# CONTENTS

## PART I CONCEPTS AND METHODOLOGY

1. **Epidemiological Concepts Applied to Insect Epizootiology** 3  
*James R. Fuxa and Yoshinori Tanada*
2. **Ecological Methods** 23  
*James R. Fuxa*
3. **Modeling** 43  
*Grayson C. Brown*

## PART II KEY FACTORS

4. **The Host Population** 71  
*Hitoshi Watanabe*
5. **The Pathogen Population** 113  
*Yoshinori Tanada and James R. Fuxa*
6. **Transmission** 159  
*Theodore G. Andreadis*
7. **Environment** 177  
*Georg Benz*
8. **Patterns over Place and Time** 215  
*Jaroslav Weiser*

## PART III DISEASE GROUPS

9. **Noninfectious Diseases** 245  
*Randy R. Gaugler*

<b>10. Viral Diseases</b>	<b>257</b>
<i>Hugh F. Evans and Philip F. Entwistle</i>	
<b>11. Diseases Caused by Bacteria and Other Prokaryotes</b>	<b>323</b>
<i>Aloysius Krieg</i>	
<b>12. Fungal Diseases</b>	<b>357</b>
<i>Raymond I. Carruthers and Richard S. Soper</i>	
<b>13. Protozoan Diseases</b>	<b>417</b>
<i>Joseph V. Maddox</i>	
<b>14. Diseases Caused by Nematodes</b>	<b>453</b>
<i>Harry K. Kaya</i>	
 <b>PART IV PRACTICAL ASPECTS</b>	
<b>15. Applied Epizootiology: Microbial Control of Insects</b>	<b>473</b>
<i>James D. Harper</i>	
<b>16. Epizootiology: Prevention of Insect Diseases</b>	<b>497</b>
<i>Tosihiko Hukuhara</i>
