

# Contents

<b>List of Examples and Case Studies</b> . . . . .	xxvii
<b>Part I Modeling Techniques</b>	
<b>1 An Example</b> . . . . .	3
1.1 A Cookie Vending Machine . . . . .	3
1.2 A Look Inside . . . . .	4
1.3 The Interface . . . . .	5
1.4 Hot and Cold Transitions . . . . .	6
1.5 Runs . . . . .	6
1.6 Alternatives . . . . .	7
1.7 Fine Tuning . . . . .	8
1.8 Diverse Components . . . . .	10
Exercises . . . . .	11
Further Reading . . . . .	11
<b>2 The Basic Concepts</b> . . . . .	13
2.1 A Variant of the Cookie Vending Machine . . . . .	13
2.2 Components of a Net . . . . .	14
2.3 The Data Structure for Petri Nets: Multisets . . . . .	16
2.4 Markings as Multisets . . . . .	18
2.5 Steps with Constant Arc Labelings . . . . .	18
2.6 Steps with Variable Arc Labelings . . . . .	19
2.7 System Nets . . . . .	21
2.8 Marking Graph . . . . .	22
2.9 Final Markings . . . . .	23
Exercises . . . . .	23
Further Reading . . . . .	23
<b>3 Common Special Case: Elementary System Nets</b> . . . . .	25
3.1 Elementary System Nets . . . . .	25

3.2	An Abstract Model of the Cookie Vending Machine . . . . .	26
3.3	Mutual Exclusion . . . . .	27
3.4	The Crosstalk Algorithm . . . . .	28
3.5	1-Bounded Elementary System Nets . . . . .	32
	Exercises . . . . .	32
	Further Reading . . . . .	33
<b>4</b>	<b>Sequential and Distributed Runs . . . . .</b>	<b>35</b>
4.1	Sequential Runs . . . . .	35
4.2	Tokens as Labeled Places . . . . .	37
4.3	Actions . . . . .	37
4.4	Distributed Runs . . . . .	39
4.5	Example: A Bell Clock . . . . .	42
4.6	The Kindergarten Game . . . . .	43
4.7	Causal Order . . . . .	45
4.8	The Composition of Distributed Runs . . . . .	46
	Exercises . . . . .	47
	Further Reading . . . . .	48
<b>5</b>	<b>Scenarios . . . . .</b>	<b>51</b>
5.1	Defining Scenarios . . . . .	51
5.2	The Scenarios of the Crosstalk Algorithm . . . . .	53
5.3	The Scenarios of the Cookie Vending Machine . . . . .	54
	Exercises . . . . .	55
	Further Reading . . . . .	55
<b>6</b>	<b>Further Notations for Elementary System Nets . . . . .</b>	<b>57</b>
6.1	Place Capacities . . . . .	57
6.2	Arc Weights . . . . .	58
6.3	Real Extensions . . . . .	61
	Exercises . . . . .	62
	Further Reading . . . . .	62
<b>7</b>	<b>The Synthesis Problem . . . . .</b>	<b>65</b>
7.1	Example: The Light/Fan System . . . . .	65
7.2	The General Question of the Synthesis Problem . . . . .	67
7.3	Regions of State Automata . . . . .	68
7.4	The System Net of a State Automaton . . . . .	69
7.5	The Solution to the Synthesis Problem . . . . .	70
7.6	The Synthesis Problem of the Light/Fan State Automaton . . . . .	70
	Exercises . . . . .	71
	Further Reading . . . . .	72

<b>8</b>	<b>Composition of Nets</b> . . . . .	75
8.1	Nets with Interfaces . . . . .	75
8.2	Communicating Nets . . . . .	78
8.3	Unambiguous Decomposition into Open Nets . . . . .	78
	Exercises . . . . .	80
	Further Reading . . . . .	80
 <b>Part II Analysis Methods</b>		
<b>9</b>	<b>State Properties</b> . . . . .	83
9.1	Equations and Inequalities of the Cookie Vending Machine . . . . .	83
9.2	Valid Equations . . . . .	86
9.3	Example: Dining Philosophers . . . . .	86
9.4	Valid Inequalities . . . . .	88
9.5	Equations and Inequalities of Elementary System Nets . . . . .	88
9.6	Modulo Equations . . . . .	90
9.7	Propositional State Properties . . . . .	91
	Exercises . . . . .	93
	Further Reading . . . . .	94
<b>10</b>	<b>Traps and Cotraps of Elementary System Nets</b> . . . . .	97
10.1	Traps of Elementary System Nets . . . . .	97
10.2	Cotraps . . . . .	98
10.3	The Trap/Cotrap Property . . . . .	99
	Exercises . . . . .	100
	Further Reading . . . . .	101
<b>11</b>	<b>Place Invariants of Elementary System Nets</b> . . . . .	103
11.1	Vector Representation for Elementary System Nets . . . . .	103
11.2	The Matrix $N$ . . . . .	104
11.3	Place Invariants . . . . .	104
11.4	Positive Place Invariants . . . . .	107
	Exercises . . . . .	108
	Further Reading . . . . .	109
<b>12</b>	<b>Combining Traps and Place Invariants of Elementary System Nets</b> . . . . .	111
12.1	Calculating with Equations and Inequalities . . . . .	111
12.2	State Properties of the Mutual Exclusion System . . . . .	113
12.3	State Properties of the Crosstalk Algorithm . . . . .	113
12.4	Unstable Properties . . . . .	114
	Exercises . . . . .	116

<b>13</b>	<b>Traps and Place Invariants of Generic System Nets</b> . . . . .	119
13.1	Traps of a System Net . . . . .	119
13.2	Sum Expressions . . . . .	120
13.3	Multiplying Sum Expressions . . . . .	120
13.4	Applying a Sum Expression to a Multiset . . . . .	121
13.5	The Matrix $\underline{N}$ of a System Net $N$ . . . . .	121
13.6	The Place Invariants of a System Net . . . . .	122
13.7	The Constant of a Place Invariant . . . . .	122
13.8	The Equation of a Place Invariant . . . . .	124
13.9	Properties of the Philosophers System . . . . .	124
13.10	Properties of the Kindergarten Game . . . . .	126
	Exercises . . . . .	127
	Further Reading . . . . .	127
<b>14</b>	<b>Marking and Covering Graphs</b> . . . . .	131
14.1	Deriving Properties from the Marking Graph . . . . .	131
14.2	The Idea of the Covering Graph . . . . .	132
14.3	$\omega$ -Markings . . . . .	133
14.4	The Construction of the Covering Graph . . . . .	134
14.5	The Finiteness of the Covering Graph . . . . .	135
14.6	The Covering of Sequential Runs . . . . .	136
14.7	Simultaneously Unbounded Places . . . . .	136
14.8	Dead Transitions . . . . .	138
14.9	Covering Graphs of Generic System Nets . . . . .	138
	Exercises . . . . .	138
	Further Reading . . . . .	139
<b>15</b>	<b>Reachability in Elementary System Nets</b> . . . . .	141
15.1	Corollaries of Place Invariants . . . . .	141
15.2	The Marking Equation . . . . .	142
15.3	Transition Invariants . . . . .	144
	Exercises . . . . .	145
	Further Reading . . . . .	145
<b>16</b>	<b>Run Properties</b> . . . . .	147
16.1	Intuitive Question . . . . .	147
16.2	Defining Run Properties . . . . .	148
16.3	The Deduction Rule . . . . .	150
16.4	Proof Graphs . . . . .	153
	Exercises . . . . .	155
	Further Reading . . . . .	155

<b>17</b>	<b>Free-Choice Nets</b> . . . . .	157
	17.1 Defining Free-Choice Nets . . . . .	157
	17.2 The Trap/Cotrap Theorem for Free-Choice Nets . . . . .	158
	17.3 Clusters . . . . .	158
	17.4 The Rank Theorem . . . . .	160
	Exercises . . . . .	160
	Further Reading . . . . .	161
<b>18</b>	<b>Marked Graphs</b> . . . . .	163
	18.1 Defining Marked Graphs . . . . .	163
	18.2 Liveness of Marked Graphs . . . . .	164
	18.3 1-Bounded Marked Graphs . . . . .	165
	18.4 Liveness of 1-Bounded Marked Graphs . . . . .	165
	Exercises . . . . .	166
	Further Reading . . . . .	166
<b>19</b>	<b>Well-Formed System Nets</b> . . . . .	169
	19.1 Example: Models of Business Processes . . . . .	169
	19.2 Well-Formed Elementary System Nets . . . . .	170
	19.3 Deciding Well-Formedness . . . . .	170
	Exercises . . . . .	171
	Further Reading . . . . .	171
<b>Part III Case Studies</b>		
<b>20</b>	<b>Mutual Exclusion</b> . . . . .	175
	20.1 The Problem . . . . .	175
	20.2 Realizability . . . . .	176
	20.3 Fairness Assumptions . . . . .	177
	20.4 Mutex with Autonomous Fairness . . . . .	178
	20.5 The Scenarios of the Algorithm . . . . .	179
	20.6 Correctness of the Algorithm . . . . .	181
	Exercises . . . . .	183
	Further Reading . . . . .	183
<b>21</b>	<b>Asynchronous Hardware</b> . . . . .	185
	21.1 The Counterflow Pipeline Processor (CFPP): The Problem . . . . .	185
	21.2 The Solution Idea . . . . .	186
	21.3 The Synthesis Problem for the CFPP . . . . .	187
	21.4 Structural Simplification of a Module . . . . .	188
	21.5 The Model of the CFPP . . . . .	189
	21.6 Analysis of the Model . . . . .	190

Exercises . . . . .	191
Further Reading . . . . .	191
<b>22 Network Algorithms . . . . .</b>	<b>193</b>
22.1 Some Conventions for the Representation of Network Algorithms . . . . .	194
22.2 The Echo Algorithm . . . . .	194
22.3 Synchronization in Acyclic Networks . . . . .	198
22.4 Consensus in the Network . . . . .	201
Exercises . . . . .	204
Further Reading . . . . .	204
<b>Part IV Conclusion</b>	
<b>23 Closing Remarks . . . . .</b>	<b>207</b>
23.1 A Brief History of Petri Nets . . . . .	207
23.2 Properties of the Elementary Formalisms of Petri Nets . . . . .	207
23.3 Speculative Questions . . . . .	209
23.4 Petri Nets in Software Engineering . . . . .	209
23.5 Reference to Other System Models and Analysis Techniques . . . . .	210
23.6 Other Introductory Texts . . . . .	210
<b>Formal Framework . . . . .</b>	<b>213</b>
<b>Bibliography . . . . .</b>	<b>225</b>
<b>Index . . . . .</b>	<b>229</b>
