.1 Krein–von Neumann and Friedrichs extensions for second order operators on time scales	64
5.1.1 Preliminaries on equation (5.3)(i)	65
5.1.2 Main results	67

Table of contents

5.2	Critical second order operators on time scales	70
5.2.1	Preliminaries on equation (5.3)(ii)	71
5.2.2	Main results	72
5.2.3	One term operator	74
5.3	Weyl–Titchmarsh theory for second order equations on time scales	75
5.3.1	Preliminaries on equation (5.3)(iii)	76
5.3.2	Main results	77
5.4	Bibliographical notes	80
Bibliography		93
Appendix		95
	Further research	95
	List of author’s publications	95
	Author’s curriculum vitae	96
