List of contributors	
Foreword (Hal Mooney)	
How to read this book	xvii
Acknowledgments	xviii
Section I: A vision for ecosystem services in decisions	
1: Mainstreaming natural capital into decisions	3
Gretchen C. Daily, Peter M. Kareiva, Stephen Polasky, Taylor H. Ricketts, and Heather Tallis	
1.1 Mainstreaming ecosystem services into decisions	3
1.2 What is new today that makes us think we can succeed?	4
1.3 Moving from theory to implementation	5
1.4 Using ecosystem production functions to map and assess natural capital	6
1.5 Roadmap to the book	6
Box 1.1: The everyday meaning of natural capital to the world's rural poor (<i>M. Sanjayan</i>)	7
1.6 Open questions and future directions	9
Box 1.2: Sorting among options for a more sustainable world (<i>Stephen R. Carpenter</i>)	10
1.7 A general theory of change	12
Kererences	12
2: Interpreting and estimating the value of ecosystem services	15
Lawrence H. Goulder and Donald Kennedy	
2.1 Introduction: why is valuing nature important?	15
2.2 Philosophical issues: values, rights, and decision-making	16
2.3 Measuring ecosystem values	20
2.4 Some case studies	27
Box 2.1: Designing coastal protection based on the valuation	
of natural coastal ecosystems (<i>R. K. Turner</i>)	29
2.5 Conclusions	31
References	33
3: Assessing multiple ecosystem services: an integrated tool for the real world	34
Heather Tallis and Stephen Polasky	
3.1 Today's decision-making: the problem with incomplete balance sheets	34
3.2 The decision-making revolution	34
3.3 The ecological production function approach	35

3.4 InVEST: mapping and valuing ecosystem services with ecological production functions and economic valuation	37
Box 3.1: Unsung ecosystem service heroes: seed dispersal and pest control (Liba Pejchar)	39
3.5 Future directions and open questions	47
References	48
Section II: Multi-tiered models for ecosystem services	
4: Water supply as an ecosystem service for hydropower and irrigation <i>Guillermo Mendoza, Driss Ennaanay, Marc Conte, Michael Todd Walter, David Freyberg,</i> <i>Stacie Wolny, Lauren Hay, Sue White, Erik Nelson, and Luis Solorzano</i>	53
4.1 Introduction	53
4.2 Tier 1 water supply model	54
Box 4.1 Can we apply our simple model where groundwater really matters?	
(Heather Tallis, Yukuan Wang, and Driss Ennaanay)	54
4.3 Tier 1 valuation	59
4.4 Limitations of the tier 1 water yield models	62
4.5 Tier 2 water supply model	62
4.6 Tier 2 valuation model	65
4.7 Sensitivity analyses and testing of tier 1 water supply models	65
4.8 Next steps	70
References	71
5: Valuing land cover impact on storm peak mitigation Driss Ennaanay, Marc Conte, Kenneth Brooks, John Nieber, Manu Sharma, Stacie Wolny, and Guillermo Mendoza	73
5.1 Introduction	73
5.2 Tier 1 biophysical model	74
5.3 Tier 1 valuation	78
Box 5.1: Integrated flood risk management: gaining ecosystem services and increasing	
revenue (David Harrison)	80
5.4 Tier 2 supply and use model	84
5.5 Tier 2 valuation	85
5.6 Limitations and next steps	86
References	87
6: Retention of nutrients and sediment by vegetation Marc Conte. Driss Ennagany, Cuillermo Mendoza, Michael Todd Walter, Stacia Wolmy	89
David Freyberg, Erik Nelson, and Luis Solorzano	
6.1 Introduction	89
6.2 Tier 1 biophysical models	90
6.3 Tier 1 economic valuation	96
6.4 Tier 2 biophysical models	99
6.5 Tier 2 economic valuation models	102
6.6 Constraints and limitations	104
6.7 lesting tier I models	105
box 6.1: China forestry programs take aim at more than floods (<i>Christine Tam</i>)	107
0.0 INEXT STEPS	108
Kererences	109

7:	Terrestrial carbon sequestration and storage Marc Conte, Erik Nelson, Karen Carney, Cinzia Fissore, Nasser Olwero, Andrew J. Plantinga, Bill Stanley, and Taylor Ricketts	111
	71 Introduction	111
	7.2 Tier 1 supply model	112
	Box 7.1: Noel Kempff case study: capturing carbon finance (Bill Stavley and Nicole Virgilio)	112
	73 Tier 1 valuation model: an avoided economic damage approach	118
	Roy 7.2: Valuing the Area measuring and monitoring forest carbon for offecting	110
	box 7.2: Valuing the Arc: measuring and monitoring forest carbon for onsetting	110
	(Anarew K. Marshall and P. K. 1. Munishi)	119
	7.4 Her 2 supply model	121
	7.5 Her 2 valuation: an application of the avoided economic damage approach	122
	7.6 Limitations and next steps	124
	References	126
8:	The provisioning value of timber and non-timber forest products Erik Nelson, Claire Montgomery, Marc Conte, and Stephen Polasky	129
		100
	8.1 Introduction	129
	Box 8.1: Wildlife conservation, corridor restoration, and community incentives: a paradigm from the Terai Arc landscape (<i>Eric Wikramanayake</i> ,	
	Rajendra Gurung, and Eric Dinerstein)	130
	8.2 The supply, use, and value of forests' provisioning service in tier 1	132
	8.3 The supply, use, and value of forests' provisioning service in tier 2	141
	8.4 Limitations and next steps	146
	References	147
9:	Provisioning and regulatory ecosystem service values in agriculture <i>Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky</i>	150
9:	Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction	150 150
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 	150 150 151
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 	150 150 151 152
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 	150 150 151 152 158
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 	150 150 151 152 158 161
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 	150 151 152 158 161
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 9.7 Limitations and next steps 	150 151 152 158 161 162 163
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 9.7 Limitations and next steps References 	150 151 152 158 161 162 163 164
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 9.7 Limitations and next steps References 	150 151 152 158 161 162 163 164
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 9.7 Limitations and next steps References Crop pollination services 	 150 151 152 158 161 162 163 164 168
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 9.7 Limitations and next steps References Crop pollination services Eric Lonsdorf, Taylor Ricketts, Claire Kremen, Rachel Winfree, Sarah Greenleaf, and Neal Williams 	 150 151 152 158 161 162 163 164 168
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 9.7 Limitations and next steps References Crop pollination services Eric Lonsdorf, Taylor Ricketts, Claire Kremen, Rachel Winfree, Sarah Greenleaf, and Neal Williams 10.1 Introduction 	150 151 152 158 161 162 163 164 168
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 9.7 Limitations and next steps References Crop pollination services Eric Lonsdorf, Taylor Ricketts, Claire Kremen, Rachel Winfree, Sarah Greenleaf, and Neal Williams 10.1 Introduction Box 10.1: Assessing the monetary value of global crop pollination services 	 150 151 152 158 161 162 163 164 168 168
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 9.7 Limitations and next steps References Crop pollination services Eric Lonsdorf, Taylor Ricketts, Claire Kremen, Rachel Winfree, Sarah Greenleaf, and Neal Williams 10.1 Introduction Box 10.1: Assessing the monetary value of global crop pollination services (Nicola Callai Barnard E. Vaicsière, Siwon C. Potte, and Ican Michal Salles) 	 150 151 152 158 161 162 163 164 168 168 168
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 9.7 Limitations and next steps References Crop pollination services Eric Lonsdorf, Taylor Ricketts, Claire Kremen, Rachel Winfree, Sarah Greenleaf, and Neal Williams 10.1 Introduction Box 10.1: Assessing the monetary value of global crop pollination services (Nicola Gallai, Bernard E. Vaissière, Simon G. Potts, and Jean-Michel Salles) 	 150 150 151 152 158 161 162 163 164 168 168 169 172
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 9.7 Limitations and next steps References Crop pollination services Eric Lonsdorf, Taylor Ricketts, Claire Kremen, Rachel Winfree, Sarah Greenleaf, and Neal Williams 10.1 Introduction Box 10.1: Assessing the monetary value of global crop pollination services (Nicola Gallai, Bernard E. Vaissière, Simon G. Potts, and Jean-Michel Salles) 10.2 Tier 1 supply model 	 150 151 152 158 161 162 163 164 168 168 169 173 175
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 9.7 Limitations and next steps References Crop pollination services Eric Lonsdorf, Taylor Ricketts, Claire Kremen, Rachel Winfree, Sarah Greenleaf, and Neal Williams 10.1 Introduction Box 10.1: Assessing the monetary value of global crop pollination services (Nicola Gallai, Bernard E. Vaissière, Simon G. Potts, and Jean-Michel Salles) 10.2 Tier 1 supply model 10.3 Tier 1 farm abundance map 10.4 Tier 1 mabundance map 	150 151 152 158 161 162 163 164 168 168 169 173 175
9:	Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 9.7 Limitations and next steps References Crop pollination services Eric Lonsdorf, Taylor Ricketts, Claire Kremen, Rachel Winfree, Sarah Greenleaf, and Neal Williams 10.1 Introduction Box 10.1: Assessing the monetary value of global crop pollination services (Nicola Gallai, Bernard E. Vaissière, Simon G. Potts, and Jean-Michel Salles) 10.2 Tier 1 supply model 10.3 Tier 1 farm abundance map 10.4 Tier 1 valuation model	150 151 152 158 161 162 163 164 168 168 168 169 173 175 175
9:	 Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 9.7 Limitations and next steps References Crop pollination services Eric Lonsdorf, Taylor Ricketts, Claire Kremen, Rachel Winfree, Sarah Greenleaf, and Neal Williams 10.1 Introduction Box 10.1: Assessing the monetary value of global crop pollination services (Nicola Gallai, Bernard E. Vaissière, Simon G. Potts, and Jean-Michel Salles) 10.2 Tier 1 supply model 10.3 Tier 1 farm abundance map 10.4 Tier 1 valuation model 10.5 Tier 2 supply model	150 151 152 158 161 162 163 164 168 168 168 169 173 175 175 175
9:	Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 9.7 Limitations and next steps References Crop pollination services Eric Lonsdorf, Taylor Ricketts, Claire Kremen, Rachel Winfree, Sarah Greenleaf, and Neal Williams 10.1 Introduction Box 10.1: Assessing the monetary value of global crop pollination services (Nicola Gallai, Bernard E. Vaissière, Simon G. Potts, and Jean-Michel Salles) 10.2 Tier 1 supply model 10.3 Tier 1 farm abundance map 10.4 Tier 1 valuation model 10.5 Tier 2 supply model 10.6 Tier 2 farm abundance map	150 151 152 158 161 162 163 164 168 168 168 169 173 175 175 175
9:	Provisioning and regulatory ecosystem service values in agriculture Erik Nelson, Stanley Wood, Jawoo Koo, and Stephen Polasky 9.1 Introduction 9.2 Defining agricultural scenarios 9.3 Tier 1 9.4 Tier 2 9.5 Mapping the impacts of agriculture on important ecological processes 9.6 Uncertainty 9.7 Limitations and next steps References Crop pollination services Eric Lonsdorf, Taylor Ricketts, Claire Kremen, Rachel Winfree, Sarah Greenleaf, and Neal Williams 10.1 Introduction Box 10.1: Assessing the monetary value of global crop pollination services (Nicola Gallai, Bernard E. Vaissière, Simon G. Potts, and Jean-Michel Salles) 10.2 Tier 1 supply model 10.3 Tier 1 farm abundance map 10.4 Tier 1 valuation model 10.5 Tier 2 supply model 10.6 Tier 2 farm abundance map 10.7 Tier 2 valuation model	 150 150 151 152 158 161 162 163 164 168 168 169 173 175 175 176 177 177

	10.9 Limitations and next stepsBox 10.2: Pollination services: beyond agriculture (<i>Berry Brosi</i>)	182 183
	References	185
11:	Nature-based tourism and recreation W. L. (Vic) Adamowicz, Robin Naidoo, Erik Nelson, Stephen Polasky, and Jing Zhang	188
	11.1 Nature-based tourism and recreation values in context	188
	11.2 Tier 1 tourism supply and use model	190
	11.3 Tier 2 tourism supply and use model	193
	11.4 Tier 1 and 2 use value	197
	Box 11.1: How the economics of tourism justifies forest protection in Amazonian Peru (<i>Christopher Kirkby, Renzo Giudice, Brett Day, Kerry Turner, Bridaldo Silveira</i>	
	Soares-Filho, Hermann Oliveira-Rodrigues, and Douglas W. Yu)	198
	11.5 State-of-the-art tourism value	201
	11.6 Limitations and next steps	202
	Kererences	204
12:	Cultural services and non-use values	206
	Kai M. A. Chan, Joshua Goldstein, Terre Satterfield, Neil Hannahs, Kekuewa Kikiloi, Robin Naidoo, Nathan Vadeboncoeur, and Ulalia Woodside	
	12.1 Introduction	206
	Box 12.1: The sacred geography of Kawagebo (Jianzhong Ma and Christine Tam)	211
	12.2 Methods: integrating cultural services and non-use values into decisions	213
	Box 12.2: People of color and love of nature (<i>Hazel Wong</i>)	221
	12.3 Limitations and next steps	225
	References	226
13:	Terrestrial biodiversity	229
	Erik Nelson, D. Richard Cameron, James Regetz, Stephen Polasky, and Gretchen C. Daily	
	13.1 Introduction	229
	13.2 Tier 1: habitat-quality and rarity model	229
	Box 13.1: Integrating biodiversity and agriculture: a success story in South Asia	
	(Jai Ranganathan and Gretchen C. Daily)	230
	13.3 Tier 2 models of terrestrial biodiversity	233
	13.4 Tier 1 and 2 examples with sensitivity analysis	236
	13.5 Limitations and next steps	242
	References	244
Sec	ction III: Extensions, applications, and the next generation of ecosystem service assessments	
14.	Putting ecosystem service models to work conservation management and trade offe	240
14.	Stephen Polasky, Giorgio Caldarone, T. Ka'eo Duarte, Joshua Goldstein, Neil Hannahs, Taylor Ricketts, and Heather Tallis	249
	14.1 Introduction	249
	14.2 Applying ecosystem service and biodiversity models in management and	24)
	conservation contexts	250
	Box 14.1: Plight of a people (<i>Neil Hannahs</i>)	256
	14.3 Extending the frontier: challenges facing ecosystem management	260
	References	262

CONTENTS ix

15	: How much information do managers need? The sensitivity of ecosystem service decisions	
	to model complexity	264
	Heather Tallis and Stephen Polasky	
	15.1 Introduction	264
	Box 15.1: How much data do we need to support our models: a case study using	201
	biodiversity mapping and conservation planning (Craig Groves and	
	Edward Game)	265
	15.2 Testing agreement between simple and complex ecosystem service models	268
	15.3 Future directions and open questions	276
