Preface		v
Warning		xi
Introduction		xiii
PART I	ISOLATION TECHNIQUES	
CHAPTER 1	SIZE EXCLUSION CHROMATOGRAPHY	3
	Introduction	3
	Separation Media	4
	Chromatography Equipment	7
	Low- and Medium-Pressure Techniques	12
	High-Performance Techniques	17
	References	20
CHAPTER 2	ION-EXCHANGE CHROMATOGRAPHY	22
	Introduction	22
	Choice of Functional Group	24
	Ion-Exchange Media	25
	Chromatographic Equipment	27
	Separation Techniques	29
	References	38
CHAPTER 3	AFFINITY CHROMATOGRAPHY	40
	Introduction	40
	Theory of Affinity Chromatography	41

	Affinity Support Matrices	42
	Ligands and Immobilization Chemistry	48
	Isolation Techniques	59
	Elution Techniques	64
	Specialized Techniques	67
	References	70
CHAPTER 4	IMMUNOAFFINITY CHROMATOGRAPHY	75
	Introduction	75
	Theory of Immunoaffinity Chromatography	76
	Antibodies Used in Immunoaffinity Techniques	76
	Techniques for Immobilizing Antibodies	78
	Immunoaffinity Chromatography Techniques	86
	High-Performance Immunoaffinity Chromatography	89
	References	100
CHAPTER 5	POLYACRYLAMIDE GEL ELECTROPHORESIS	103
	Properties of Polyacrylamide Gels	104
	Electrophoresis Apparatus	106
	Gel Formation Techniques	109
	Specialized Techniques	118
	Recovery of Gels from Tubes and Cassettes	125
	Recovery of Separated Bands	126
	References	128
CHAPTER 6	ISOELECTRIC FOCUSING	131
	Theory of Isoelectric Focusing	132
	Agarose Gel Techniques	134
	Polyacrylamide Gel Techniques	137
	Granulated Media Techniques	141
	Specialized Apparatus	144
	Measurement of Isoelectric Points	152
	References	154
CHAPTER 7	TWO-DIMENSIONAL TECHNIQUES	157
	Overview	157
	Electrophoresis Apparatus	158
	Preparation of the Sample	166
	Two-Dimensional Gel Techniques	167
	Two-Dimensional Separation of Nucleic Acids	173

	Interpretation of Results	174
	References	174
CHAPTER 8	CHROMATOFOCUSING	177
	Introduction	177
	Theory of Chromatofocusing Separations	179
	Preparation of Separation Columns	179
	Sample Preparation	180
	Development of the Separation	181
	Sample Cleanup Techniques	185
	Special Techniques	186
	References	187
PART II	MEASUREMENT TECHNIQUES	
CHAPTER 9	GEL PRECIPITATION TECHNIQUES	191
	Overview of Methodology	191
	Types of Agar	192
	Immunodiffusion Techniques	193
	Immuno-electrophoresis	197
	Interpretation of Results	205
	References	209
CHAPTER 10	ELUTION AND BLOTTING TECHNIQUES	211
	Elution Techniques	211
	Blotting Media	218
	Passive Transfer Techniques	222
	Electro-Transfer Techniques	224
	References	232
CHAPTER 11	GEL STAINING TECHNIQUES	235
	Preparation of Gels	236
	Dye Staining Techniques	237
	Metal Staining Techniques	241
	Lectin Staining Techniques	244
	Immunological Staining Techniques	245
	Autoradiography	250
	Nucleic Acid Staining	252
	Photographic Recording Techniques	257
	References	260

CHAPTER 12	IMMUNOASSAYS	263
	Overview of Techniques	263
	Preparation of Labeled Reagents	264
	Immobilization of Antibodies and Antigens to Solid Supports	271
	Removal of Unbound Materials	278
	Immunoassays	280
	References	297
APPENDIX 1	PROTEIN MEASUREMENT	301
APPENDIX 2	PRODUCTION OF REAGENT ANTIBODIES	306
APPENDIX 3	ANTIBODY DIGESTION TECHNIQUES	324
APPENDIX 4	SUPPLIERS	329
	Index	333
