

# Table of Contents

<b>Preface</b>	1
<b>Chapter 1: A Process for Success</b>	9
<b>The process</b>	10
<b>Business understanding</b>	11
Identifying the business objective	12
Assessing the situation	13
Determining the analytical goals	13
Producing a project plan	13
<b>Data understanding</b>	14
<b>Data preparation</b>	14
<b>Modeling</b>	15
<b>Evaluation</b>	16
<b>Deployment</b>	16
<b>Algorithm flowchart</b>	17
<b>Summary</b>	22
<b>Chapter 2: Linear Regression - The Blocking and Tackling of Machine Learning</b>	23
<b>Univariate linear regression</b>	24
Business understanding	27
<b>Multivariate linear regression</b>	33
Business understanding	33
Data understanding and preparation	34
Modeling and evaluation	37
<b>Other linear model considerations</b>	51
Qualitative features	51
Interaction terms	53
<b>Summary</b>	55
<b>Chapter 3: Logistic Regression and Discriminant Analysis</b>	57
<b>Classification methods and linear regression</b>	58
<b>Logistic regression</b>	58
Business understanding	59
Data understanding and preparation	60
Modeling and evaluation	65

	The logistic regression model	66
	Logistic regression with cross-validation	69
	<b>Discriminant analysis overview</b>	72
	Discriminant analysis application	75
	<b>Multivariate Adaptive Regression Splines (MARS)</b>	78
	<b>Model selection</b>	84
	<b>Summary</b>	87
<hr/>		
	<b>Chapter 4: Advanced Feature Selection in Linear Models</b>	89
	<b>Regularization in a nutshell</b>	90
	Ridge regression	91
	LASSO	91
	Elastic net	92
	<b>Business case</b>	92
	Business understanding	92
	Data understanding and preparation	93
	<b>Modeling and evaluation</b>	99
	Best subsets	99
	Ridge regression	103
	LASSO	108
	Elastic net	111
	Cross-validation with glmnet	114
	<b>Model selection</b>	116
	<b>Regularization and classification</b>	117
	Logistic regression example	117
	<b>Summary</b>	120
<hr/>		
	<b>Chapter 5: More Classification Techniques - K-Nearest Neighbors and Support Vector Machines</b>	121
	<b>K-nearest neighbors</b>	122
	<b>Support vector machines</b>	123
	<b>Business case</b>	127
	Business understanding	127
	Data understanding and preparation	128
	Modeling and evaluation	134
	KNN modeling	134
	SVM modeling	139
	Model selection	142
	<b>Feature selection for SVMs</b>	145
	<b>Summary</b>	147
<hr/>		
	<b>Chapter 6: Classification and Regression Trees</b>	149

<b>An overview of the techniques</b>	150
Understanding the regression trees	150
Classification trees	151
Random forest	152
Gradient boosting	153
<b>Business case</b>	154
Modeling and evaluation	154
Regression tree	154
Classification tree	158
Random forest regression	160
Random forest classification	163
Extreme gradient boosting - classification	167
Model selection	172
Feature Selection with random forests	172
<b>Summary</b>	175
<b>Chapter 7: Neural Networks and Deep Learning</b>	177
<b>Introduction to neural networks</b>	177
<b>Deep learning, a not-so-deep overview</b>	182
Deep learning resources and advanced methods	184
<b>Business understanding</b>	186
<b>Data understanding and preparation</b>	187
<b>Modeling and evaluation</b>	192
<b>An example of deep learning</b>	197
H2O background	198
Data upload to H2O	198
Create train and test datasets	200
Modeling	201
<b>Summary</b>	205
<b>Chapter 8: Cluster Analysis</b>	207
<b>Hierarchical clustering</b>	208
Distance calculations	209
<b>K-means clustering</b>	210
<b>Gower and partitioning around medoids</b>	211
Gower	212
PAM	213
<b>Random forest</b>	213
<b>Business understanding</b>	214
<b>Data understanding and preparation</b>	215
<b>Modeling and evaluation</b>	217

Hierarchical clustering	217
K-means clustering	227
Gower and PAM	231
Random Forest and PAM	233
<b>Summary</b>	235
<b>Chapter 9: Principal Components Analysis</b>	237
<b>An overview of the principal components</b>	238
Rotation	241
<b>Business understanding</b>	243
Data understanding and preparation	244
<b>Modeling and evaluation</b>	246
Component extraction	246
Orthogonal rotation and interpretation	247
Creating factor scores from the components	249
Regression analysis	250
<b>Summary</b>	256
<b>Chapter 10: Market Basket Analysis, Recommendation Engines, and Sequential Analysis</b>	257
<b>An overview of a market basket analysis</b>	258
<b>Business understanding</b>	259
<b>Data understanding and preparation</b>	260
<b>Modeling and evaluation</b>	262
<b>An overview of a recommendation engine</b>	266
User-based collaborative filtering	268
Item-based collaborative filtering	268
Singular value decomposition and principal components analysis	269
<b>Business understanding and recommendations</b>	273
<b>Data understanding, preparation, and recommendations</b>	273
<b>Modeling, evaluation, and recommendations</b>	276
<b>Sequential data analysis</b>	286
Sequential analysis applied	287
<b>Summary</b>	294
<b>Chapter 11: Creating Ensembles and Multiclass Classification</b>	295
<b>Ensembles</b>	296
<b>Business and data understanding</b>	297
<b>Modeling evaluation and selection</b>	298
<b>Multiclass classification</b>	301
<b>Business and data understanding</b>	302

<b>Model evaluation and selection</b>	306
Random forest	307
Ridge regression	309
<b>MLR's ensemble</b>	310
<b>Summary</b>	312
<b>Chapter 12: Time Series and Causality</b>	313
<b>Univariate time series analysis</b>	314
Understanding Granger causality	320
<b>Business understanding</b>	321
Data understanding and preparation	323
<b>Modeling and evaluation</b>	327
Univariate time series forecasting	327
Examining the causality	331
Linear regression	331
Vector autoregression	334
<b>Summary</b>	339
<b>Chapter 13: Text Mining</b>	341
<b>Text mining framework and methods</b>	342
<b>Topic models</b>	344
Other quantitative analyses	345
<b>Business understanding</b>	347
Data understanding and preparation	347
<b>Modeling and evaluation</b>	350
Word frequency and topic models	350
Additional quantitative analysis	355
<b>Summary</b>	364
<b>Chapter 14: R on the Cloud</b>	365
<b>Creating an Amazon Web Services account</b>	366
Launch a virtual machine	368
Start RStudio	372
<b>Summary</b>	374
<b>Appendix A: R Fundamentals</b>	375
<b>Getting R up-and-running</b>	375
<b>Using R</b>	381
<b>Data frames and matrices</b>	386
<b>Creating summary statistics</b>	388
<b>Installing and loading R packages</b>	392
<b>Data manipulation with dplyr</b>	393

308	Summary	396
<b>Appendix B: Sources</b>		
<hr/>		
<b>Index</b>		
<hr/>		
312	Summary	399
<hr/>		
<b>Chapter 12: Time Series and Causality</b>		
314	Univariate time series analysis	323
320	Understanding Granger causality	342
321	Business understanding	342
323	Data understanding and preparation	342
327	Modeling and evaluation	342
327	Univariate time series forecasting	342
331	Examining the causality	342
331	Orthogonal and Interpret	342
334	Creating factor scores from the components	342
334	Vector autoregression	342
338	Summary	342
<hr/>		
<b>Chapter 13: Text Mining</b>		
342	Text mining framework and methods	342
344	Topic models	342
345	Other quantitative analyses	342
347	Business understanding	342
347	Data understanding and preparation	342
350	Modeling and evaluation	342
350	Word frequency and topic models	342
352	Additional quantitative analysis	342
354	Summary	342
<hr/>		
<b>Chapter 14: R on the Cloud</b>		
362	Creating an Amazon Web Services account	362
368	Launch a virtual machine	362
372	Sequential data analysis	362
374	Summary	362
<hr/>		
<b>Appendix A: R Fundamentals</b>		
378	Getting R up and running	378
381	Using R	378
386	Data frames and matrices	378
388	Creating summary statistics	378
392	Installing and loading R packages	378
393	Data manipulation with dplyr	378
