| <b>Introduction .....</b>  | <b>5</b>  |
| <b>1    The State of Affairs of the Analyzed Issue at Home and Abroad .....</b>                              | <b>7</b>  |
| 1.1    The Delineation of the Basic Terminological Apparatus and the Terminological Interrelationships ..... | 7         |
| 1.1.1 Definition of the Term “Security” .....  | 8         |
| 1.2    Information Security (IS) .....   | 9         |
| 1.2.1 Information System, Security of Information Systems .....  | 13        |
| 1.2.2 Communication System (CS), the Security of Communication Systems .....                                 | 15        |
| 1.3    Small and Medium-sized Enterprises (SMEs) .....   | 27        |
| 1.4    Information Security in the SR.....   | 30        |
| 1.5    Information Security in the World .....   | 35        |
| 1.6    Development of Norms and Standards for the Security of Information and Communication Systems.....     | 38        |
| 1.7    Standards of the ISO / IEC 27000 Series Valid and Issued in the SR .....                              | 42        |
| 1.8    Basic Principles of Information Security Solutions .....  | 44        |
| 1.8.1 Information Security Study .....   | 45        |
| 1.8.2 Security Policy .....  | 45        |
| 1.8.3 Security Project .....   | 47        |
| 1.8.4 Risk Analysis.....   | 48        |
| 1.9    Threats to the Information System .....   | 48        |
| 1.9.1 Human Factor .....   | 48        |
| 1.9.2 Classification of Cybercrime.....  | 49        |
| 1.9.3 Types of Cybercrime .....  | 50        |
| 1.9.4 Criminal Liability in Cybercrime .....   | 53        |
| 1.9.5 Non-influenceable Natural Threats .....  | 54        |
| 1.9.6 Technical Failure of the Information System.....   | 56        |
| 1.10   Selected Security Tools of the Information System.....  | 56        |
| 1.10.1 Firewall.....   | 56        |
| 1.10.2 Antivirus Programs .....  | 58        |
| 1.10.3 Penetration Testing.....  | 58        |
| 1.10.4 E-mail Content Monitoring .....   | 59        |
| 1.10.5 Employee Internet Monitoring .....  | 60        |
| 1.10.6 Personnel Policy of an Organization as an Information Security Tool .....                             | 61        |
| 1.10.7 Other Measures .....  | 61        |
| <b>2    Aims of the Research and Methods Used .....</b>  | <b>62</b> |
| <b>3    Methodology and Research Methods .....</b>   | <b>64</b> |
| <b>4    Results of the Survey .....</b>  | <b>66</b> |
| 4.1    Sample of Respondents .....   | 66        |
| 4.2    The Importance of Information Security.....   | 69        |
| 4.3    Circumstances Influencing the Enforcement of Information Security.....                                | 70        |
| 4.3.1 Internet and E-communications .....  | 73        |
| 4.3.2 Antivirus Measures .....   | 78        |

|                        |  |            |
|------------------------|--|------------|
| 4.4                    | Personnel Security .....   | 79         |
| 4.5                    | Security Policy and the Use of IS / IT Standards and Norms .....   | 81         |
| 4.6                    | Security Incidents and their Consequences .....  | 83         |
| 4.7                    | Electronic Signature .....   | 86         |
| 4.8                    | Security Solutions .....   | 87         |
|                        | 4.8.1 Physical Security .....  | 90         |
|                        | 4.8.2 Backup of Documentation.....   | 92         |
|                        | 4.8.3 Access Rights and Passwords .....  | 93         |
|                        | 4.8.4 Protection of Personal Data and Classified Information.....  | 96         |
|                        | 4.8.5 Recovery and Functionality Plan .....  | 98         |
| 4.9                    | Information Security in Slovakia from the Point of View of Enterprises .....   | 100        |
| <b>5</b>               | <b>Factors Influencing Information Security in Enterprises in the Slovak Republic .....</b>  | <b>102</b> |
| 5.1                    | Comparison of the State of Information Security of Small and Medium-Sized Enterprises with the State of Information Security in Large Enterprises..... | 102        |
| 5.2                    | Comparison of the State of Information Security According to another Characteristic of the Enterprise .....  | 107        |
| 5.3                    | Security Management Models.....  | 108        |
|                        | 5.3.1 Security Assessment Model Based on Potential Threats .....   | 108        |
|                        | 5.3.2 Model of Security Assessment Based on Weaknesses of the Information System .....   | 109        |
|                        | 5.3.3 Impact-based Safety Assessment Model.....  | 110        |
| 5.4                    | Security Categories Based on Impacts - Proposal.....   | 111        |
| <b>Conclusion.....</b> | <b>114</b>   |            |
| <b>Resources.....</b>  | <b>117</b>   |            |
