

PLANT HORMONES: Biosynthesis, Signal Transduction, Action!

Revised 3rd Edition 2010

Edited By Peter J. Davies

Contents

Preface to the Revised Version.....	xi
Preface	xiii
Color Plates	xv
A. INTRODUCTION	
1 The plant hormones: Their nature, occurrence and function Peter J. Davies	1-15
2 Regulatory factors in hormone action: Level, location and signal transduction Peter J. Davies	16-35
B. HORMONE BIOSYNTHESIS, METABOLISM AND ITS REGULATION	
1 Auxin biosynthesis and metabolism Jennifer Normanly, Janet P. Slovin and Jerry D. Cohen	36-62
2 Gibberellin biosynthesis and inactivation Valerie M. Sponsel and Peter Hedden	63-94
3 Cytokinin biosynthesis and metabolism Hitoshi Sakakibara.....	95-114
4 Ethylene biosynthesis Jean-Claude Pech, Alain Latché and Mondher Bouzayen.....	115-136
5 Abscisic acid biosynthesis and metabolism Steven H. Schwartz and Jan A.D. Zeevaart.....	137-155
6 Brassinosteroids biosynthesis and metabolism Sunghwa Choe.....	156-178
7 Regulation of gibberellin and brassinosteroid biosynthesis by genetic, environmental and hormonal factors James B. Reid, Gregory M. Symons and John J. Ross	179-203

C. THE FINAL ACTION OF HORMONES

- 1 Auxin and cell elongation
Robert E. Cleland204-220
- 2 Gibberellin action in germinating cereal grains
Fiona Woodger, John V. Jacobsen, and Frank Gubler221-240
- 3 Cytokinin regulation of the cell division cycle
Luc Roef and Harry Van Onckelen241-261
- 4 Expansins as agents of hormone action
Hyung-Taeg Cho and Daniel Cosgrove262-281

D. HORMONE SIGNAL TRANSDUCTION

- 1 Auxin signal transduction
Gretchen Hagen, Tom J. Guilfoyle and William M. Gray282-303
Update: the auxin receptor304-307
- 2 Gibberellin signal transduction in stem elongation and leaf growth
Tai-Ping Sun308-324
Update: the gibberellin receptor325-328
- 3 Cytokinin signal transduction
Bridey B. Maxwell and Joseph J. Kieber329-357
- 4 Ethylene responses in seeding growth and development
Ramlah B. Nehring and Joseph R. Ecker358-376
- 5 Ethylene signal transduction in fruits and flowers
Harry J. Klee and David G. Clark377-398
- 6 Abscisic acid signal transduction in stomatal responses
Sarah M. Assmann399-420
Update: the abscisic acid receptors 2009421-426
- 7 Brassinosteroid signal transduction and action
Steven D. Clouse427-450

E. THE FUNCTIONING OF HORMONES IN PLANT GROWTH AND DEVELOPMENT

- 1 The transport of auxins
David A. Morris, Jiří Friml and Eva Zažímalová451-484
- 2 The induction of vascular tissues by auxin
Roni Aloni485-506
- 2A Strigolactones: the new class of branching hormones
Christine A. Beveridge and Catherine Rameau507-518
- 3 Hormones and the regulation of water balance
Ian C. Dodd and William J. Davies519-538
- 3A The flowering hormone - Florigen: a protein hormone
Brian G. Ayre539-548
- 4 The role of hormones during seed development and germination
Ruth R. Finkelstein549-573

5	Hormonal and daylength control of potato tuberization Salomé Prat.....	574-596
6	The hormonal regulation of senescence Susheng Gan.....	597-617
7	Genetic and transgenic approaches to improving crop performance via hormones Andy L. Phillips.....	618-645

F. THE ROLES OF HORMONES IN DEFENSE AGAINST INSECTS AND DISEASE

1	Jasmonates Gregg A. Howe..... Update: the jasmonate receptor.....	646-670 671-680
2	Salicylic acid Terrence P. Delaney.....	681-699
3	Peptide hormones Clarence A. Ryan and Gregory Pearce.....	700-716

G. HORMONE ANALYSIS

1	Methods of plant hormone analysis Karin Ljung, Göran Sandberg and Thomas Moritz.....	717-740
---	---	---------

	TABLE OF GENES	741-764
--	-----------------------------	---------

	INDEX	765
