

# CONTENTS

<b>1</b>	<b>Preface</b> .....	<b>1</b>
<b>2</b>	<b>Stereoselectivity as a Tool in a Directed Organic Synthesis</b> .....	<b>3</b>
<b>3</b>	<b>Resolution of Racemates to Enantiomers</b> .....	<b>5</b>
3.1	Racemate, Racemic Mixture (Conglomerate), Racemic Compound, Racemate Solid Solution .....	5
3.2	Methods of Differentiation between Racemic Mixture, Racemic Compound and Racemic Solid Solution .....	6
3.3	Resolution of Racemates to Enantiomers .....	8
3.3.1	Resolution via Diastereoisomers .....	9
3.3.2	Resolution via Diastereoisomeric Complexes .....	11
3.3.3	Resolution by means of Chromatography on a Chiral Phase .....	13
3.3.4	Resolution using Biochemical Methods .....	13
3.3.5	Obtaining Enantiomers by Asymmetric Transformation .....	14
<b>4</b>	<b>Behaviour of Enantiomers under Chiral Conditions</b> .....	<b>17</b>
4.1	Criteria of Optical Purity .....	18
4.2	Determination of Optical Purity by the Method of Nuclear Magnetic Resonance .....	19
4.2.1	Conversion of Enantiomers to Diastereoisomeric Compounds .....	19
4.2.2	Use of Chiral Solvents .....	20
4.2.3	Use of Chiral Shift Reagents .....	20
4.2.4	Other Methods Utilizable for the Determination of Optical Purity .....	22
<b>5</b>	<b>Enantioselective (Asymmetric) Reactions</b> .....	<b>24</b>
5.1	Characteristic Features of Asymmetric Reactions and their Classification .....	24
5.2	Models of Asymmetric Induction .....	27
5.3	Attempts at a Quantitative Evaluation of Asymmetric Induction .....	30
5.4	Specification of the Steric Course of Diastereoselective and Enantioselective Reactions .....	35
<b>6</b>	<b>Strategy in Asymmetric Synthesis</b> .....	<b>39</b>
<b>7</b>	<b>Non-catalysed Asymmetric Reactions</b> .....	<b>41</b>
7.1	Asymmetric Reactions in which the Chiral Element of the Reacting Compound is in the same Molecule .....	41
7.1.1	Prelog's "Atrolactic" Asymmetric Synthesis .....	42
7.2	Asymmetric Reactions in which the Chiral Element is in the Reagent Molecule .....	45

7.2.1	Asymmetric Meerwein–Ponndorf–Verley Reduction .....	45
7.2.2	Asymmetric Reductions with Organoborane Reagents .....	47
7.2.3	Asymmetric Reduction with Grignard Reagents .....	50
7.2.4	Asymmetric Reduction with Chiral Derivatives of Lithium Aluminium Hydride .....	50
7.3	Asymmetric Reactions Based on Kinetic Resolution of Racemates .....	55
7.3.1	Horeau's Method of Determination of Absolute Configuration of Alcohols .....	56
7.3.2	Bestmann's Asymmetric Synthesis .....	59
7.3.3	Asymmetric Reactions on Sulfur .....	60
<b>8</b>	<b>References (Chapters 1–7) .....</b>	<b>62</b>
<b>9</b>	<b>Synthesis of Enantiomerically Pure Compounds (EPC synthesis) .....</b>	<b>67</b>
<b>10</b>	<b>Asymmetric Reactions Catalysed with Transition Metal Complexes .....</b>	<b>68</b>
10.1	Types of Chiral Phosphines and their Analogues as Ligands in Transition Metal Complexes .....	69
10.1.1	Ligands with a Chirality Centre on the Phosphorus Atom .....	70
10.1.2	Ligands with a Chirality Centre on the Carbon Atom .....	71
10.1.3	Ligands with a Chirality Centre on Carbon and Phosphorus Atoms .....	76
10.1.4	Ligand with an O–P Bond .....	77
10.1.5	Ligands with an N–P Bond .....	77
10.1.6	Water Soluble Chiral Ligands .....	79
10.1.7	Chiral Ligands bound to Supports .....	80
10.2	Syntheses of Optically Active Ligands .....	81
10.3	Asymmetric Hydrogenation .....	84
10.3.1	Mechanism and Origin of Enantioselectivity in Asymmetric Catalytic Hydrogenation .....	88
10.4	Asymmetric Hydrosilylation .....	90
10.4.1	Asymmetric Synthesis of Chiral Organosilicon Compounds via Hydrosilylation .....	92
10.4.2	Asymmetric Hydrosilylation of Olefins .....	92
10.5	Asymmetric Hydroformylation .....	92
10.6	Bond Migration with Transition Metal Complexes .....	95
<b>11</b>	<b>Heterogeneous Asymmetric Hydrogenation .....</b>	<b>96</b>
<b>12</b>	<b>Asymmetric Reactions which Use a Chiral Auxiliary Reagent .....</b>	<b>98</b>
12.1	Asymmetric Epoxidation and Related Reactions .....	98
12.1.1	Asymmetric Epoxidation with Peroxy Acids .....	98
12.1.2	Asymmetric Epoxidation Catalysed with Transition Metals .....	99
12.1.3	Kinetic Resolution of Secondary Allylic Alcohols .....	101
12.1.4	Oxidation of Sulfides .....	102
12.2	Asymmetric Hydroboration .....	103
12.3	Asymmetric Diels–Alder Reaction .....	108
12.3.1	Chiral Dienophiles .....	109
12.3.2	Chiral Dienes .....	109
12.3.3	Chiral Catalysts .....	110
12.3.4	Asymmetric Diels – Alder Reaction with Enoates of Chiral Alcohols .....	110
12.3.5	Double Asymmetric Induction .....	113
12.4	Chiral Auxiliaries Derived from Proline .....	117
12.5	Importance of Lithium Enolates in Enantioselective Reactions .....	123

12.5.1	Asymmetric Protonations .....	125
12.5.2	Asymmetric Enolate Alkylations .....	127
12.5.2.1	Asymmetric Carbon-Carbon Bond Formation from Chiral Oxazolines .....	131
12.5.2.2	Meyers' Oxazoline Reagents .....	133
12.6	Enantioselective Aldol Condensations .....	139
12.7	Asymmetric Synthesis using Nucleophilic Reagents containing a Chiral Sulfoxide Group .....	143
12.8	Addition of Organometallic Reagents to Aldehydes and Ketones .....	144
12.8.1	Reactions in Optically Active Solvents .....	144
12.8.2	Conjugate Addition Reactions .....	146
12.8.3	Asymmetric Coupling Reactions .....	147
12.9	Asymmetric Reactions with Base Catalysis .....	148
12.10	Asymmetric Synthesis of Amino Acids .....	148
<b>13</b>	<b>Enantioselective Reactions in the Solid State .....</b>	<b>156</b>
<b>14</b>	<b>Enantiomerically Pure Building Blocks .....</b>	<b>158</b>
<b>15</b>	<b>Enantioselective Reactions Catalysed with Enzymes .....</b>	<b>159</b>
<b>16</b>	<b>The Importance of Enantioselective Synthesis .....</b>	<b>171</b>
<b>17</b>	<b>Optical Activity as an Inseparable Part of the Manifestation of Living Matter ..</b>	<b>177</b>
<b>18</b>	<b>References (Chapters 8–17) .....</b>	<b>180</b>
<b>Index</b>	<b>.....</b>	<b>191</b>
