List of Contributors	xix
Preface to the First Edition	xxiii
Introduction to the Second Edition	xxv

1. Bridging the Category Divide: Introduction to the First Edition	1
HENRI COHEN AND CLAIRE LEFEBVRE	
1.1 Introduction	1
1.2 Organization of the Book	2
1.3 Major Common Themes	8
1.4 Bridging the Category Divide	15
References	17

I

CATEGORIZATION IN COGNITIVE SCIENCE

2. To Cognize is to Categorize: Cognition is Categorization	21
STEVAN HARNAD	
2.1 Sensorimotor Systems	23
2.2 Invariant Sensorimotor Features ("Affordances")	23
2.3 Categorization	23
2.4 Learning	24
2.5 Innate Categories	25
2.6 Learned Categories	26
2.7 Supervised Learning	26
2.8 Instrumental (Operant) Learning	27
2.9 Color Categories	28
2.10 Categorical Perception	28
2.11 Learning Algorithms	29
2.12 Unsupervised Learning	30
2.13 Supervised Learning	31
2.14 Vanishing Intersections?	32
2.15 Direct Sensorimotor Invariants	33
2.16 Abstraction and Hearsay	34
2.17 Abstraction and Amnesia	34
2.18 Invariance and Recurrence	35

2.19 Feature Selection and Weighting	36
2.20 Discrimination Versus Categorization	37
2.21 Recoding and Feature Selection	38
2.22 Learned Categorical Perception and the Whorf Hypothesis	40
2.23 Uncertainty Reduction	43
2.24 Explicit Learning	44
2.25 Categorization is Abstraction	44
2.26 Sensorimotor Grounding: Direct and Indirect	44
2.27 The Adaptive Advantage of Language: Hearsay	45
2.28 Grounding Instruction in Induction	46
2.29 Numbers' Affordances	47
2.30 Absolute Discriminables and Affordances	47
2.31 Cognitive Science is Not Ontology	48
2.32 "Abstract" Categories	48
2.33 Cognition is Categorization	49
References	49
Appendix A There is Nothing Wrong With the "Classical Theory" of Categorization	52
Appendix B Associationism Begs the Question of Categorization	54
3. The Role of Top-Down and Bottom-Up Mechanisms in the Maintenance of the Self-Concept: A Behavioral and Neuroscience Review	55
RACHEL AMEY AND CHAD E. FORBES	
3.1 Bottom-Up Behavioral and Neurological Processes	57
3.2 Top-Down Behavioral and Neurological Processes	63
3.3 Top-Down and Bottom-Up Processes Influence One Another to Maintain the Self-Concept	68
3.4 Conclusion	70
References	71
4. Categories and Cognitive Anthropology	75
JAMES S. BOSTER	
4.1 Introduction	76
4.2 Cognition and Culture, Universalism, and Relativism	77
4.3 Paradigms and Taxonomies	78
4.4 Kinship Terminologies	86
4.5 Color Classification	92
4.6 Ethnobiology	96
4.7 Towards a Science of the Stimulus	102
References	104
5. Emotion Categorization	107
URSULA HESS	
5.1 Emotion Production	109

5.2 Are Emotions Natural Kinds?	111
5.3 Emotion Perception	115
5.4 Conclusion	120
Acknowledgments	121
References	121

6. Philosophical Analysis as Cognitive Psychology: The Importance of Empty Concepts 127

GEORGES REY

6.1 Introduction	128
6.2 Misadventures of the Classical View	129
6.3 Terminological Issues	132
6.4 The Inadequacies of Externalism	135
6.5 The Need for Internal Roles	141
6.6 A Possible Convergence on a Positive Proposal	147
6.7 Conclusion	150
References	151

II

NEUROSCIENCE OF CATEGORIZATION AND CATEGORY LEARNING

7. Multiple Systems of Perceptual Category Learning: Theory and Cognitive Tests 157

F. GREGORY ASHBY AND VIVIAN V. VALENTIN

7.1 Introduction	158
7.2 Rule-Based Versus Information-Integration Category Learning Tasks	159
7.3 COVIS	162
7.4 Conclusions	178
Acknowledgments	180
References	180

8. The Neuropsychology of Perceptual Category Learning 189

JESSICA L. ROEDER, W. TODD MADDOX, AND J. VINCENT FILOTEO

8.1 Introduction	190
8.2 General Discussion	218
Acknowledgments	221
References	221

9. Categorization in Neuroscience: Brain Response to Objects and Events 227

CATHERINE HANSON AND STEPHEN J. HANSON

9.1 Introduction	228
------------------	-----

9.2 Representing Object Categories in the Brain	230
9.3 Acquiring Category Knowledge	235
9.4 Categorizing Actions and Events	240
9.5 Conclusion	247
References	249

10. Neural Regions Associated With Categorical Speech Perception and Production 253

SUSAN M. RAVIZZA

10.1 Introduction	254
10.2 Evidence for Categorical Speech Processing	255
10.3 Prefrontal Regions and Motor Speech Categories	258
10.4 Temporal–Parietal Regions and Acoustic Speech Categories	263
10.5 Cerebellar Contributions to Categorical Production and Perception	264
10.6 Concluding Remarks	266
References	267

11. Food Perception and Categorization: From Food/No-Food to Different Types of Food 271

FRANCESCO FORONI AND RAFFAELLA I. RUMIATI

11.1 Concepts and Categories	273
11.2 Food Perception and Categorization	274
11.3 Inside Food Categories	275
11.4 Food Semantics and Neuropsychology	277
11.5 Natural Food Versus Transformed Food	278
11.6 Perceiver's Characteristics in Food Processing	281
11.7 Conclusions	282
References	283

III

SEMANTIC CATEGORIES

12. Semantic Categorization 291

BRENDAN S. GILLON

12.1 Introduction	291
12.2 The Notional Approach to Lexical Categories	293
12.3 The Notional Approach to Lexical Subcategories	294
12.4 Structural Approach to Semantic Categories	297
12.5 Coordinators and Subordinators	301
12.6 English Nouns	308
12.7 Conclusion	310
Acknowledgments	310
References	311

13. Emotion Categories Across Languages	313
JAMES S. BOSTER	
13.1 Introduction	314
13.2 Methods of Assessing Cultural Emotion Systems	317
13.3 Theories of Emotion	338
13.4 Cross-Cultural Scenarios as a Tool to Compare Emotion Categories	342
13.5 Conclusion	348
Acknowledgments	350
References	350
14. Relations Between Language and Thought: Individuation and the Count/Mass Distinction	353
ANNA PAPAFRAGOU	
14.1 Introduction	354
14.2 Strong Discontinuity Proposals	357
14.3 Weak Discontinuity Proposals	361
14.4 Material and Shape Cues in Labeling and Categorization	367
14.5 Conclusion	371
Acknowledgments	371
References	371
15. Event Categorization in Sign Languages	377
SANDRO ZUCCHI	
15.1 Categorization in Spoken Languages	378
15.2 Categorization of Events in Sign Languages	380
15.3 Dual-Representation Languages	382
15.4 Classifier Predicates as Polymorphemic	384
15.5 The Double Life of Classifier Predicates	386
15.6 Classifier Predicates as Demonstrative Predicates	392
15.7 Summary	395
References	396
16. Semantic Categories in Acquisition	397
EVE VIVIENNE CLARK	
16.1 Introduction	398
16.2 Space	399
16.3 Shape	403
16.4 Adding Common Ground	405
16.5 Conceptual Domains and Lexical Options	406
16.6 Adding Meaning in the Course of Conversation	411
16.7 Universals in Mapping?	413
16.8 Conclusion	416
References	417

17. Atoms, Categorization, and Conceptual Change	423
PAUL THAGARD AND ETHAN TOOMBS	
17.1 Introduction	424
17.2 Theories of Concepts	425
17.3 The Ancient Concept of an Atom	427
17.4 Revival of the Concept of the Atom	428
17.5 Modern Development of the Concept of an Atom	430
17.6 Theories and Meaning	433
17.7 Conclusion	435
References	435

IV

SYNTACTIC CATEGORIES

18. Lexical, Functional, Crossover, and Multifunctional Categories	439
LISA DEMENA TRAVIS	
18.1 Introduction	440
18.2 Categories as Feature Bundles	441
18.3 Categories and Phrase Structure	445
18.4 Where do Categorial Distinctions Reside?	458
18.5 Conclusions	467
Acknowledgments	468
References	468
19. Isolating-Monocategorial-Associational Language	471
DAVID GIL	
19.1 Introduction	472
19.2 What IMA Language is Like	472
19.3 Where IMA Language is Found	478
19.4 Typology	485
19.5 Cognition	505
Acknowledgments	507
References	507
20. Linguistic Categories in Language Contact: Modularity and Diversity	511
PIETER MUYSKEN	
20.1 Introduction: Modularity and Diversity	512
20.2 Code-Switching	522
20.3 Lexical Categories in Borrowing	532
20.4 Categories in Creole Language Formation	539
20.5 Conclusion	544
Acknowledgments	545
References	545

21. Syntactic Categorization in Sign Languages	549
NATASHA ABNER	
21.1 Categories Across Modalities	550
21.2 Lexical vs. Functional Categories in Sign Languages	551
21.3 Lexical Categories in Sign Languages	555
21.4 Categorical Alternations in Sign Languages	558
21.5 What are the Categorical Atoms?	562
References	563
22. Syntactic Categories in Child Language Acquisition: Innate, Induced, or Illusory?	567
BEN AMBRIDGE	
22.1 Introduction	568
22.2 Innate Syntactic Categories	569
22.3 Induced Syntactic Categories	571
22.4 Illusory Syntactic Categories	574
22.5 Conclusion	576
Acknowledgments	577
References	577
23. Syntactic Categories in Second Language Acquisition	581
LYDIA WHITE	
23.1 Introduction	582
23.2 Lexical and Functional Categories	582
23.3 Lexical Categories in L2 Acquisition	583
23.4 Functional Categories in Acquisition: Issues of Evidence	585
23.5 Functional Categories in the L2 Initial State and in L2 Development	589
23.6 Acquiring Versus Losing Categories and Features	593
23.7 Discussion	598
References	599

V

DEVELOPMENT OF CATEGORIES

24. Constructing Race: How People Categorize Others and Themselves in Racial Terms	607
GANDALF NICOLAS AND ALLISON L. SKINNER	
24.1 Racial Phenotypicality	609
24.2 Ancestry	613
24.3 Cue Disambiguation	614
24.4 Intersectionality	616
24.5 Observer Differences in Personality and Motivation	618

24.6	Observer Differences in Familiarity With Racial Groups	619
24.7	The Development of Racial Categorizations	621
24.8	Self-Categorization	623
24.9	Methodological Developments	624
24.10	Emerging Theoretical Perspectives	626
24.11	Conclusion	629
	References	629
25.	How Experience Affects Infants' Facial Categorization	637
	JENNIFER L. RENNELS AND ANDREA J. KAYL	
25.1	Categorization of Faces Based on Gender	640
25.2	Categorization of Faces Within the Two Gender Categories	643
25.3	Categorization of Faces Based on Race	646
25.4	Conclusions	649
	References	649
26.	The Development of Object Categories: What, When, and How?	653
	DIANE POULIN-DUBOIS AND SABINA PAUEN	
26.1	Introduction	654
26.2	Object Categorization	655
26.3	Methods for Studying Object Categorization in Early Childhood	655
26.4	The Development of Categorization in Early Childhood	657
26.5	Is Language a Facilitator of Category Formation?	662
26.6	Conclusions	664
	References	666
27.	Categorization and Aging	673
	RAKSHA A. MUDAR AND HSUEH-SHENG CHIANG	
27.1	Categorization in Normal Aging and Dementia	674
27.2	The Role of Cognitive Control in Categorization	677
27.3	Effects of Semantic Categorization on Cognitive Control	679
27.4	Conclusion	682
	References	682
28.	Auditory and Phonetic Category Formation	687
	MARTIJN GOUDBEEK, ROEL SMITS, ANNE CUTLER, AND DANIEL SWINGLEY	
28.1	Introduction	688
28.2	Testing Category Learning	690
28.3	Learning of Nonspeech Categories	693
28.4	Learning of Speech Categories	699
28.5	Conclusion	704
	References	706

29. Perceptual and Abstract Category Learning in Pigeons	709
LEYRE CASTRO AND EDWARD A. WASSERMAN	
29.1 Introduction	710
29.2 Perceptual or Similarity-Based Category Learning	712
29.3 Abstract or Relational Category Learning	718
29.4 The Role of Number of Items in Category Learning	722
29.5 Perceptual Versus Abstract Processes	724
29.6 Concluding Comments	728
References	729

VI

GROUNDING AND CATEGORIES IN PERCEPTION AND INFERENCE

30. Situated Conceptualization	735
LAWRENCE W. BARSALOU	
30.1 Introduction	736
30.2 Grounding the Conceptual System in the Modalities	738
30.3 Empirical Evidence	746
30.4 Conclusion	764
Acknowledgments	767
References	767
31. The Construction of Category Membership Judgments: Towards a Distributed Model	773
ASHER KORIAT AND HILA SORKA	
31.1 Introduction	774
31.2 The Classical View	775
31.3 Subsequent Proposals	776
31.4 Our Proposal	777
31.5 The Self-Consistency Model of Subjective Confidence	778
31.6 Empirical Evidence	781
31.7 The Effects of Context on Category Membership Decisions	787
31.8 Conclusion	789
Acknowledgment	791
References	791
32. Connectionist and Robotics Approaches to Grounding Symbols in Perceptual and Sensorimotor Categories	795
ANGELO CANGELOSI	
32.1 Cognitive Symbol Grounding	796
32.2 Linking Vision and Language: Connectionist Approaches to Category Learning and Symbol Grounding	801

32.3	Linking Vision, Action, and Language: Embodied Approaches to Language Learning and Evolution	807
32.4	Discussion and Conclusion	813
	References	816
33.	Embodied Categorization	819
	PIERRE POIRIER, BENOIT HARDY-VALLÉE, AND JEAN-FRÉDÉRIC DEPASQUALE	
33.1	Introduction: Embodied Categorization	820
33.2	Purely Reactive Categorizers	823
33.3	Reactive Categorizers that Learn	828
33.4	Representing Categorizers	830
33.5	Emulating and Simulating Categorizers	833
33.6	Analogizing Categorizers	842
33.7	Linguistic Categorizers	844
33.8	Conclusion	845
	Acknowledgments	846
	References	846
34.	The Construction of Perceptual and Semantic Features During Category Learning	851
	ROBERT L. GOLDSTONE, BRIAN J. ROGOSKY, RACHEL PEVTZOW, AND MARK BLAIR	
34.1	The Construction of Perceptual and Semantic Features During Category Learning	852
34.2	Concept Learning and Perception	853
34.3	Semantic Reorganization During Category Learning	865
34.4	Conclusions to Semantic Reorganization	873
34.5	Integrating Perceptual and Semantic Reorganization	874
	Acknowledgments	879
	References	879
35.	Categorization, Reasoning, and Memory From a Neo-Logical Point of View	883
	SERGE ROBERT	
35.1	Order, Information, and Categories	884
35.2	Inferences, Arguments, and Information	885
35.3	Logical and Creative Arguments	886
35.4	Types of Creative Arguments	887
35.5	Two Hardly Compatible Views in Cognitive Science	889
35.6	Experiments on Memory and Logical Competence	890
35.7	Logical Weakness and Classification of Errors	893
35.8	A New Theory of Logical Error and Logical Competence	895
35.9	The Cognitive Functions of Logic	896
35.10	Corrective Inferences and Cognitive Progress	898
35.11	The Fundamental Cognitive Function of Logical Reasoning	900

35.12 The Mind as a Dynamic System: Inference and Memory	901
35.13 General Conclusions: Categorization, Reasoning, and Memory	901
References	903
36. The Time Course of Object, Scene, and Face Categorization	905
LAURENT CAPLETTE, ÉRIC McCABE, CAROLINE BLAIS, AND FRÉDÉRIC GOSSELIN	
36.1 A Model of Categorization	906
36.2 The Basic-Level Literature	909
36.3 The Need for Flexibility and a Paradox	910
36.4 Categorization as an Iterative Process	913
36.5 General Discussion	922
References	924
37. The Return of Concept Empiricism	931
JESSE J. PRINZ	
37.1 Introduction	932
37.2 Concept Empiricism	933
37.3 The Abstract Ideas Objections	946
References	949

VII

MACHINE CATEGORY LEARNING AND DATA MINING

38. Category Formation in Self-Organizing Embodied Agents	953
STEFANO NOLFI	
38.1 Introduction	954
38.2 The Method	955
38.3 Categories Emerging From the Interaction Between the Agent and the Environment	955
38.4 Action-Mediated Sensory States	963
38.5 Integrating Sensorimotor Information Over Time and the Emergence of Complex Internal Categories	970
38.6 Conclusions	974
Acknowledgments	974
References	974
39. Concept Learning and Nonmonotonic Reasoning	977
PETER GÄRDENFORS	
39.1 The Role of Concepts	978
39.2 Three Kinds of Cognitive Representations	979
39.3 Learning in Symbolic Systems	979
39.4 Learning in Connectionist Systems	980

39.5	Conceptual Spaces as a Representational Framework	981
39.6	The Origin of Quality Dimensions	983
39.7	Properties and Concepts	985
39.8	Prototypes and Conceptual Spaces	987
39.9	Learning in Conceptual Spaces	988
39.10	The Role of Similarity in Learning	991
39.11	Nonmonotonic Aspects of Concepts	993
39.12	Conclusion	997
	References	997
40.	Categorization in Symbolic Data Analysis	1001
	EDWIN DIDAY	
40.1	Introduction	1003
40.2	Categories, Concepts, and Symbolic Data	1005
40.3	Symbolic Data Tables and Their Background Knowledge, Concepts, and Categories	1009
40.4	Modeling Concepts by "Symbolic Objects," With Certain Philosophical Aspects	1012
40.5	Tools for Symbolic Objects	1017
40.6	Underlying Structures of Symbolic Objects	1020
40.7	Steps and Tools for Symbolic Data Analysis	1022
40.8	Overview of SODAS	1024
40.9	Final Remarks	1025
	Epilogue	1025
	References	1025
41.	An Information-Based Discussion of Borderline Cases in Categorization: Six Scenarios Leading to Vagueness	1029
	DIDIER DUBOIS, FRANCESC ESTEVA, LLUIS GODO, AND HENRI PRADE	
41.1	Introduction	1030
41.2	The Information Framework	1032
41.3	Classical Versus Gradual Properties	1033
41.4	Precisely Defined Versus Ill-Defined Properties	1039
41.5	Refining Precisely Defined Properties Using Closeness Relations	1042
41.6	Single Agent Versus Multiple Agents	1043
41.7	Ill-Known Attribute Values and Twofold Sets	1045
41.8	Approximately Described Sets	1046
41.9	Concluding Remarks	1047
	References	1048
42.	The Neurodynamics of Categorization: Critical Challenges and Proposed Solutions	1053
	MATTHEW ROSS, SYLVAIN CHARTIER, AND SÉBASTIEN HÉLIE	
42.1	Introduction	1054
42.2	Recurrent Auto-Associative Memory (RAM)	1056
42.3	The Problem of Divergence	1058

42.4	The Solution of Dual Hebbian/Anti-Hebbian Learning	1059
42.5	The Solution of Using a Nonlinear Model	1061
42.6	The Problem of Being Only Auto-Associative Memory	1063
42.7	The Solution of Using Heteroassociative Memory	1063
42.8	The Problem of a Limited Storage Capacity and Tolerance to Noise	1065
42.9	Bidirectionnal Heteroassociative Memory	1065
42.10	The Problem of Noise	1066
42.11	The Solution of Dimensionality Reduction	1067
42.12	A Hybrid Model	1070
42.13	Prototype Development Task	1072
42.14	Conclusion	1073
	References	1074

43. Genre-Specific Text Mining and Extensional Inductive Concept Recognition: A Pseudocognitive Approach 1077

YVES KODRATOFF

43.1	Introduction to and Definition of Text Mining	1078
43.2	Text Retrieval	1081
43.3	Standardization	1082
43.4	Grammatical Tagging	1082
43.5	Terminology	1086
43.6	Concept Recognition in Texts	1087
43.7	Conclusion	1095
	Acknowledgments	1096
	References	1096

44. Graph Matching, System Design and Knowledge Modeling 1099

GUY W. MINEAU

44.1	Introduction	1100
44.2	Knowledge Represented as Graph Structures	1102
44.3	Learning Heuristic Knowledge	1105
44.4	Viability Conditions	1106
44.5	The Complexity of Learning	1107
44.6	Categorization of Knowledge in Layers	1109
44.7	Conclusion	1110
	References	1111

VIII

THE NATURALIZATION OF CATEGORIES

45. Nominalism and the Theory of Concepts 1115

CLAUDE PANACCIO

45.1	Nominalism	1116
45.2	Ockham's Cleaver	1118

45.3 Motivations	1122
45.4 Nominalistic Constraints for the Theory of Concepts	1125
References	1131
46. Why Do We Think Racially? Culture, Evolution, and Cognition	1135
EDOUARD MACHERY AND LUC FAUCHER	
46.1 Introduction	1136
46.2 Is Racism a Mere Social Construct?	1138
46.3 Is Racism a Byproduct of a Human Kind Module?	1143
46.4 Are Races Mere Coalitions?	1153
46.5 Is Racism a Byproduct of an Evolved Ethnic Cognitive System?	1159
46.6 Conclusion	1168
Acknowledgments	1169
References	1169
47. How Language Influences the Way We Categorize Hybrids	1177
YESHAYAHU SHEN AND DAVID GIL	
47.1 Introduction: Visual Hybrids and Their Significance	1178
47.2 The Ontological Hierarchy	1181
47.3 Empirical Studies of the Categorization of Hybrids	1183
47.4 Discussion	1196
47.5 Conclusion	1198
Acknowledgments	1199
References	1199
48. Neurosemantics and Categories	1201
CHRIS ELIASMITH	
48.1 Introduction	1202
48.2 Mental Representations as Neural Codes	1206
48.3 The Meaning of Neural Representations: Neurosemantics	1210
48.4 Spaun	1217
48.5 Misrepresentation	1218
48.6 Conclusion	1222
References	1222
Index	1225
