<i>In Memory of Joyce Ellis Hubbard, MD</i>	xv
<i>Foreword</i> Margaret C. Slota, DNP, RN, FAAN	xvii
<i>Preface</i>	xix
<i>Acknowledgments</i>	xxi
<i>Important Aspects of EKG Interpretation</i>	xxiii

Section I. Mechanics

1. The EKG Machine	3
<i>Computerized Digital EKG Machine</i>	3
<i>Key Points When Operating an EKG Machine</i>	4
<i>EKG Settings</i>	5
<i>Some Reasons for Ordering an EKG</i>	5
2. How to Produce Quality Tracings	7
<i>Distractions</i>	7
<i>Limitations</i>	8
<i>Artifacts</i>	8

<i>Artifact Example</i>	9
<i>Residue</i>	10
<i>EKG Machine Representative</i>	10

Section II. Criteria for Pediatric Rhythms and EKGs

3. Technique	13
<i>Pediatric EKG Hookup Diagram</i>	13
<i>Pediatric EKG Hookup Instructions</i>	14
<i>Standardizations</i>	14
<i>Correct Labeling of Pediatric EKGs</i>	15
<i>Systematic Checklist</i>	16
<i>Rhythm Strip Use and Lengths</i>	17
<i>Dextrocardia</i>	17
<i>Dextrocardia Hookup and Explanation</i>	18
4. Fundamentals	19
<i>Electrical Pathways</i>	19
<i>Heartbeat Components and Explanations</i>	21
<i>Normal Pediatric Heart Rates</i>	22
<i>Determining Heart Rate</i>	22
<i>Electrocardiographic Paper Grid Dimensions</i>	23
<i>Tools for Heartbeat Measurement</i>	24
<i>Determining the Axis of the Heart</i>	25
<i>Axis Quadrants</i>	26
<i>Heart Rates of Some Dysrhythmias</i>	27
<i>Premature Ventricular Complex/Contraction (PVC) Frequency Events Chart</i>	28

Section III. Pediatric Rhythm Strips and Interpretations

5. Arrhythmias Associated With Specific Medical Conditions or Drugs	31
<i>Sinus Bradycardia (SB)</i>	32
<i>Sinus Tachycardia (ST)</i>	33
<i>Supraventricular Tachycardia (SVT)</i>	34
<i>Atrial Flutter (AFL)</i>	35

Atrial Fibrillation (AF)	36
Junctional Rhythms (JR)	37
Long QT Syndrome (LQTS)	38
Ventricular Tachycardia (VT)	39
Ventricular Fibrillation (VF)	40
First-Degree Atrioventricular (AV) Block	41
Second-Degree AV Block Mobitz I	42
Second-Degree AV Block Mobitz II	43
Third-Degree AV Block	44
Left Ventricular Hypertrophy (LVH)	45
Right Ventricular Hypertrophy (RVH)	46
Wolff-Parkinson-White (WPW) Syndrome	47
6. Normal to Advanced Rhythms	49
Normal Sinus Rhythm (NSR)	50
Sinus Arrhythmia (SA)	51
Sinus Bradycardia (SB)	52
Sinus Tachycardia (ST)	53
Wandering Atrial Pacemaker (WAP)	54
Supraventricular Ectopic (SVE) Beat	55
Supraventricular Tachycardia (SVT)	56
SVT Pre-Adenosine	57
SVT Post-Adenosine	58
Atrial Flutter (AFL)	59
Wolff-Parkinson-White (WPW) Syndrome	60
Junctional Rhythm (JR) Morphologies	61
Premature Junctional Complexes/Contraction (PJC)	62
Junctional Rhythm (JR)	63
Junctional Escape Rhythm (JER)	64
Accelerated Junctional Rhythm (AJR)	65
Junctional Tachycardia (JT)	66
Premature Ventricular Complexes/Contractions (PVC)	67
Multiform Ventricular Couplet	68
Ventricular Tachycardia (VT)	69
Torsades de Pointes (TdP)	70

<i>Ventricular Flutter and Fibrillation (VFL and VF)</i>	71
<i>Ventricular Fusion Beat (VFB)</i>	72
<i>First-Degree Atrioventricular (AVB) Block</i>	73
<i>Second-Degree Atrioventricular Block (AVB) Wenckebach Mobitz I</i>	74
<i>Second-Degree Atrioventricular (AVB) Block Mobitz II</i>	75
<i>Third-Degree Atrioventricular (AV) Heart Block (Complete Heart Block)</i>	76
<i>Long QT Syndrome (LOTS)</i>	77
<i>Three Interesting Rhythm Strips</i>	78
<i>Answers to the Three Interesting Rhythm Strips</i>	79

Section IV. EKGs and Interpretations

7. Pediatric Standards	83
<i>Tables of Normal Values</i>	83
<i>Measurement of QT and Calculation for QTc</i>	87
<i>Sudden Death From Inherited Long QT Syndrome (LOTS)</i>	88
8. Normal to Advanced EKGs and Interpretations	89
<i>Normal Sinus Rhythm</i>	91
<i>Normal Sinus Rhythm Interpretation</i>	92
<i>Sinus Arrhythmia (SA)</i>	93
<i>SA Interpretation</i>	94
<i>Sinus Bradycardia (SB)</i>	95
<i>SB Interpretation</i>	96
<i>Sinus Tachycardia (ST)</i>	97
<i>ST Interpretation</i>	98
<i>Wandering Atrial Pacemaker (WAP)</i>	99
<i>WAP Interpretation</i>	100
<i>Premature Atrial Complexes (PACs)</i>	101
<i>PACs Interpretation</i>	102
<i>Supraventricular Tachycardia (SVT)</i>	103
<i>SVT Interpretation</i>	104
<i>SVT Pre-Adenosine</i>	105
<i>SVT Pre-Adenosine Interpretation</i>	106
<i>Post-Adenosine</i>	107

Post-Adenosine Interpretation	108
Junctional Escape Rhythm (JER)	109
JER Interpretation	110
Accelerated Junctional Rhythm (AJR) Preceding SB	111
AJR Preceding SB Interpretation	112
Junctional Tachycardia (JT)	113
JT Interpretation	114
Junctional Ectopic Tachycardia (JET)	115
JET Interpretation	116
Permanent Form of Junctional Reciprocating Tachycardia (PJRT)	117
PJRT Interpretation	118
Atrial Flutter (AFL) With 2:1 Atrioventricular (AV) Conduction	119
AFL With 2:1 AV Conduction Interpretation	120
AFL With 4:1 and 6:1 AV Conduction	121
AFL With 4:1 and 6:1 AV Conduction Interpretation	122
Atrial Flutter/Fibrillation (AFL/AF)	123
AFL/AF Interpretation	124
Atrial Tachycardia With 2:1 AV Conduction	125
Atrial Tachycardia With 2:1 AV Conduction Interpretation	126
First-Degree AV Block	127
First-Degree AV Block Interpretation	128
Second-Degree AV Block Mobitz I	129
Second-Degree AV Block Mobitz I Interpretation	130
Second-Degree AV Block Mobitz II	131
Second-Degree AV Block Mobitz II Interpretation	132
Third-Degree AV Block	133
Third-Degree AV Block Interpretation	134
Premature Ventricular Complexes/Contractions (PVCs)	135
PVCs Interpretation	136
PVCs as Ventricular Couplets	137
PVCs as Ventricular Couplets Interpretation	138
Ventricular Tachycardia (VT)	139
VT Interpretation	140
Wide QRS Tachycardia	141
Wide QRS Tachycardia Interpretation	142

Possible Ventricular Fibrillation (VF)	143
Possible VF Interpretation	144
Ventricular Fusion Beat (VFB)	145
VFB Interpretation	146
Hyperkalemia	147
Hyperkalemia Interpretation	148
Hypokalemia	149
Hypokalemia Interpretation	150
Long QT Syndrome (LQTS)	151
LQTS Interpretation	152
T Wave Inversion	153
T Wave Inversion Interpretation	154
Left Axis Deviation (LAD)	155
LAD Interpretation	156
Right Axis Deviation (RAD)	157
RAD Interpretation	158
Left Ventricular Hypertrophy (LVH)	159
LVH Interpretation	160
Right Ventricular Hypertrophy (RVH)	161
RVH Interpretation	162
RVH and Intraventricular Conduction Delay (IVCD)	163
RVH and IVCD Interpretation	164
Biventricular Hypertrophy (BVH)	165
BVH Interpretation	166
Left Atrial Enlargement (LAE)	167
LAE Interpretation	168
Right Atrial Enlargement (RAE)	169
RAE Interpretation	170
Biatrial Enlargement (BAE)	171
BAE Interpretation	172
Wolff–Parkinson–White (WPW) Syndrome	173
WPW Syndrome Interpretation	174
Lown–Ganong–Levine (LGL) Syndrome	175
LGL Syndrome Interpretation	176
Left Bundle Branch Block (LBBB)	177

<i>LBBB Interpretation</i>	178	
<i>Right Bundle Branch Block (RBBB)</i>	179	
<i>RBBB Interpretation</i>	180	
<i>Dextrocardia</i>	181	
<i>Dextrocardia Interpretation</i>	182	
<i>Deep Q Waves</i>	183	
<i>Deep Q Waves Interpretation</i>	184	
<i>Heart Transplant</i>	185	
<i>Heart Transplant Interpretation</i>	186	
<i>Junctional Rhythm (JR), LAD, and RBBB</i>	187	
<i>JR, LAD, and RBBB Interpretation</i>	188	
<i>Sinus Tachycardia (ST), LAD, and Possible RBBB</i>	189	
<i>ST, LAD, and Possible RBBB Interpretation</i>	190	

Section V. Self-Assessment Workbook

9. Review Worksheets and Questions	193
