

# Contents to the series

Introduction to the series	<b>7</b>
Introduction to this book	<b>9</b>
Data compilation and coding	<b>13</b>
Categories for coding the ecological preferences	<b>19</b>
Acknowledgements	<b>35</b>
References	<b>36</b>
Ecological parameters	<b>44</b>
Species inventory	<b>45</b>
Ecoregional distribution	<b>57</b>
Endemism	<b>79</b>
Rare species	<b>85</b>
Red list	<b>91</b>
Stream zonation preference	<b>97</b>
Altitude preference (WFD) and altitude range	<b>107</b>
Microhabitat/substrate preference and habitat specialist	<b>119</b>
Hydrologic preference	<b>133</b>
Current preference	<b>145</b>
Temperature preference and temperature range preference	<b>155</b>

pH preference	<b>161</b>
Feeding type	<b>167</b>
Life duration	<b>173</b>
Larval development cycle	<b>181</b>
Emergence/flight period and duration of emergence period	<b>189</b>
Reproductive life cycles per year	<b>201</b>
References to the ecological parameters	<b>213</b>
Abbreviations	<b>251</b>
