

SECTION I Basics of Laboratory Medicine, 1

- 1 Clinical Chemistry and Molecular Diagnostics, 2**
Nader Rifai, Andrea Rita Horvath, and Carl T. Wittwer
 - 2 Statistical Methodologies in Laboratory Medicine: Analytical and Clinical Evaluation of Laboratory Tests, 10**
Kristian Linnet, Karel G.M. Moons, and James C. Boyd
 - 3 Quality Management in the Medical Laboratory,* 61**
David Burnett, Leslie Burnett, and Mark Mackay
 - 4 Specimen Collection and Processing, 62**
Doris M. Haverstick and Patricia M. Jones
 - 5 Preanalytical Variation and Preexamination Processes, 81**
Ana-Maria Simundic, Nora Nikolac, and Walter G. Guder
 - 6 Quality Control of the Analytical Examination Process, 121**
W. Greg Miller and Sverre Sandberg
 - 7 Biological Variation, 157**
Callum G. Fraser and Sverre Sandberg
 - 8 Establishment and Use of Reference Intervals, 170**
Gary Horowitz and Graham R.D. Jones
 - 9 Evidence-Based Laboratory Medicine,* 195**
Patrick M.M. Bossuyt, Paul Glasziou, and Andrea Rita Horvath
 - 10 Biobanking,* 196**
Christina Ellervik and Jim Vaught
 - 11 Laboratory Support of Pharmaceutical, In Vitro Diagnostics, and Epidemiologic Studies,* 197**
Mark J. Sarno, Amar A. Sethi, Omar Laterza, and Nader Rifai
- ## SECTION II Analytical Techniques and Applications, 198
- 12 Principles of Basic Techniques and Laboratory Safety,* 199**
Stanley F. Lo
 - 13 Optical Techniques, 200**
Larry J. Kricka and Jason Y. Park
 - 14 Electrochemistry and Chemical Sensors, 224**
Paul D'Orazio
 - 15 Electrophoresis, 250**
Lindsay A.L. Bazydlo and James P. Landers
 - 16 Chromatography, 266**
David S. Hage
 - 17 Mass Spectrometry, 295**
Alan L. Rockwood, Mark M. Kushnir, and Nigel J. Clarke
 - 18 Sample Preparation for Mass Spectrometry Applications,* 324**
David A. Wells
 - 19 Mass Spectrometry Applications in Infectious Disease and Pathogens Identification,* 325**
Phillip Heaton and Robin Patel
 - 20 Development and Validation of Small Molecule Analytes by Liquid Chromatography-Tandem Mass Spectrometry,* 326**
Russell P. Grant and Brian A. Rappold

- 21 Proteomics,* 327**
Andrew N. Hoofnagle and Cory Bystrom
- 22 Enzyme and Rate Analysis, 328**
Renze Bais and Mauro Panteghini
- 23 Immunochemical Techniques, 348**
Larry J. Kricka and Jason Y. Park
- 24 Microfabrication and Microfluidics and Their Application in Clinical Diagnostics,* 368**
Lindsay A.L. Bazydlo and James P. Landers
- 25 Cytometry,* 369**
Howard M. Shapiro
- 26 Automation in the Clinical Laboratory,* 370**
Charles D. Hawker, Jonathan R. Genzen, and Carl T. Wittwer
- 27 Point-of-Care Testing,* 371**
Andrew St John and Christopher P. Price

SECTION III Analytes, 372

- 28 Amino Acids, Peptides, and Proteins, 373**
Dennis J. Dietzen
- 29 Serum Enzymes, 404**
Mauro Panteghini and Renze Bais
- 30 Enzymes of the Red Blood Cell,* 435**
Wouter W. van Solinge and Richard van Wijck
- 31 Tumor Markers, 436**
Catharine Sturgeon
- 32 Kidney Function Tests, 479**
Edmund J. Lamb and Graham R.D. Jones
- 33 Carbohydrates, 518**
David B. Sacks
- 34 Lipids, Lipoproteins, Apolipoproteins, and Other Cardiovascular Risk Factors, 539**
Alan T. Remaley, Thomas D. Dayspring, and G. Russell Warnick
- 35 Electrolytes and Blood Gases, 604**
Emily I. Schindler, Sarah M. Brown, and Mitchell G. Scott
- 36 Hormones, 626**
Timothy J. Cole
- 37 Vitamins and Trace Elements, 639**
Norman B. Roberts, Andrew Taylor, and Ravinder Sodhi
- 38 Hemoglobin, Iron, Bilirubin, 719**
M. Domenica Cappellini, Stanley F. Lo, and Dorine W. Swinkels
- 39 Porphyrins and the Porphyrins, 776**
Michael N. Badminton, Sharon D. Whatley, Eliane Sardh, and Aasne K. Aarsand
- 40 Therapeutic Drugs and Their Management, 800**
Michael C. Milone and Leslie M. Shaw
- 41 Clinical Toxicology, 832**
Loralie J. Langman, Laura K. Bechtel, Brenton M. Meier, and Chris Holstege
- 42 Toxic Elements, 888**
Frederick G. Strathmann and Lee M. Blum
- 43 Body Fluids,* 925**
Darci R. Block and Christopher M. Florkowski

SECTION IV Molecular Diagnostics, 926

- 44 Principles of Molecular Biology, 927**
John Greg Howe
- 45 Genomes and Variants, 942**
Carl T. Wittwer and Jason Y. Park
- 46 Nucleic Acid Isolation,* 958**
Stephanie A. Thatcher
- 47 Nucleic Acid Techniques, 959**
Carl T. Wittwer and G. Mike Makrigiorgos
- 48 Molecular Microbiology, 995**
Frederick S. Nolte
- 49 Genetics, 1025**
Cindy L. Vnencak-Jones and D. Hunter Best
- 50 Solid Tumor Genomics, 1072**
Elaine R. Mardis
- 51 Genetic Aspects of Hematopoietic Malignancies, 1082**
Todd W. Kelley and Jay L. Patel
- 52 Circulating Tumor Cells and Circulating Tumor DNA, 1111**
Evi Lianidou and Dave Hoon
- 53 Circulating Nucleic Acids for Prenatal Diagnostics, 1145**
Rossa W.K. Chiu and Y.M. Dennis Lo
- 54 Pharmacogenetics,* 1156**
Gwendolyn A. McMillin, Mia Wadelius, and Victoria M. Pratt
- 55 Identity Testing,* 1157**
Victor W. Weedn, Katherine B. Gettings, and Daniele S. Podini

SECTION V Pathophysiology, 1158

- 56 Nutrition: Laboratory and Clinical Aspects,* 1159**
William J. Marshall and Ruth M. Ayling
- 57 Diabetes Mellitus, 1160**
David B. Sacks
- 58 Cardiac Function, 1201**
Fred S. Apple, Jens Peter Goetze, and Allan S. Jaffe
- 59 Kidney Disease, 1256**
Michael P. Delaney and Edmund J. Lamb
- 60 Disorders of Water, Electrolytes, and Acid-Base Metabolism, 1324**
Steven Cheng, Emily I. Schindler, and Mitchell G. Scott
- 61 Liver Disease, 1348**
William Rosenberg, Tony Badrick, and Sudeep Tanwar
- 62 Gastric, Pancreatic, and Intestinal Function, 1398**
Roy A. Sherwood, Natalie E. Walsham, and Ingvar Bjarnason
- 63 Monoamine-Producing Tumors,* 1421**
Graeme Eisenhofer, Stefan Grebe, and Nai-Kong V. Cheung
- 64 Bone and Mineral Metabolism, 1422**
William D. Fraser
- 65 Pituitary Function and Pathophysiology, 1492**
William E. Winter, Ann McCormack, and Roger L. Bertholf
- 66 Adrenal Cortex, 1530**
Roger L. Bertholf, Mark Cooper, and William E. Winter

- 67 Thyroid Disorders, 1572**
Danielle B. Freedman, David Halsall, William J. Marshall, and Christina Ellervik
- 68 Reproductive Endocrinology and Related Disorders, 1617**
Robert D. Nerenz, Emily Jungheim, and Ann M. Gronowski
- 69 Pregnancy and Its Disorders, 1655**
Melanie L. Yarbrough, Molly Stout, and Ann M. Gronowski
- 70 Newborn Screening and Inborn Errors of Metabolism, 1697**
Marzia Pasquali and Nicola Longo

SECTION VI Hematology and Coagulation, 1731

- 71 Hemostasis,* 1732**
Russell A. Higgins, Steve Kitchen, and Dong Chen
- 72 Red Blood Cell Morphology and Indices With Clinical Chemistry Interface,* 1733**
Hooman H. Rashidi and Ralph Green
- 73 Automated Hematology,* 1734**
Devon Chabot-Richards, Qian-Yun Zhang, and Tracy I. George

SECTION VII Microbiology, 1735

- 74 Bacteriology,* 1736**
Christopher D. Doern and Betty A. Forbes
- 75 Antimicrobial Susceptibility Testing,* 1737**
Romney M. Humphries and April N. Abbott
- 76 Mycobacteriology,* 1738**
Adam J. Caulfield, Rachael M. Liesman, Derrick J. Chen, and Nancy L. Wengenack
- 77 Mycology,* 1739**
Ingibjörg Hilmarsdóttir, Audrey N. Schuetz, and Anna F. Lau
- 78 Parasitology,* 1740**
Esther Babady and Bobbi S. Pritt
- 79 Virology,* 1741**
Blake W. Buchan and Neil W. Anderson

SECTION VIII Transfusion Medicine, 1742

- 80 Blood Groups, Pretransfusion Testing, and Red Blood Cell Transfusion,* 1743**
Karen Quillen
- 81 Blood Components, Blood Donor Screening, and Transfusion Reactions,* 1744**
John P. Manis

Appendix Reference Information for the Clinical Laboratory, 1745
Khosrow Adeli, Ferruccio Ceriotti, and Michelle Nieuwesteeg

Index, 1819
