Preface.....	xiii
Introduction.....	xv
1. The Propositional Calculus.....	1
1.1 Propositional Connectives: Truth Tables.....	1
1.2 Tautologies.....	6
1.3 Adequate Sets of Connectives.....	19
1.4 An Axiom System for the Propositional Calculus.....	27
1.5 Independence: Many-Valued Logics.....	36
1.6 Other Axiomatizations.....	39
2. First-Order Logic and Model Theory.....	45
2.1 Quantifiers.....	45
2.1.1 Parentheses.....	48
2.2 First-Order Languages and Their Interpretations: Satisfiability and Truth: Models.....	53
2.3 First-Order Theories.....	66
2.3.1 Logical Axioms.....	66
2.3.2 Proper Axioms.....	67
2.3.3 Rules of Inference.....	67
2.4 Properties of First-Order Theories.....	69
2.5 Additional Metatheorems and Derived Rules.....	73
2.5.1 Particularization Rule A4.....	74
2.5.2 Existential Rule E4.....	74
2.6 Rule C.....	78
2.7 Completeness Theorems.....	82
2.8 First-Order Theories with Equality.....	93
2.9 Definitions of New Function Letters and Individual Constants.....	102
2.10 Prenex Normal Forms.....	105
2.11 Isomorphism of Interpretations: Categoricity of Theories.....	111
2.12 Generalized First-Order Theories: Completeness and Decidability.....	113
2.12.1 Mathematical Applications.....	117
2.13 Elementary Equivalence: Elementary Extensions.....	123
2.14 Ultrapowers: Nonstandard Analysis.....	128
2.14.1 Reduced Direct Products.....	131
2.14.2 Nonstandard Analysis.....	136

2.15	Semantic Trees.....	140
2.15.1	Basic Principle of Semantic Trees	142
2.16	Quantification Theory Allowing Empty Domains	146
3.	Formal Number Theory.....	153
3.1	An Axiom System	153
3.2	Number-Theoretic Functions and Relations	169
3.3	Primitive Recursive and Recursive Functions.....	174
3.4	Arithmetization: Gödel Numbers	192
3.5	The Fixed-Point Theorem: Gödel's Incompleteness Theorem ...	205
3.6	Recursive Undecidability: Church's Theorem	218
3.7	Nonstandard Models.....	228
4.	Axiomatic Set Theory	231
4.1	An Axiom System	231
4.2	Ordinal Numbers.....	247
4.3	Equinumerosity: Finite and Denumerable Sets.....	260
4.3.1	Finite Sets	265
4.4	Hartogs' Theorem: Initial Ordinals—Ordinal Arithmetic.....	270
4.5	The Axiom of Choice: The Axiom of Regularity	282
4.6	Other Axiomatizations of Set Theory	293
4.6.1	Morse–Kelley (MK).....	293
4.6.2	Zermelo–Fraenkel (ZF)	294
4.6.3	The Theory of Types (ST).....	296
4.6.3.1	ST1 (Extensionality Axiom)	297
4.6.3.2	ST2 (Comprehension Axiom Scheme)	297
4.6.3.3	ST3 (Axiom of Infinity).....	298
4.6.4	Quine's Theories NF and ML.....	300
4.6.4.1	NF1 (Extensionality)	300
4.6.4.2	NF2 (Comprehension).....	301
4.6.5	Set Theory with Urelements.....	303
5.	Computability	311
5.1	Algorithms: Turing Machines	311
5.2	Diagrams	317
5.3	Partial Recursive Functions: Unsolvability Problems.....	325
5.4	The Kleene–Mostowski Hierarchy: Recursively Enumerable Sets	341
5.5	Other Notions of Computability.....	355
5.5.1	Herbrand–Gödel Computability	355
5.5.2	Markov Algorithms	362
5.6	Decision Problems	373

Appendix A: Second-Order Logic 379

Appendix B: First Steps in Modal Propositional Logic 395

Appendix C: A Consistency Proof for Formal Number Theory 407

Answers to Selected Exercises 419

Bibliography..... 451

Notations 467

Index..... 473
