Contents

Preface ix

1 General Introduction 1
- Contextual and Historical *4*
- How to Use This Text *9*
- Preview of Remaining Chapters *12*
- Review Guide *15*
- End Notes *16*

2 Items and Item Scores 17
- Item Types *18*
- Item Scores and Test Scores *26*
- Some Philosophical Considerations *29*
- Review Guide *30*
- End Notes *31*

3 Item and Test Statistics 32
- Binary Item Statistics *32*
- Quantitative Item Statistics *45*
- Test Scores *49*
- Review Guide *53*
- End Notes *54*

4 The Concept of a Scale 55
- Review Guide *61*
- End Notes *61*

5 Reliability Theory for Total Test Scores 62
The True-Score Model for Test Scores *64*
Applications of the Model *68*
Review Guide *75*
End Notes *75*

6 Test Homogeneity, Reliability, and Generalizability 76
Homogeneity and the Single-Factor Model *77*
The Reliability of a Homogeneous Test *87*
Coefficient Alpha and the Spearman–Brown Formula *90*
Binary Data *97*
Some Principles of Generalizability *103*
Review Guide *118*
End Notes *119*

7 Reliability—Applications 121
Test Length and Reliability *121*
Scale and Reliability *126*
Estimating and Bounding a True Score *128*
Problems of Attenuation *133*
Error in Difference Scores *136*
Review Guide *139*
End Notes *140*

8 Prediction and Multiple Regression 141
Bivariate Regression *142*
Multiple Regression *145*
Some Properties of Estimates *154*
Selection of Predictor Variables *156*
Partial Covariance and Correlation *157*
An Empirical Example *159*
Review Guide *165*
End Notes *165*

9 The Common Factor Model 167
The Multiple-Factor Model—By Example *168*
The Multiple-Factor Model—General *177*
Higher Order and Hierarchical Factors *188*
The Rotation Problem *191*
The Analysis of Correlation Matrices *193*
Review Guide *195*
End Notes *195*

10 Validity 197
Item Content and Test Score Validation *200*
Internal Psychometric Analysis *206*

Convergent and Discriminant Validity *211*
Multitrait–Multimethod Matrices *213*
Concurrent Validity and Predictive Utility *222*
Review Guide *228*
End Notes *228*

11 Classical Item Analysis 231
Item–Test Relations *231*
Test Statistics *239*
Item Correlations *243*
Review Guide *247*
End Notes *247*

12 Item Response Models 248
Item Response Functions *249*
The Principle of Local Independence *255*
Item Factor Analysis *257*
Estimating Item Parameters *260*
Review Guide *268*
End Notes *269*

13 Properties of Item Response Models 270
The Concept of a Score *271*
Information and the Linear Item Response Model *274*
Information and Measurement Error in Item Response Models *280*
The One-, Two-, and Three-Parameter Logistic Models *288*
Formula Scores and Transformations *298*
Review Guide *307*
End Notes *308*

14 Multidimensional Item Response Models 309
A Multidimensional Item Response Model *310*
Information Functions and Measurement Error *315*
Measuring Validity of Binary Items *321*
Review Guide *323*
End Notes *324*

15 Comparing Populations 325
Quantitative Responses *329*
Binary Items *339*
Review Guide *344*
End Notes *345*

16 Alternate Forms and the Problem of Equating 347
Equivalence of Test Forms *349*
Matching Test Forms *351*
The Problem of Test Equating *356*
Review Guide *365*
End Notes *366*

17 An Introduction to Structural Equation Modeling 367
Measuring Cause–Effect Relations *368*
The Conventions of Structural Equation Modeling *371*
Path Analysis Without Common Factors *377*
Path Analysis With Common Factors *398*
Review Guide *406*
End Notes *406*

18 Some Scaling Theory 408
Fundamental Properties of Measurements *409*
Coombs's Theory of Data *419*
Some Scaling Models and Methods *422*
Review Guide *441*
End Notes *441*

19 Retrospective 443

Appendix A. Some Rules for Expected Values 453

Glossary 455

References 469
