
Contents

1	The Context of Forest Nutrition Management	1
	The Nutrients	2
	History of Forest Nutrition Management	8
	General References	14
2	Nutrient Cycling	16
	Chemistry Review	16
	Nutrient Release from Litter	19
	Uptake of Nutrient Ions	23
	Nutrient Cycling Within Plants	28
	Nutrient Return to the Soil	32
	Plant Effects on Nutrient Availability	33
	Nutrient Input and Output	37
	Measuring Nutrient Cycles	45
	Nutrient Cycling and Forest Nutrition	46
	General References	49
3	The Major Nutrient Cycles	50
	The Potassium Cycle	50
	The Phosphorus Cycle	51
	The Nitrogen Cycle	57

The Sulfur Cycle	65
Nutrient Cycles and H ⁺ Budgets	67
Managing Nutrient Cycles	73
General References	73
4 Forest Nutrition Assessment	74
Fertilization Trials	75
Correlations with Fertilization Response	78
Soil Assays—Total Nutrients	84
Soil Assays—Nitrogen Availability	87
Soil Assays—Phosphorus, Sulfur and Cation Availability	95
Foliar Nutrient Assays	98
Site Classification	105
General References	106
5 Fertilization	108
Fertilizer Chemistry	110
Fertilizer Uptake and Cycling	115
Stand Growth Responses	118
General References	132
6 Biological Nitrogen Fixation	133
Biology of Nitrogen Fixation	135
Effects on Nutrient Cycling	142
Silvicultural Systems	147
Multiple Resource Impacts	158
General References	159
7 Harvesting, Site Preparation, and Regeneration	161
Forest Harvest	161
Site Preparation and Regeneration	172
General References	186
8 Special Cases in Forest Nutrition Management	188
Nurseries	188
Christmas Trees and Seed Orchards	195
