1. Development of In Vitro Toxicology: A Historic Story

Shripriya Singh, Vinay K. Khanna and Aditya B. Pant

Introduction	1
What In Vitro Toxicology and How It Came Into Being?	1
Why In Vitro Not In Vivo?	2
The Regulatory Control and Policy Makers	2
Projects and Developments	4
Some of the Validated In Vitro Alternatives and Methods	5
The Available In Vitro Models Systems	7
Explant/Organ Culture	7
Cell Culture	8
Primary Cell Culture	8
Immortalized Cell Lines	8
Organotypic Cultures	8
Stem Cells and Induced Pluripotent Stem Cells	9
Organoid Culture	9
Basal to Organ-Specific Endpoints of In Vitro Toxicology	9
Basal Toxicity or Cytotoxicity	9
Genotoxicity	10
Cells to 3D Organoids: In Vitro Organ System Toxicology	11
Hepatotoxicity In Vitro	11
Neurotoxicity In Vitro	12
Nephrotoxicity In Vitro	13
Cardiotoxicity In Vitro	14
Nanotoxicology In Vitro	14
Summary	15
Suggested Web Portals for Further Reading	15
References	16

2. Principles for In Vitro Toxicology

*Sonal Srivastava, Sakshi Mishra, Jayant Dewangan, Aman Divakar,
Prabhash K. Pandey and Srikanta K. Rath*

Introduction	21
Guidelines Governing the In Vitro Methods for Toxicity Testing	22
Optimization of Cell Culture	25
Models of In Vitro Toxicity	26
Explant Culture	27
Organotypic Culture	27
Cell Cultures	27
Three Dimensional Culture Systems	28
Development of Biomarkers for In Vitro Toxicity Evaluation	28
Assays for Screening of Toxicants	29
Ames Test	29
The Hen's Egg Test-Chorio Allantoic Membrane Test	29
Corrosivity Assays	32
3T3 Neutral Red Uptake Test	32
Tetrazolium Salt, 3-(4,5-Dimethylthiazol-2-yl)-2, 5-Diphenyltetrazolium Bromide Assay	32
Alamar Blue	33
The Bovine Cornea Opacity/Permeability Test	33
Dose-Response Relationship	33
Evaluation of DR Relationship	34
Data Interpretation	35
Validation of In Vitro Toxicology Test Methods	36
The "Omics" Approach	37
Conclusion	38
Acknowledgments	38
References	40

3. Models and Methods for In Vitro Toxicity

*Abhishek K. Jain, Divya Singh, Kavita Dubey, Renuka Maurya,
Sandeep Mittal and Alok K. Pandey*

Introduction	45
Need of In Vitro Models for Toxicity Assessment	46
Validation of In Vitro Test Methods	47
Criteria for Validation	47
Criteria for Regulatory Acceptance	47
Models for In Vitro Toxicity Assessment	48
In Vitro Models for Cytotoxicity Studies	48
In Vitro Models for Specific Toxicity	48
Methods Employed for In Vitro Toxicity Assessment	51
Cytotoxicity Assessment	51
Genotoxicity Assessment	53
Mutagenicity	56
Toxicokinetic Study	58

Cellular and Functional Responses (Protein/Gene Expression)	58
State of Art and Recent Development Regarding In Vitro Approaches	59
Omics Approach	59
Bioinformatics and Computational Toxicology	60
Integrated Testing Strategies	60
Challenges and Considerations	60
Future Perspective	61
Conclusion	62
References	62
4. In Vitro Gene Genotoxicity Test Methods	
<i>Manisha Dixit and Amit Kumar</i>	
Introduction	67
Importance of Genotoxicity Testing	68
Test for Genotoxicity	70
The Standard Test Battery for Genotoxicity	70
General Protocol for In Vitro Tests	72
Different In Vitro Tests	74
Bacterial Reverse Mutation Test (TG 471)	74
In Vitro Mammalian Chromosome Aberration Test (TG 473)	76
In Vitro Mammalian Cell Gene Mutation Tests Using the <i>Hprt</i> and <i>xprt</i> Genes (TG 476)	77
In Vitro Mammalian Cell Micronucleus Test (TG 487)	79
In Vitro Mammalian Cell Gene Mutation Tests Using the TK Gene (TG 490)	80
Current Limitations of In Vitro Genotoxicity Testing	82
Faulty Metabolic Activator System	82
False Positive Results	83
False Negative Results	83
Future Prospective of the Genotoxicity Testing	84
Summary	84
Acknowledgments	85
References	85
5. In Silico Approaches for Predictive Toxicology	
<i>Ramakrishnan Parthasarathi and Alok Dhawan</i>	
Introduction	91
In Silico Toxicology Framework for Toxicity/Safety Prediction	91
In Silico Toxicology	93
QSAR for Predictive Toxicology	95
Descriptors for Predictive Toxicology	97
Databases and Web Tools for Predictive Toxicology	100
Summary	106
Acknowledgments	106
References	107

6.	The Use of Transcriptional Profiling in In Vitro Systems to Determine the Potential Estrogenic Activity of Chemicals of Interest	
	<i>Jorge M. Naciff</i>	
	Introduction	111
	Why Do We Have to Assess the Potential Estrogenicity of Chemicals of Interest?	112
	Transcriptional Profiling in In Vitro Systems to Determine the Potential Estrogenic Activity of Chemicals of Interest	115
	Connectivity Mapping to Define Mode of Action	120
	In vitro to in Vivo Extrapolation	121
	Conclusion	122
	References	123
7.	Extrapolation of In Vitro Results to Predict Human Toxicity	
	<i>Sonali Das</i>	
	Need to Understand Toxicity	127
	Organ Level and System Level Toxicity	128
	Hepatotoxicity	128
	Toxicity Assessment In Vitro: Advantages and Disadvantages	131
	In Vitro Systems for Liver Toxicity Assessment	131
	In Vitro System for Nephrotoxicity Assessment	136
	To Overcome In Vitro Assay Limitation	136
	Extrapolation of In Vitro Information to In Vivo for Human: Successful and Unsuccessful Outcomes	138
	Upcoming Potential Methods to Predict Toxicity	138
	References	139
8.	Role of Molecular Chaperone Network in Understanding In Vitro Proteotoxicity	
	<i>Tulika Srivastava, Sandeep K. Sharma and Smriti Priya</i>	
	Introduction	143
	Balance Between Protein Folding and Misfolding: Misfolded Proteins Are Toxic Species	144
	Mechanisms of Cellular Proteotoxicity	145
	Cellular Defense Against Proteotoxicity: Molecular Chaperones	146
	Role in Proteotoxicity: Molecular Chaperones Antagonizes the Accumulation of Proteotoxic Proteins	147
	The Cellular Degradation Mechanism in Proteotoxicity	151
	The Ubiquitin Proteasome System	151
	Autophagy	153
	Specific Role of Degradation Pathways in Mitigating Proteotoxicity	154
	Toxicity of Amyloid Beta in AD	155

Toxicity of α -Synuclein in PD	155
Toxicity of Huntingtin Protein in HD	156
Prion Proteins in Encephalopathies	157
Conclusion	158
References	159
9. Scientific and Regulatory Considerations in the Development of in Vitro Techniques for Toxicology	
<i>Mukul R. Jain, Debdutta Bandyopadhyay and Rajesh Sundar</i>	
Introduction	165
Why In Vitro Toxicity?	165
In Vitro Assays for Safety and Toxicity Assessment	166
Cytotoxicity Assessment	166
Assessment of Carcinogenicity	169
Reproductive and Developmental Toxicity Assessment	171
Phototoxicity Assessment	172
Hepatotoxicity	172
Safety Pharmacology	173
Tissue Cross-Reactivity Assay	173
The Application of the Principles of GLP to in Vitro Studies	174
Validation of in Vitro Methods	176
Regulatory Acceptance of Alternative Methods to Animal Testing	178
Translational Aspects of in Vitro Assays	178
Pitfalls in In Vitro Toxicology	178
Acknowledgments	183
References	183
10. Safety Concerns Using Cell-Based In Vitro Methods for Toxicity Assessment	
<i>Vyas Shingatgeri</i>	
Introduction	187
Biosafety and Risk Management in In Vitro Laboratories	188
Risk-Classification Based on Type of Cells	189
Risk Associated With Cell Culture	189
Who May Be at Risk?	190
Factors Contributing Toward Risk in the Cell Culture	190
Tissue/Type, Origin, and Source of Cells	190
Viral Contamination	191
Problems Associated With Viral Contaminations	192
Origin of Viral Contaminations	193
Mycoplasmas	193
How Does Mycoplasma Enter Cell Cultures?	194
Culture Media	194
Transmission Involving Use of Needles and Sharp Objects During Manipulations	195

Fetal Bovine Serum	195
Handling Cells Outside Biosafety Cabinets	195
Altering Culture Conditions	196
Risk Associated With Procedures Involving Cryobanks/ Liquid Nitrogen	196
Risk Associated With Procedures Involving CO ₂ Cylinders	196
Risk Associated With Procedures Involving Toxic Compounds	197
Physical Hazards and Others	198
Ergonomic Hazards	198
Ionizing Radiations	198
Nonionizing Radiations	198
Noise Hazards	198
Recommended Practices	199
Containment Measures for Working With Cell Cultures	201
State and Federal Regulations	201
OSHA Standards	202
Laboratory Standards	202
Hazard Communication Standards	202
The Blood Borne Pathogens Standard	202
The Personal Protective Equipment Standard (29 CFR 1910.132)	202
The Eye and Face Protection Standard (29 CFR 1910.133)	203
The Respiratory Protection Standard (29 CFR 1910.134)	203
The Hand Protection Standard (29 CFR 1910.138)	203
The Control of Hazardous Energy Standard (29 CFR 1910.47)	203
Conclusions	203
References	205
Further Reading	207

11. In Vitro Methods for Predicting Ocular Irritation

Sanae Takeuchi and Seok Kwon

Introduction	209
In Vitro Methods Adopted by OECD	210
Isolated Chicken Eye Test	210
Bovine Corneal Opacity and Permeability Test	211
Fluorescein Leakage Assay	212
Short Time Exposure Test	213
Reconstructed Human Cornea-Like Epithelium Test Method	213
Recent Development and Looking Into Future	214
Conclusion	216
References	216
