<i>List of plates, figures, tables and boxes</i>	<i>xii</i>
<i>About the authors</i>	<i>xvi</i>
<i>Foreword</i> by Kofi A Annan	<i>xix</i>
<i>Preface</i> by Klaus Töpfer	<i>xxi</i>
<i>Acknowledgements</i>	<i>xxv</i>
<i>Introduction and reader's guide</i>	<i>xxvii</i>
1 The science of ozone depletion: From theory to certainty	1
Introduction	1
Early theories: Scientists identify and name ozone	2
Modern scientists hypothesize threats to ozone	6
Discovering and measuring the Antarctic ozone 'hole'	13
International scientific teams link CFCs and ozone depletion	19
First assessment, 1989: 1987 Protocol inadequate, total phase-out required	24
Second assessment, 1991: Quicker phase-out possible, control HCFCs and methyl bromide	29
Expedition finds significant depletion over the northern hemisphere	31
Third assessment, 1994: Mount Pinatubo volcano depletes ozone, Arctic ozone depletion confirmed	32
Fourth assessment, 1998: Montreal Protocol working, ODSs in the atmosphere peak in 1994	35
The ozone layer today	40
2 Diplomacy: The beginning, 1974–1987	42
Introduction	42
The World Plan of Action, 1977	45
Coordinating Committee on the Ozone Layer (CCOL) and the Ozone Layer Bulletins	48
Harmonizing national policies, 1979–1981	50
The Governing Council sets up a negotiating group, 1981	51
Ad Hoc Working Group of Legal and Technical Experts, 1982	53
First draft convention and discussions, 1982	55
First specific proposal to control CFCs, 1983	57
Further negotiations, 1983–1985	58
The Vienna Convention for the Protection of the Ozone Layer, 1985	63
First comprehensive scientific assessment, 1985	66

Economic and environmental workshops, 1986	67
Negotiations on the protocol, 1986–1987	72
Focusing on the key questions	75
The ‘breakthrough’ session, April 1987	78
Seventh draft protocol, 1987, and country comments	81
The Montreal Protocol on Substances that Deplete the Ozone Layer, 1987	84
3 Diplomacy: From strength to strength, 1988–1992	95
Introduction	95
Preparations for the entry into force of the Convention and the Protocol	96
Dissatisfaction of major developing countries	100
First Meeting of the Parties, Helsinki, 1989: Resolve to phase out by 2000	102
Preparatory work for the Second Meeting of the Parties	109
Discussions on the financial mechanism, control measures and technology, 1990	116
Second Meeting of the Parties, London, 1990: Phase-out by 2000 and US\$240 million fund approved	120
Preparatory work for the third Meeting of the Parties	128
Third Meeting of the Parties, Nairobi, 1991: Import of products with CFCs banned from non-Parties	129
Further progress in 1991	132
Proposals to accelerate the phase-out	134
Multilateral Fund or Global Environment Facility?	135
Earth Summit, Rio de Janeiro, 1992	135
Opposition to methyl bromide controls	136
Faster phase-outs welcomed by industrialized countries	137
Incremental costs	137
Fourth Meeting of the Parties, Copenhagen, 1992: HCFCs, methyl bromide controlled, Fund confirmed	138
4 Diplomacy: Racing towards success, 1993–2001	145
Introduction	145
Fifth Meeting of the Parties, Bangkok, 1993: Second replenishment of the Fund by US\$455 million	146
Sixth Meeting of the Parties, Nairobi, 1994: Russian Federation gives notice of non-compliance	149
Third reports of the assessment panels, 1994	153
Review of control measures and financial mechanism for developing countries, 1995	154
Proposals for adjustments before working group meetings, 1995	156
Seventh Meeting of the Parties, Vienna, 1995: Further strengthening of the control measures	158
Meetings in 1996: Illegal trade discussed, replenishment of the Fund by US\$466 million in San Jose, Costa Rica	163

Tenth anniversary, Montreal, 1997: Control measures on methyl bromide tightened	167
Meetings in 1998: 1998 assessment confirms Protocol working, tenth Meeting of the Parties in Cairo discusses link between ozone depletion and climate change, non-compliance	171
Meetings in 1999: Beijing Amendment, freeze in production of HCFCs and trade restrictions, replenishment of the Fund by US\$440 million	174
Twelfth Meeting of the Parties, Ouagadougou, 2000: Further attempts to tighten controls on HCFCs	179
Meetings in 2001: Thirteenth Meeting of the Parties in Colombo, non-compliance, new ODS	181
5 Technology and business policy	187
Introduction	187
Commercial history of ozone-depleting substances	188
Industry opposition and then support for regulation of ozone-depleting substances	197
Industry response to the Montreal Protocol: What a difference a treaty makes!	201
Industry and military motivations for leadership on ozone protection	205
Phasing out ozone-depleting substances from US military applications	211
Alternatives: Criteria and evolution after the Montreal Protocol	214
Technical strategies to reduce and eliminate ozone-depleting substances	221
Environmental perspective on substitutes and alternatives	225
Economics of phasing out ozone-depleting substances	228
6 Implementation of the Montreal Protocol	234
Introduction	234
Structure of the obligations of the Montreal Protocol	235
The role and activities of the Multilateral Fund for the Implementation of the Montreal Protocol	236
Multilateral Fund replenishment and contributions	244
Implementing agencies of the Multilateral Fund	246
The Global Environment Facility (GEF)	249
The role of national governments	252
The role of government agencies as customers and market leaders	258
The role of industry and industry non-governmental organizations	263
Regulations force new technologies	265
Regional and bilateral cooperation	268
The role of conferences and workshops	268
The role of environmental NGOs	268
The role of professional membership organizations	271
The importance of awareness campaigns	271

7	Compliance with the Montreal Protocol	274
	Introduction	274
	Reporting on compliance measures	275
	The role of the Implementation Committee	276
	Results of implementation, 1989–1999	278
	Non-compliance by Parties with economies in transition	281
	Compliance by developing countries operating under Article 5	284
	The response of the Meetings of the Parties to non-compliance	285
	Conclusion	288
8	Media coverage of the ozone-layer issue	290
	Introduction	290
	Analysis of media coverage	290
	Media coverage of seminal ozone-layer events	293
	The Molina–Rowland Hypothesis, 1974–1975	294
	US ban on CFC aerosol products, 1977–1978	297
	The discovery of the Antarctic ozone hole, 1985	299
	Negotiating and signing the Montreal Protocol, 1987	300
	London Conference on Saving the Ozone Layer, 1989	303
	Second Meeting of the Parties, London, 1990	308
	Fourth Meeting of the Parties, Copenhagen, 1992	314
	Ninth Meeting of the Parties, Montreal, 1997	317
	Eleventh Meeting of the Parties, Beijing, 1999	319
9	Environmental NGOs, the ozone layer and the Montreal Protocol	323
	Introduction: NGOs as ‘shapers of policy’	323
	The role of environmental NGOs in the ozone campaign	324
	Litigation and collaboration: Complementary approaches	332
	Raising awareness and generating media coverage	333
	Advocacy work on policy and alternative technologies	336
	Working with industry and government	339
	Boycotting ODS products and creating demand for ozone-friendly products	342
	Monitoring implementation of the Montreal Protocol	343
	Conclusion	344
10	Conclusion: A perspective and a caution	345
	The successes of the ozone regime	345
	Why was the ozone regime successful?	346
	Lessons from the development of the Montreal Protocol	351
	Features of the Protocol promoting participation	353
	Partnership led by science and technology	358
	Why did industry cooperate: Regulation or availability of alternatives to ODSs?	361
	Caution for the future	362
