PREFACE	17
INTRODUCTION	19
SOME PRACTICAL REMARKS	19
HISTORY TAKING	20
1. BASIC NEUROLOGY	21
1.1 PHYSICAL EXAMINATION	24
1.2 THE SPECIAL NEUROLOGICAL EXAMINATION	26
1.2.1 EVALUATION of CONSCIOUSNESS.....	26
1.2.2 EVALUATION of the MENTAL STATE	28
1.2.3 EVALUATION of the GENERAL PHYSICAL STATE	28
1.2.4 SPECIFIC EXAMINATION of the HEAD	28
1.2.5 EVALUATION of FACIAL NERVE REFLEXES	28
1.3 CRANIAL NERVES	29
1.3.1 THE FIRST CRANIAL/ OLFACTORY NERVE	29
1.3.2 SECOND CRANIAL/OPTIC NERVE	30
1.3.3 OPHTHALMOGYRIC NERVES, THIRD, FORTH, and SIXTH CRANIAL NERVES	33
1.3.4 FIFTH CRANIAL/TRIGEMINAL NERVE.....	40
1.3.5 SEVENTH CRANIAL/ INTERMEDIO- FACIAL NERVES	41
1.3.6 EIGHTH CRANIAL/ VESTIBULOCOCHLEAR NERVE.....	45
1.3.7 The 9 th – 10 th CRANIAL NERVES – GLOSSOPHARYNGICUS and VAGUS NERVES	47
1.3.8 ELEVENTH CRANIAL/ ACCESSORY NERVE	48
1.3.9 TWELFTH CRANIAL/ HYPOGLOSSAL NERVE.....	48
1.4 NEUROLOGICAL EXAMINATION	50
1.5 EVALUATION OF THE UPPER LIMBS	51
1.5.1 Upper limb dexterity testing	51
1.5.2 Joint mobility and muscular performance	51
1.5.3 Radial artery pulse	51
1.5.4 During costoclavicular space examination	51
1.5.5 Aspection evaluates muscle nutrition/wasting	52
1.5.6 Muscle tone – tension	52
1.5.7 Finger-nose testing	52
1.5.8 Positive rebound examination	53
1.5.9 Investigation of muscle power	53
1.6 REFLEX EVALUATION	53
1.7 UPPER LIMB EXAMINATION	53
1.7.1 Upper limb examination	53
1.7.2 Evaluation of an individual muscle reflex	54
1.7.3 Examination of the deep joint reflexes	54
1.8 TRUNK EVALUATION	55
1.8.1 Functional vertebral column examinations	55
1.8.2 Trunk muscle elasticity, tone, and power	56
1.8.3 Superficial/skin abdominal reflexes	56

1.8.4 Cremasteric reflex	56
1.9 EXAMINATION OF THE LOWER LIMBS	57
1.9.1 Coordination	57
1.9.2 Physiologic reflexes	57
1.9.3 Pathological reflexes or pyramidal signs	57
1.10 COMMON SENSORY FUNCTION - SENSATION EVALUATION	58
1.10.1 Evaluation of particular modalities	58
1.10.2 Evaluation of pain	59
1.10.3 Additional modality analysis	61
1.11 EVALUATION OF THE POSTURE	64
1.12 THE CEREBELLUM	65
1.12.1 FUNCTIONAL CEREBELLAR DIFFERENTIATION	66
1.12.2 CEREBELLAR FUNCTIONS	66
1.12.3 CEREBELLAR DISEASES AND CLINICAL MANIFESTATIONS	67
1.12.4 CEREBELLAR REGION SYNDROMES	67
1.12.5 CEREBELLAR FUNCTION INVESTIGATION	68
1.12.6 CEREBELLAR INVESTIGATION	69
1.13 EVALUATION OF UNCONSCIOUS SUBJECTS	70
1.13.1 REVIEWS	71
1.13.2 NEUROBIOLOGY OF CONSCIOUSNESS – Conscious experience as an INNER PSYCHIC WORLD	71
1.13.3 The Next Nerve Correlate Of Consciousness (NCC) Frontier – Neuronal Interiors And The Cytoskeleton	73
1.14 EVALUATION of SPEECH and LANGUAGE	75
1.14.1 Speech Disorder Articulations	75
1.14.2 Language Disorders	76
1.15 EVALUATION OF PSYCHOGENIC PSEUDOPARALYSIS	79
1.16 NEUROLOGICAL EVALUATION OF INFANTS/CHILDREN	80
1.17 SURVEY OF MOTOR FUNCTION EVALUATION	83
2. ANCILLARY INVESTIGATIONS	86
2.1 CEREBROSPINAL FLUID (CSF)	86
2.1a Technique of lumbar puncture - LP	87
2.2 CSF – NORMAL FINDING	88
2.3 CSF - PATHOLOGY	89
3. CONVENTIONAL RADIOGRAPHIC TECHNIQUES	92
3.1 THE SKULL RADIOGRAPH	92
3.2 THE SPINE RADIOGRAPH	93
3.3 MYELOGRAPHY	94
3.4 INTERVENTIONAL RADIOGRAPHY	95
3.4.1 History	96
3.4.2 Training	96
3.4.3 Imaging Modalities	96
3.4.4 Procedures	96
3.4.5 Tools	97
3.5 CEREBRAL ANGIOGRAPHY	97

4. COMPUTED AXIAL TOMOGRAPHY/ CT-SCAN	100
5. NUCLEAR MAGNETIC RESONANCE/NMR	102
5.1 MAGNETIC RESONANCE IMAGING/MRI. RELAXATION	102
5.2 MAGNETIC RESONANCE ANGIOGRAPHY (MRA)	104
5.3 MAGNETIC RESONANCE SPECTROSCOPY/MRS	104
6. RADIOISOTOPE SCANNING TECHNIQUES	109
6.1 RADIONUCLIDE CISTERNOGRAM	110
6.2 POSITRON EMISSION TOMOGRAPHY/PET SINGLE-PHOTON EMISSION COMPUTED TOMOGRAPHY/SPECT	110
6.2.1 Positron emission tomography (PET)	110
6.2.2 PET scanning	111
6.2.3 SPECT scanning. Single photon emission computed tomography	112
6.2.4 Likely findings in SPECT illustration	112
7. ELECTROENCEPHALOGRAPHY/EEG MONITORING-MAPPING	114
7.1 METHOD OF EEG INVESTIGATION	116
7.2 EEG INTERPRETATION	118
7.3 AMBULATORY AND VIDEO MONITORING TECHNIQUES (AVMTs)	125
7.4 EEG IN SLEEP	126
7.5 POLYSOMNOGRAPHY MULTIPLE SLEEP LATENCY OCCURRENCE/MSLO	126
7.6 MAGNETIC ENCEPHALOGRAPHY (MEG)	126
8. CORTICAL EVOKED POTENTIAL (EP) AND CORTICAL MAGNETIC STIMULATION	131
9. PERIPHERAL NERVE/MUSCLE TESTS EMG	138
9.1 THE ELECTROMYOGRAPHY/EMG	138
9.2 STIMULATING ELECTROMYOGRAPHY (stEMG)	143
9.3 ELECTRONEUROGRAPHY	144
10. ULTRASONOGRAPHY – DOPPLER SONOGRAPHY	149
11. THE BIOPSY	155
11.1 MUSCLE BIOPSY	155
11.2 NERVE BIOPSY	156
11.3 BRAIN BIOPSY	157
11.4 PSYCHOMETRIC TESTING	157
CHAPTER II SPECIAL CLINICAL NEUROLOGY	161
INTRODUCTION	162
12. CONGENITAL LESIONS – PHAKOMATOSES, BIRTH TRAUMA, AND BRAIN LESIONS OF EARLY LIFE	163
12.1 MALFORMATION OF THE BRAIN	164
12.2 NEURO CUTANEOUS SYNDROMES – PHAKOMATOSES	164

12.2.1 Sturge-Weber syndrome (SW)	165
12.2.2 Tuberos sclerosus - Bourneville disease	165
12.2.3 Von Recklinghausen's disease - neurofibromatosis	165
12.2.4 Shapiro-Shulman syndrome	166
12.2.5 Bonnet-Dechaume-Blanc syndrome, Wyburn-Mason syndrome - Encephalo-retinal facial angiomatosis	166
12.2.6 Cobb syndrome - Cutaneomeningo-spinal angiomatosis	166
12.2.7 Klippel-Trenaunay syndrome (SKT)	166
12.2.8 Blue rubber bleb nevus syndrome	167
12.2.9 Maffucci syndrome	167
12.2.10 Gass syndrome - Familial cavernous angioma	167
12.2.11 Riley-Smith syndrome	167
12.2.12 Telangiectatic ataxia (TA) – Louis-Bar syndrome	168
12.2.13 Osler-Weber-Rendu syndrome – telangiectasia haemorrhagica hereditaria	168
12.2.14 Divry-Van Bogaert-Divry syndrome –Angiomas of skin and diffuse cerebral meninges	168
12.2.15 Cutis marmorata telangiectatica congenita	169
12.2.16 Sneddon syndrome	169
12.2.17 Fabry disease	169
12.2.18 Proteus syndrome – Wiedemann disease	169
12.2.19 von Hippel-Lindau disease (HLD) – retino-cerebellar angiomatosis	170
12.3 AFFECTIONS ACQUIRED DURING INTRA WOMB EVOLUTION	171
12.3.1 Congenital syphilis	171
12.3.2 Embryopathies after German measles	172
12.3.3 Congenital toxoplasmosis	173
12.3.4 Cytomegalic inclusion disease	174
12.4 CEREBRAL PALSY	175
12.4.1 Birth hemorrhage	175
12.4.2 Asphyxia combined with ischemia	175
12.4.3 Icterus gravis neonatorum	179
12.4.4 Kernicterus	179
12.5 HYDROCEPHALUS	181
12.6 ANOMALIES OF THE CRANIOCERVICAL JUNCTION	185
12.6.1 Klippel-Feil malformation (fusion of cervical vertebrae)	185
12.7 CRANIOSTENOSIS	187
13. HEAD INJURIES	188
13.1 OPEN HEAD INJURIES	189
13.2 CLOSED HEAD INJURIES	190
13.2.1 Concussion	191
13.2.2 Brain contusions	191
13.2.3 Epidural hematomas	191
13.2.4 Subdural hematoma	192
13.2.5 Acute/subacute subdural hematomas	192
13.2.6 Chronic subdural hematoma	192
13.2.7 Infant subdural hematoma	192
13.2.8 Subdural hygroma	193
14. SPINAL CORD INJURIES	194
14.1 CONCUSSION	194

14.2 CONTUSION	194
14.3 LACERATION	194
14.4 COMPRESSION	194
15. HAEMATOMYELIA	199
16. CRANIAL NERVE INJURIES	201
16.1 Olfactory nerve	201
16.2 Optic nerves	201
16.3 Third/oculomotor nerve	201
16.4 Fourth cranial nerve	201
16.5 The fifth cranial nerve	201
16.6 The sixth cranial nerve	201
16.7 The intermedio-facial nerve	202
16.8 The eighth cranial vestibulo-acoustic nerve	202
16.9 The bulbar 9 th , 10 th , 11 th , 12 th cranial nerves	202
17. CRANIOCEREBRAL INJURY COMPLICATIONS	204
17.1 Cerebrospinal rhinorrhea	204
17.2 Cerebrospinal otorrhea	205
17.3 Meningitis	205
17.4 Post-concussion and pseudo neurasthenic syndromes	205
17.5 Dizziness, uncertainty; unsteadiness, and/or imbalance	207
17.6 Mental symptoms	207
17.7 Post-traumatic encephalopathy	207
17.8 Post-traumatic epilepsy	207
18. CEREBROVASCULAR DISEASE/STROKE (CVD/S)	210
18.1 ISCHEMIC STROKE	212
18.2 OTHER DISORDERS OF BRAIN CIRCULATION	217
18.2.1 Wallenberg's syndrome	217
18.2.2 Acute bulbar palsy	218
18.2.3 Pseudobulbar palsy	218
18.2.4 Transient vertebrobasilar perfusion disturbances	222
18.2.5 Transient global amnesia	222
18.2.6 Generalized cerebral arteriosclerosis	222
18.2.7 CADASIL – Cerebral autosomal dominant arteriopathy with subcortical infarcts and leukoencephalopathy	222
18.3 HEMORRHAGIC STROKE (brain bleeding)	222
18.3.1 Cerebral hemorrhage	222
18.3.2 Spontaneous cerebellar bleeds	223
18.3.3 Subarachnoid hemorrhage/SAH	223
18.4 ACUTE HYPERTENSIVE ENCEPHALOPATHY/AHE	227
18.5 STROKE AND CIRCULATION FAILURES	228

18.5.1 STROKE MANAGEMENT	228
18.5.2 ACUTE STROKE MANAGEMENT	230
19. INTRACRANIAL SPACE OCCUPYING PROCESSES	232
19.1 Definition	232
19.2 Cerebral cavity-intracranial space Intracranial pressure homeostasis (The Monro-Kellie hypothesis)	233
19.2a Topic definition	233
19.2b Skull differences in sexes	233
19.2c Pathophysiology	233
19.2d Intracranial pressure (ICP)	233
19.2e Historical notices	234
19.2f Intracranial hypertension	234
19.2g Causes	234
19.2h Signs and symptoms of intracranial hypertension (ICH)	236
19.3 LOCAL SIGNS and SYMPTOMS of BRAIN TUMORS	240
19.3.1 The frontal lobe tumors	240
19.3.2 Temporal lobe tumors	244
19.3.3 Parietal lobe tumors	246
19.3.4 Occipital lobe tumors	248
19.3.5 Tumors of the corpus callosum and septum pellucidum	248
19.3.6 Lateral ventricle tumors	249
19.3.7 Third ventricle tumors	250
19.3.8 Fourth ventricle tumors	251
19.3.9 Pineal mesencephalic region tumors	252
19.3.10 Tumors of the thalamus	253
19.3.11 Sella turcica expansions, Pituitary Adenoma (Tumor)	254
19.3.12 Pons and medulla oblongata lower brainstem tumors	255
19.4 GLIOMAS COMMENCING IN THE NEUROPIIL-GLIAL COMPONENT	256
19.5 CONNECTIVE TISSUE INTRACRANIAL TUMORS	264
19.5.1 Medulloblastomas	264
19.5.2 Meningiomas	264
19.6 HYPOPHYSIS ADENOMAS/PITUITARY GLAND ADENOMAS	268
19.7 CONGENITAL TUMORS ARISING FROM EMBRYONIC RESTS	273
19.7.1 Craniopharyngioma	273
19.7.2 Epidermoid and cholesteatoma	276
19.7.3 Dermoid and teratoma tumors	277
20. TRANSITORY PAROXYSMAL STATES	282
20.1 CLINICAL PICTURES OF EPILEPTIC SEIZURES	283
20.2 TEMPORAL LOBE EPILEPSY	284
20.3 SECONDARY GENERALIZED SEIZURES/SGS	285
20.4 PRIMARY GENERALIZED SEIZURES/PGS	285
20.4a Grand-mal tonic-clonic/GTCS	285
20.4b Absence seizure	286
20.4c Typical absence seizures	286
20.4d Atypical absence seizures	288
20.4e Akinetic-atonic seizures	288

20.4f Myoclonic seizures	288
20.4g Salaam spasms/West's syndrome	289
20.4h Myoclonic epilepsy/Unverricht's Lundborg's disease (ULD)	290
20.4i Prognostic, judicial and forensic aspects of epilepsy	291
20.5 SOME ETIOPATHOGENETIC ASPECTS WITH EPILEPSY CLASSIFICATION	291
20.6 PATHOPHYSIOLOGY OF EPILEPTIC SEIZURE	292
20.7 CAUSES OF EPILEPTOGENESIS	293
20.8 CURE OF EPILEPSY	294
20.8a Ketogenic diet	294
20.8b Which Drug to Use?	294
20.8c Antiepileptic polypharmacy	295
20.8d Anti-epileptic drugs side effects in pregnancy	295
20.8e Monitoring blood levels	296
20.8f The Anti-epileptic drugs	296
20.8g Carbamazepine (TEGRETOL)	296
20.8h Sodium valproate (Depakine chrono, Epilum)	296
20.8i Phenytoin sodium (Epilan D GEROT, Epilan GEROT, Dilantin)	297
20.8j Ethosuximide	298
20.8k Benzodiazepine drugs	298
20.8l Barbiturate drugs	298
20.8m Other drugs	298
20.8n The newest anti-epileptic drugs	298
20.8o Drugs acting through increasing inhibition	298
20.8p Drugs which reduce excitation of neurones	299
20.8r Drugs that affect the availability of gamma aminobutyric acid (GABA)	299
20.8s Surgery for epilepsy	299
20.8t First aid for seizures	300
20.8u Epilepsy management-prohibitions and proposals	300
20.9 RECURRENT PAROXYSMAL HEADACHES	304
20.9.1 Definition	304
20.9.2 Migraine	304
20.9.3 What causes migraine?	305
20.9.4 Clinic picture of migraine	305
20.9.5 Prodrome	305
20.9.6 Aura	305
20.9.7 The typical migraine headache	306
20.9.8 Theoretic interpretation of pathomechanism of migraine generation	307
20.9.9 Diagnosis	307
20.9.10 Prevention of migraines	308
20.9.11 Medication	308
20.9.12 Surgery	308
20.9.13 Migraine without aura	309
20.9.14 Migraine with aura	309
20.9.15 Ophthalmic migraine/classic migraine	310
20.9.16 Basilar migraine	310
20.9.17 Tension headache/muscle contraction headache	310
20.9.18 Cluster headaches	311
20.10 HEADACHE ASSOCIATED WITH OTHER DISORDERS	312
20.10.1 Cervical – cervicocranial migraine	312

20.10.2 Headache accompanying some intracranial space occupying processes	313
20.10.3 Valve headaches	314
20.10.4 Pheochromocytoma attacking headaches	314
20.10.5 Low-pressure CSF headaches	314
20.10.6 Cough headaches	314
20.10.7 Ice cream headaches	314
20.10.8 Headache due to ophthalmologic conditions	314
20.10.9 Headache accompanying general or infectious diseases	314
20.10.10 Hyperostosis frontalis interna – Morgani-Morel-Stewart’s disorder	315
21. MOTOR NEURON DEGENERATION DISORDERS (MNDDs)	319
21.1 AMYOTROPHIC LATERAL SCLEROSIS (ALS)	320
21.2 PROGRESSIVE BULBAR PALSY	320
21.3 PSEUDOBULBAR PALSY	320
21.4 PRIMARY LATERAL SCLEROSIS (PLS)	321
21.5 PROGRESSIVE MUSCULAR ATROPHY	321
21.6 SPINAL MUSCULAR ATROPHY (SMA)	321
21.6a SMA type I (Werdnig-Hoffmann disease)	321
21.6b SMA type II	321
21.6c SMA type III (Kugelberg-Welander disease)	321
21.7 Fazio-Londe disease	322
21.8 Kennedy disease	322
21.9 Congenital SMA with arthrogyriposis	322
21.10 Post-polio syndrome (PPS)	322
22. BALANCE DISORDER, IMBALANCE-VERTIGO, DIZZINESS, GIDDINESS	326
22.1 VERTIGO	326
22.2 DISEQUILIBRIUM	326
22.3 PRE-SYNCOPE-FAINTNESS	326
22.4 CONNECTED WITH INNER EAR DISORDERS-PERIPHERAL VESTIBULAR SYNDROME	327
22.4.a Benign Paroxysmal Positional Vertigo (BPPV)	327
22.4.b Labyrinthitis	327
22.4.c Trauma - Injury	327
22.4.d Meniere’s disease	327
22.4.f Superior canal dehiscence syndrome	327
22.4.g Bilateral vestibulopathy	327
22.4.1 What causes BPPV?	327
22.4.2 What does not cause BPPV?	327
22.4.3 How is the diagnosis of Benign paroxysmal positional vertigo (BPPV) made?	328
22.4.4 How might BPPV affect patient’s life?	328
22.4.5 How is BPPV treated?	328
22.4.6 Office treatment of BPPV: The Epley and Semont Maneuvers	328
22.4.7 Instructions for patients after office treatments	329
22.4.8 What if the maneuvers do not work?	329
22.4.9 Home treatment of BPPV	330
22.4.10 Home Epley maneuver	330
22.4.11 Bilateral Vestibulopathy	331

22.5 CENTRAL VESTIBULAR SYNDROME CONNECTED WITH THE BRAIN DISORDERS	332
22.6 DIAGNOSIS	333
22.7 DIAGNOSTIC TESTING	334
22.8 TREATMENT	334
22.9 BENIGN PAROXYSMAL POSITIONAL VERTIGO (BPPV)	334
22.10 MENIERE'S DISEASE	334
22.11 LABYRINTHITIS	335
23. SYNCOPAL STATE	336
23.1 EPIDEMIOLOGIC ASPECTS AND CLINICAL FEATURES	336
23.2 VASOVAGAL SYNCOPE	337
23.3 SICK SINUS SYNDROME	337
24. TARDIVE DYSKINESIAS DUE TO SIDE EFFECTS OF NEUROLEPTICS, ANTIDEPRESSANTS, HARD DRUG ADDICTION	339
25. DISSOCIATIVE IDENTITY DISORDER (DID) HYSTERICAL MANNERISMS AND PSEUDODEMENTIA	340
26. SPASMOPHILIA TETANY - HYPERVENTILATION SYNDROME	341
27. SUDDEN PSYCHOTIC STATE - DELIRIUM, MANIC, CATATONIC STATE	343
28. INFECTIOUS/CONTAGIOUS NERVE SYSTEM DISEASES OF THE BRAIN AND MENINGES.....	345
28.1 ACUTE BACTERIAL MENINGITIS	346
28.1.1 Purulent meningitis	346
28.1.2 Tuberculous meningitis	351
29. CHRONIC ARACHNOIDITIS	353
30. ACUTE EPIDURAL SPINAL AND INTRACRANIAL ABSCESS	354
31. BRAIN ABSCESS	355
32. SPIROCHETAL DISEASES	357
32.1 LYME'S DISEASE	357
32.2 SYPHILIS	358
32.3 LEPTOSPIROSIS	359
33. FUNGAL INFECTIONS - MENINGITIS	364
34. PROTOZOAN INFECTIONS	366
34.1 MALARIA	366
34.2 TOXOPLASMOSIS	367
34.3 TRYPANOSOMIASIS	368
35. HELMINTHOSES	370
35.1 CYSTICERCOSIS	370
35.2 ECHINOCOCCOSIS/HYDATID DISEASE	371
35.3 TRICHINOSIS	372
36. VIRAL NS INFECTIONS	374

36.1 ASEPTIC OR LYMPHOCYTE MENINGITIS	375
36.2 LYMPHOCYTIC CHORIOMENINGITIS	376
36.3 CENTRAL EUROPEAN/ARTHROPODOUS ENCEPHALITIS	376
36.4 EPIDEMIC ENCEPHALITIS LETHARGICA VON ECONOMO DISEASE - ENCEPHALITIS/SPANISH INFLUENZA	378
36.5 HERPES SIMPLEX/ACUTE HEMORRHAGIC ENCEPHALITIS	381
36.6 POSTVACCINAL ENCEPHALOMYELITIS	382
36.7 PARAINFECTIOUS ENCEPHALITIS	382
36.8 COXSACKIE VIRUS	383
36.9 VARICELLA-ZOSTER VIRAL NERVE INFECTION DISEASE/ VZV	383
36.10 POLIOMYELITIS	385
37. PRIONS AND SLOW VIRAL INFECTIONS	387
37.1 KURU	387
37.2 CREUTZFELDT-JAKOB DISEASE (CJD)	388
37.3 FATAL FAMILIAL INSOMNIA/FFI	390
37.4 SUBACUTE SCLEROSING PANENCEPHALITIS (SSPE)	391
37.5 PROGRESSIVE MULTIFOCAL LEUKOENCEPHALOPATHY/PML	392
37.6 ACQUIRED IMMUNODEFICIENCY SYNDROME/AIDS	393
38. DEMYELINATING DISEASES	399
38.1 MULTIPLE SCLEROSIS (MS)	399
38.1.1 Introduction	399
38.1.2 MS epidemiology, etiology, pathogenesis, and clinical presentation	400
38.1.3 MS clinical forms	402
38.1.3a Spinal forms	402
38.1.3b Cerebellar-spinal MS disorders	402
38.1.3c Brain-stem composition	402
38.1.3d Hemiparetic arrangements.....	402
38.1.3e Peripheral polyneuropathic MS	403
38.1.3f Inapparent or silent MS	403
38.1.3g Typical advanced picture	403
38.2 PARTICULAR MS CLINIC FEATURE, CLINIC COURSE, AND MS DIAGNOSIS	410
39. EXTRAPYRAMIDAL SYNDROMES (EPS)	420
39.1 PARKINSONISM - HYPERTONIC/HYPOKINETIC SYNDROME	421
39.2 CHOREA A HYPOTONIC-HYPERKINETIC DISORDER	425
39.2.1 Chorea minor	425
39.2.2 Huntington's chorea	426
39.2.3 Chorea gravidarum	427
39.2.4 Benign familial chorea	427
39.2.5 Symptomatic hemichorea	427
39.2.6 Senile non-hereditary chorea	427
39.3 DYSTONIC DISORDERS - ATHETOSIS	427
39.3.1 Athetosis	428

39.3.2 Spastic/spasmodic torticollis	428
39.3.3 Torsion dystonia - dystonia musculorum deformans	429
39.3.4 Symptomatic torsion dystonia	430
39.3.5 Hemiballismus/Ballismus	430
39.3.6 Other disorders included with extrapyramidal diseases	430
40. POLYNEUROPATHIES	434
40.1 THE CLINICAL PICTURE	434
40.2 TESTING/ANCILLARY INVESTIGATION ELECTROMYOGRAPHY - EMG	435
40.3 TREATMENT	436
40.4 DIFFERENTIAL DIAGNOSIS	437
40.5 POLYNEUROPATHIES DUE TO OTHER CAUSES	437
41. PNS MONOPHASIC DEMYELINATING DISEASE	438
41.1 GUILLAIN-BARRE SYNDROME (GBS) - POLYRADICULONEURITIS	439
41.2 IDIOPATHIC BRACHIAL - FOCAL IDIOPATHIC NEUROPATHY (IBN)	441
41.3 CHRONIC INFLAMMATORY DEMYELINATING POLYNEUROPATHY (CIDP)	441
42. PERIPHERAL NERVE AND PLEXUS LESIONS	443
42.1 GRADING THE PERIPHERAL NERVE DISORDERS	443
42.2 PAIN AND PHANTOM PAIN	444
43. BRACHIAL PLEXUS-ANATOMY, BRACHIAL PLEXOPATHY	445
43.1 CRUTIAL BRANCHES OF THE BRACHIAL PLEXUS	446
43.1.1 The long thoracic nerve	446
43.1.2 The axillary nerve	446
43.1.3 The musculocutaneous nerve	447
43.1.4 The radial nerve	447
43.1.5 The median nerve	448
43.1.6 The ulnar nerve	450
43.1.7 The phrenic nerve	451
43.1.8 Intercostal nerves	452
44. THE LUMBO SACRAL PLEXUS	454
44.1 LUMBAR PLEXUS T12 - L4 AND EMERGING PERIPHERAL NERVES	454
44.1.1 The iliohypogastric nerve	454
44.1.2 The ilioinguinal nerve	454
44.1.3 The genitofemoral nerve	454
44.1.4 The lateral femoral cutaneous nerve	454
44.2 FEMORAL NERVE L2 - L3 - L4	455
44.2.1 The anterior femoral cutaneous nerve	456
44.2.2 The saphenous nerve	456
44.2.3 The superior gluteal nerve	456
44.2.4 The inferior gluteal nerve (L5- S2)	457
44.3 THE OBTURATORY NERVE	457
45. SACRAL PLEXUS L4- S4 AND EMERGING PERIPHERAL NERVES	458
45.1 SCIATIC NERVE	458
45.2 TIBIAL NERVE L4 - S3	458

45.3 FIBULAR NERVE - PERONEAL NERVE/L4 - S 2	460
46. VERTEBROGENIC PAIN DISORDER - DISTRESSING STATE	462
46.1 PSEUDO-RADICULAR SYNDROMES	462
46.2 RADICULAR SYNDROMES	462
46.3 DYNAMIC BLOCKS, UNCO ARTHROSIS, SPONDYLOSIS, AND CERVICAL REGION DISC DISEASE	462
46.3a Uncovertebral osteophytic appositions	463
46.3b Dynamic C1 vertebral obstruction	464
46.3c Vertebrogenic/discogenic radicular thoracic pain projections	465
46.3d Low back pain - lumbalgia/sciatica	465
47. MYOPATHIES AND MYASTHENIA GRAVIS PSEUDOPARALYTICA	469
47.1 PRIMARY MUSCLE DISEASES	470
47.1.1 Inherited myopathies - progressive muscular dystrophies	472
48. MYOTONIC DISORDERS (NON-DYSTROPHIC)	477
49. METABOLIC MYOPATHIES AND DISORDERS	481
49.1 THE ACQUIRED MYOPATHIES -MYOSITIDES	482
49.2 MYASTHENIA GRAVIS PSEUDOPARALYTICA/MG AND THE MYASTHENIA-LIKE DISORDERS	485
49.3 MYASTHENIA-LIKE SYNDROME LAMBERT EATON'S	488
50. TOXIC DISORDERS OF THE NERVOUS SYSTEM	489
50.1 BACTERIAL TOXINS (ANAEROBIC/TETANUS, BOTULISM, OR AEROBIC/CORYNEBACTERIUM DIPHTHERIAE)	490
50.1.1 Tetanus	490
50.1.2 Botulism	492
50.1.3 Diphtheria	493
50.1.4 Outbreak of Shiga toxin-producing E. coli O104 (STEC O104:H4) Infections Associated with Travel to Germany	493
51. METALLIC TOXINS	495
51.1 LEAD POISONNING	495
51.2 ARSENIC INTOXICATION	496
51.3 MANGANESE DESTRUCTION	497
52. DRUG INTOXICATION	499
53. ALCOHOL INTOXICATION/ACUTE AND CHRONIC	502
53.1 ACUTE ALCOHOL-ETHANOL INTOXICATION	502
53.2 CHRONIC ALCOHOLISM - DEFINITION	503
54. METHYLALCOHOL INTOXICATION	505
55. METABOLIC INTOXICATION	506
55.1 EXOGENOUS METABOLIC DISORDERS	506
55.2 HEPATIC FAILURE	507
55.3 RENAL FAILURE	507

55.4 DIALYSIS DEMENTIA	508
55.5 DISEQUILIBRIUM SYNDROMES	508
55.6 ELECTROLYTE DISTURBANCES	508
56. DISORDERS WITHIN THE SPINAL COLUMN - SPINAL CORD	511
56.1 SYMPTOMS AND SIGNS OF DISEASE	512
56.1.1 Local vertebral column pain	512
56.1.2 Radicular or common spinal nerve syndromes	512
56.1.3 Spinal cord compression	512
56.1.4 Tumors/syrinx	514
56.1.5 Ancillary investigations	515
56.1.6 Lumbar puncture	515
56.1.7 Imaging technology	515
57. HEREDITARY MALFORMATIONS (SPINE DYSRAPHISM) - DEFECTS ASSOCIATED WITH POSTERIOR NEURAL ARCH CLOSURE FAILURE	516
57.1 SPINA BIFIDA	516
57.2 SPINA BIFIDA OCCULTA	516
57.3 MENINGOCELE	516
57.4 MYELOMENINGOCELE	517
57.5 DIASTEMATOMYELIA	518
58. SPINAL SPACE OCCUPYING PROCESSES/TUMORS	520
58.1 EXTRADURAL MALIGNANT TUMORS	520
58.2 INTRADURAL EXTRAMEDULLARY TUMORS	521
58.3 GRADUALLY DEVELOPING INTRAMEDULLARY TUMORS	522
58.4 CAUDA EQUINE EPENDYMOMA	522
58.5 ASTROCYTOMAS	523
58.6 ANGIOMAS	523
59. INJURY TO THE VERTEBRAL COLUMN, INTERVERTEBRAL SPINAL NERVE, OR SPINAL CORD ..	525
59.1 SPINAL TRAUMA MANAGEMENT	526
59.2 OUTCOME IN THE PARAPLEGIC PATIENT	528
60. SPINAL CORD DEMYELINATION	529
60.1 SPINAL CORD DEGENERATION	529
60.1.1 AMYOTROPHIC LATERAL SCLEROSIS (ALS)	529
60.1.2 SYRINGOMYELIA	532
60.1.3 INFANTILE SPINAL MUSCULAR ATROPHY- WERDNIG-HOFFMANN'S DISEASE	534
60.1.4 CHRONIC SPINAL MUSCULAR ATROPHY/WOHLFART-KUGELBERG- WELANDER DISEASE	536
60.1.5 HEREDITARY SPASTIC PARAPLEGIA (HSP)	536
60.1.6 FRIEDREICH'S ATAXIA	537
61. SPINAL CORD VASCULAR DISORDERS	539
62. SLEEP AND SLEEP DISORDERS	542
62.1 NORMAL SLEEP PATTERNS AND NORMAL VARIATIONS	543
62.1.1 Normal sleep patterns	543

62.1.2 Normal sleep variations	543
62.2 SLEEP DISORDERS	543
62.2.1 DISORDERS OF EXCESSIVE DAYTIME SOMNOLENCE/DOES	543
62.2.2 PSYCHOPHYSIOLOGICAL /EXCESSIVE DAYTIME SOMNOLENCE	544
62.2.3 NARCOLEPSY	544
62.2.4 SLEEP APNEA	545
62.2.5 CENTRAL APNEA	545
62.2.6 COMPLEX SLEEP APNEA	545
62.2.7 ABNORMAL ACTIONS DURING SLEEP	546
63. PHYSICAL/MEDICAL CONDITIONS (AFFECTING SLEEP PATTERNS)	550
64. CONSCIOUSNESS	552
64.1 INTRODUCTION: THE PROBLEMS OF CONSCIOUSNESS	552
64.2 THE NEURAL CORRELATE OF CONSCIOUSNESS (NCC)	
- CONSCIOUSNESS AND NEUROBIOLOGY	553
64.3 CONCLUSION	555
64.4 DISORDERS OF CONSCIOUSNESS	555
64.4.1 Introduction	555
64.4.2 The problems of consciousness	556
64.4.3 Minimally conscious state	556
64.4.4 The persistent vegetative state	557
64.4.5 Locked-in syndrome	559
64.4.6 Coma	559
64.4.7 Conclusion	560
65. BASIC PRACTICAL APPROACHES IN NEUROLOGICAL REHABILITATION	563
66. BRAIN DEATH	588
66.1 INTRODUCTION	588
66.2 DEATH AND BRAIN DEATH (BD)	588
66.3 LEGAL HISTORY	589
66.4 RELIGIOUS VIEWS	589
66.5 CLINICAL BRAIN DEATH	589
66.5.1 PATHOPHYSIOLOGY OF BRAIN DEATH	589
66.5.2 DIAGNOSIS OF BRAIN DEATH	590
66.5.3 MEDICAL CRITERIA	590
66.5.4 NOTES ONTO SOME CRANIAL NERVES AND THEIR REFLEXES TAKEN INTO ACCOUNT	590
66.5.5 NEUROPHYSIOLOGICAL BRAIN DEATH	591
66.5.6 PROOF OF BRAIN BLOOD FLOW ARREST	592
66.5.7 DIAGNOSTIC PREREQUISITES	593
66.5.8 BRAIN DEATH CERTIFICATION	594
67. VOCABULARY / ABBREVIATIONS / COMBINING FORMS FREE ACCORDING ANNAMARIE	595
