ACKNOWLEDGMENTS	ix	Umami as a global presence	36
PROLOGUE: HOW IT ALL BEGAN	xiii	Umami has won acceptance as a distinct taste	38
WHAT EXACTLY IS TASTE, AND WHY IS IT IMPORTANT?	1	And umami is still controversial ...	39
The basic tastes: From seven to four to five and possibly many more	1	1 + 1 = 8: GUSTATORY SYNERGY	41
Why do we need to be able to taste our food?	4	Amazing interplay: Basal and synergistic umami	41
There is more to it: Sensory science, taste, smell, aroma, flavor, mouthfeel, texture, and chemesthesis	5	Detecting umami synergy on the tongue and in the brain	42
Is there a taste map of the tongue?	7	Japanese dashi: <i>The</i> textbook example of umami synergy	43
Why are some foods more palatable than others?	8	The art of making Japanese dashi	45
A few words about proteins, amino acids, nucleotides, nucleic acids, and enzymes	9	Nordic dashi	47
Glutamic acid, glutamate, and the glutamate ion	11	Dashi closer to home—a Japanese soup with a Scandinavian twist	48
Glutamic acid and glutamate in our food	12	Seaweeds enhance the umami in fish	52
How does glutamate taste, and how little is required for us to taste it?	13	How to make smoked shrimp heads	53
THE FIRST FOUR:		Many substances interact synergistically with umami	54
SOUR, SWEET, SALTY, AND BITTER	15	A breakthrough discovery of yet another synergistic substance	54
The physiology and biochemistry of taste	15	The interplay between glutamate and the four classic tastes	55
The interplay between sweet and bitter	16	A simple taste test: Umami vs. salt	56
Taste receptors: This is how they work	17	Umami-rich ‘foie gras from the sea’	57
When words fail us: Descriptions of tastes	20	Food pairing and umami	60
THE FIFTH TASTE: WHAT IS UMAMI?	23	Creating tastes synthetically	60
Science, soup, and the search for the fifth taste	23	Umami: Either as little or as much as you like	62
Glutamic acid and glutamate	24	UMAMI FROM THE OCEANS: SEAWEEDS, FISH, AND SHELLFISH	65
What is the meaning of the word <i>umami</i> ?	26	Seaweeds and konbu: <i>The</i> mother lode of umami	65
From laboratory to mass production	27	A world of konbu in Japan	66
How MSG is made	28	Fresh fish and shellfish	69

RECIPES

Potato water dashi with smoked shrimp heads	53	Parmesan biscuits with bacon and yeast flakes	150
Monkfish liver au gratin with crabmeat and vegetables	58	Harry’s crême	152
Pearled spelt, beets, and lobster	70	Chicken bouillon	157
Crab soup	76	Green pea soup with scallops and seaweed	163
Clambake in a pot	78	Dressing with nutritional yeast	173
<i>Patina de pisciculis</i>	82	Eggplant gratinée with garlic, anchovies, and nutritional yeast	174
<i>Garum</i>	86	Oysters au gratin with a crust of nutritional yeast and smoked shrimp head powder	175
Quick-and-easy <i>garum</i>	86	<i>Bagna càuda</i>	176
Smoked quick-and-easy <i>garum</i>	87	Old-fashioned Danish <i>medisterpølse</i>	181
Seriously old-fashioned sourdough rye bread	107	Beef patties, Danish style	183
Anchovies, grilled onions, sourdough bread, <i>pata negra</i> ham, and mushrooms	108	Chicken Marengo	185
Deep-fried eggplants with miso (<i>nasu dengaku</i>)	115	Cassoulet	186
White asparagus in miso with oysters, cucumber oil, and small fish	116	Beef <i>estofado</i>	188
Grilled <i>shōjin kabayaki</i> : ‘Fried eel’ made from lotus root	123	Sicilian ratatouille	190
Baked monkfish liver with raspberries and peanuts	128	<i>Brandade</i> with air-dried ham and green peas	191
Slow-roasted sauce with tomatoes, root vegetables, and herbs	130	Three-day pizza with umami—not really a ‘fast food’	192
Fried mullet with baked grape tomatoes, marinated sago pearls, and black garlic	132	Quail pâté	196
Mushrooms, foie gras, and mushroom essence	138	Risotto	197
		Oxtails braised in wheat beer	201
		Umami sorbet with <i>maccha</i> and tomato	202
		White chocolate cream, black sesame seeds, Roquefort, and brioche with nutritional yeast	203
