

Contents

INTRODUCING CLINICAL BIOCHEMISTRY 1

- The clinical biochemistry laboratory **2** The interpretation of results **6** Reference intervals **10**
 The use of the laboratory **4** Point of care testing **8**

CORE BIOCHEMISTRY 11

- Fluid and electrolyte balance: concepts and vocabulary **12**
 Water and sodium balance **14**
 Hyponatraemia: pathophysiology **16**
 Hyponatraemia: assessment and management **18**
 Hypernatraemia **20**
 Hyperkalaemia **22**
 Hypokalaemia **24**
 Intravenous fluid therapy **26**
 Investigation of renal function (1) **28**
 Investigation of renal function (2) **30**
 Urinalysis **32**
 Acute renal failure **34**
 Chronic renal failure **36**
 Acid–base: concepts and vocabulary **38**
 Metabolic acid–base disorders **40**
 Respiratory and mixed acid–base disorders **42**
 Oxygen transport **44**
 Acid–base disorders: diagnosis and management **46**
 Proteins and enzymes **48**
 Immunoglobulins **50**
 Myocardial infarction **52**
 Liver function tests **54**
 Jaundice **56**
 Liver disease **58**
 Glucose metabolism and diabetes mellitus **60**
 Diagnosis and monitoring of diabetes mellitus **62**
 Diabetic ketoacidosis **64**
 Hypoglycaemia **66**
 Calcium regulation and hypocalcaemia **68**
 Hypercalcaemia **70**
 Phosphate and magnesium **72**
 Bone disease **74**
 Osteoporosis **76**

ENDOCRINOLOGY 77

- Endocrine control **78**
 Dynamic function tests **80**
 Pituitary function **82**
 Growth disorders and acromegaly **84**
 Thyroid pathophysiology **86**
 Hypothyroidism **88**
 Hyperthyroidism **90**
 Adrenocortical pathophysiology **92**
 Hypofunction of the adrenal cortex **94**
 Hyperfunction of the adrenal cortex **96**
 Gonadal function **98**
 Subfertility **100**

SPECIALIZED INVESTIGATIONS 101

- Nutritional assessment **102**
 Nutritional support **104**
 Parenteral nutrition **106**
 The metabolic response to injury **108**
 Malabsorption **110**
 Iron **112**
 Copper and zinc **114**
 Therapeutic drug monitoring **116**
 Toxicology **118**
 Metal poisoning **120**
 Alcohol **122**
 Coma **124**
 Ascites and pleural fluid **126**
 Cerebrospinal and other body fluids **128**
 Lipoprotein metabolism **130**
 Clinical disorders of lipid metabolism **132**
 Hypertension **134**
 Cancer and its consequences **136**
 Tumour markers **138**
 Multiple endocrine neoplasia **140**
 Hyperuricaemia **142**
 Skeletal muscle disorders **144**
 Biochemistry in the elderly **146**
 DNA diagnosis **148**
 Fetal monitoring and prenatal diagnosis **150**
 Pregnancy **152**
 Screening the newborn for disease **154**
 Paediatric biochemistry **156**
 Inborn errors of metabolism **158**
 Selected inherited disorders **160**

CASE HISTORY COMMENTS 161

- Case history comments **162**
