CONTENTS

I. ETHOLOGY: THE OBJECTIVE STUDY OF BEHAVIOUR	1
INTRODUCTION	I
AIMS, SCOPE, AND LIMITATIONS OF A CAUSAL STUDY OF	
INNATE BEHAVIOUR	2
Other Sciences of Innate Behaviour	3
Directiveness	3
Subjective Phenomena	4
Other Causal Sciences of Innate Behaviour	5
Physiology	5
Psychology	6
SOME CHARACTERISTICS OF THE OBJECTIVE STUDY OF INSTINC	
Description Balance and the second se	7
Ethograms	7
Discrimination of Colour by Honey Bees	8
Delayed Reaction	8
The Need of a Broad Basis for Generalizations	10
Experimental Procedure	12
RELATIONS TO OTHER FIELDS OF ZOOLOGY	12
Ecology	13
Sociology Taxonomy	13
Evolution	13
Evolution	14
II. BEHAVIOUR AS A REACTION TO EXTERNAL STIMULI	15
'SPONTANEOUS' AND REACTIVE BEHAVIOUR	15
THE POTENTIAL CAPACITIES OF THE SENSE ORGANS	16
Sensitivity	18
Discrimination	20
Localization	21
ACTUAL VERSUS POTENTIAL STIMULI	25
Sign Stimuli	25
The 'Innate Releasing Mechanism'	37
'Supernormal' Sign Stimuli	44
Reaction Chains	47
Ambivalent Behaviour	50
Innate Behaviour in Mammals	51
Innate or Conditioned?	51
What is 'a Reaction?'	54
Social Releasers	55
	00

III. THE INTERNAL FACTORS RESPONSIBLE FOR THE	
'SPONTANEITY' OF BEHAVIOUR	57
INDIRECT EVIDENCE	57
Variations of Intensity or Frequency of the Reaction under Con- stant Conditions	57
Variation of Liminal Releasing Stimulus	59
Change of Liminal Inhibiting Stimulus	62
DIRECT EVIDENCE	63
Hormones	63
Internal Sensory Stimuli	66
Intrinsic Central Nervous Factors	67
Initiation	67
Rhythmic Activity of a Somite	71
Propagation along the Trunk	71
THE CO-OPERATION OF THE CAUSAL FACTORS	73
CONCLUSION ADDRESS BOYAGE	74
The Need of a Broad Basis for Generalizations	~
IV. FURTHER CONSIDERATION OF THE EXTERNAL STIMULI	76
SIGN STIMULI	76
THE STIMULUS SITUATION AS A WHOLE	79
RELEASING AND DIRECTING STIMULI	81
TYPES OF ORIENTATION	88
Klinotaxis Tropotaxis	90
Tropotants	91
'Dorsal Light Reaction'	93
Telotaxis	94
Menotaxis-	95
'Mnemotaxis'	97
V. AN ATTEMPT AT A SYNTHESIS	IOI
RECAPITULATION	IOI
DIFFERENCES IN DEGREE OF COMPLEXITY OF 'REACTIONS'	102
HIERARCHICAL ORGANIZATION	102
APPETITIVE BEHAVIOUR AND CONSUMMATORY ACT	104
NEUROPHYSIOLOGICAL FACTS	107
The Relatively Higher Levels	107
Instinct and Instincts	110
Displacement Activities	113
The Lower Levels	119
P. Weiss's Concept of Nervous Hierarchy	121
CONCLUSION	122

CONTENTS	xxi
VI. THE DEVELOPMENT OF BEHAVIOUR IN THE INDIVI-	
DUAL	128
THE GROWTH OF INNATE MOTOR PATTERNS	128
THE MATURATION OF INNATE MOTOR PATTERNS	137
LEARNING PROCESSES	142
The Detection of Learning	143
Growth and Maturation	143
Sympathetic Induction and Imitation	143
Acquisition of Skill	144
Raising in Isolation	144
Individual Differences as Indications of Learning	144
The Innate Disposition to Learn	145
'Localized Learning'	145
Preferential Learning	149
Critical Periods of Learning	150
VII. THE ADAPTIVENESS OF BEHAVIOUR	151
INTRODUCTION	151
ACTIVITIES OF DIRECT ADVANTAGE TO THE INDIVIDUAL	160
Feeding Behaviour	160
Escape Behaviour	162
ACTIVITIES OF ADVANTAGE TO THE GROUP	168
Mating	171
Fighting	175
Care of Offspring	182
VIII. THE EVOLUTION OF BEHAVIOUR	185
INTRODUCTION	185
Palaeontology	186
Embryology	186
Typology	188
Synthesis of Palaeontology, Embryology, and Typology	188
The Dynamics of Evolution	189
FACTS BEARING ON THE DESCRIPTIVE STUDY OF THE EVOLU-	own
TION OF BEHAVIOUR	189
The Establishment of Homologies	189
Homologization of Social Releasers	191
Comparison of Larger Units	193
THE MECHANISM OF THE EVOLUTION OF BEHAVIOUR	195
Mutations and Behaviour	196
Speciation and Behaviour	196
Subspecific Differences	197
Specific Differences	197
Sympatric Speciation	199
McDougall's Work on Lamarckism	200

CONTENTS

THE PART PLAYED BY BEHAVIOUR IN THE CAUSATION OF	
EVOLUTION	201
Isolating Mechanisms	201
Selection	203
THE ETHOLOGICAL STUDY OF MAN	205
The Lower Levels	207
Instincts	208
