

CONTENTS

Preface	7
Introduction	9
Methods of study of fish nematodes	15
Morphology and taxonomy of fish nematodes	21
Bionomy of fish nematodes	29
Reproduction and dispersion of fish nematodes	29
Intermediate host – parasite relationships in fish nematodes	38
Definitive host – parasite relationships in fish nematodes	52
Paratenic parasitism in fish nematodes	74
Postcyclic parasitism in fish nematodes	83
Polyvalent hosts and alternative life-cycles in fish nematodes	87
Influence of the environment on the species composition of nematodes parasitic in fishes, their life-cycle patterns and geographical distribution	90
Pathogenicity of nematodes parasitizing freshwater fishes	99
Systematic review of the nematodes parasitizing European freshwater fishes	102
Adult nematodes	102
Order Enoplida	102
Family Capillariidae	103
Family Cystoosidae	121
Order Ascaridida	126
Family Anisakidae	126
Family Quimperiidae	161
Family Cucullanidae	172
Order Spirurida	203
Family Camallanidae	205
Family Anguillicolidae	223
Family Skrjabillanidae	233
Family Daniconematidae	253
Family Philometridae	256
Family Rhabdochonidae	301
Family Cystidicolidae	338
Nematodes parasitic in fishes as larvae	374
Superfamily Dioctophymatoidea	374
Family Dioctophymatoidea	374
Superfamily Ascaridoidea	385
Family Anisakidae	386
Family Ascarididae	402

Superfamily Seuratoidea	404
Family Quimperiidae	404
Family Cucullanidae	405
Superfamily Gnathostomatoidea	405
Family Gnathostomatidae	406
Superfamily Dracunculoidea	411
Family Dracunculidae	411
Family Philometridae	412
Superfamily Aproctoidea	413
Family Desmidocercidae	414
Superfamily Acuarioidea	414
Family Acuariidae	414
Host – nematode parasite list	422
References	435
Index	462
