

Contents

CHAPTER
1

An Introduction to Animal Behavior 2

Natural Selection and the Evolution of Behavior 5

The Cost–Benefit Approach to Behavioral Biology 7

The Levels of Analysis 8

Box 1.1 Natural selection and infanticide in primates 9

The Integrative Study of Animal Behavior 11

Approaches to Studying Behavior 13

The Adaptive Basis of Behavior: Mobbing in Gulls 13

Box 1.2 Phylogenies and the comparative method 14

Box 1.3 The benefit of high nest density for the arctic skua 18

The Science of Animal Behavior 21

CHAPTER
2

The Integrative Study of Behavior 24

The Development of Song Learning 26

Box 2.1 Characterizing sounds made by animals 27

Intraspecific Variation and Dialects 28

Social Experience and Song Development 33

Mechanisms of Song Learning 34

Box 2.2 Song learning in birds adopted by another species 35

The Genetics of Song Learning 36

Control of the Avian Song System 36

Box 2.3 Proximate mechanisms underlying song preferences in females 37

The Evolution of Song Learning 40

An Evolutionary History of Bird Song 40

Mechanisms of Song Learning and the Comparative Approach 42

Human versus Avian Vocal Learning 44

The Adaptive Value of Song Learning 44

Box 2.4 Why might song learning make males communicate more effectively with rivals or potential mates? 45

Adapting to the Local Environment 46

Recognition: Friends versus Foes 46

Sexual Selection: Male–Male Competition 50

Sexual Selection: Female Choice and Assortative Mating 51

The Integrative Study of Bird Song 56

CHAPTER
3**The Developmental and Genetic Bases of Behavior 58****Behavior Requires Genes and the Environment 60**

The Interactive Theory of Development 61

Box 3.1 Behavioral genetics: Identifying the genetic basis of differences in behavior 62

Environmental Differences Can Cause Behavioral Differences 68

Genetic Differences Can Also Cause Behavioral Differences 69

Box 3.2 Migratory restlessness 71

Learning and Cognition 74

Learning Requires Both Genes and Environment 75

Learning in Complex Environments 76

The Adaptive Value of Learning 78

The Evolutionary Development of Behavior 84

The Evo-Devo Approach to Understanding Behavior 84

Box 3.3 The genetics of foraging behavior in honey bees 85

Early Life Developmental Conditions 89

The Role of the Social Environment 90

Developmental Homeostasis versus Developmental Constraint 91

Developmental Switch Mechanisms 95

Supergenes and Behavioral Polymorphisms 100

CHAPTER
4**The Neural Basis of Behavior 104****Responding to Stimuli 106**

Complex Responses to Simple Stimuli 107

How Moths Avoid Bats 110

Box 4.1 Ultrasound detection in the moth ear 114

Ultrasonic Hearing in Other Insects 117

Neural Command and Control 118

Decision Making in the Brain 118

From Ultrasound to Ultraviolet Radiation 120

Selective Relaying of Sensory Inputs 124

Responding to Relayed Messages 126

The Proximate Basis of Stimulus Filtering 129

Box 4.2 Determining how female parasitoid wasps choose their singing male bush-cricket hosts 132

Box 4.3 Cortical magnification in mammals 135

The Evolution of Cognitive Skills 135

Box 4.4 Do energetic demands explain why humans have such large brains? 137

CHAPTER
5

The Physiological Basis of Behavior 144

**Endogenous Rhythms and Changing Behavioral Priorities 146**

Mechanisms of Changing Behavioral Priorities 146

The Neurobiology of Circadian Timing 149

The Genetics of Circadian Timing 151

The Physiology of Circadian Timing 152

Seasonal and Annual Cycles of Behavior 155

Cues That Entrain Cycles of Behavior 156

Predictable Environmental Cues 157

Box 5.1 Hormonal responses to light in birds 160

Unpredictable Environmental Cues 162

Social Conditions and Changing Priorities 165

Hormonal Mechanisms Underlying Behavioral Change 166

Organizational versus Activational Effects of Hormones on Behavior and Development 166

Box 5.2 Measuring hormones in animals 168

Box 5.3 Do steroid hormones modulate male parental behavior in California mice? 171

Hormones and Reproduction 172

Testosterone and Reproductive Behavior 174

The Costs of Hormonal Regulation 176

Glucocorticoids and Responding to Environmental Change 179

CHAPTER
6

Avoiding Predators and Finding Food 184

**Avoiding Predators 186**

Social Defenses 186

Box 6.1 Evolutionary game theory 187

Game Theory and Social Defenses 192

Box 6.2 Game theory and the selfish herd 192

Blending In 193

Standing Out 197

Optimality Theory and Antipredator Behavior 202

Polyandry and Indirect Genetic Benefits 367

Box 10.2 Extra-pair paternity and good genes in birds 371

Finding Food 204

Optimality Theory and Foraging Decisions 205

Box 6.3 Territoriality and feeding behavior in golden-winged sunbirds 206

Box 6.4 Optimal foraging by pike cichlid fish 208

Criticisms of Optimal Foraging Theory 211

Landscapes of Fear 213

Game Theory and Feeding Behavior 214

Polygynandry 396

Promiscuity 397

CHAPTER
7

Territoriality and Migration 218

Where to Live 220

- Habitat Selection 220
- Territoriality and Resource-Holding Potential 222

Box 7.1 How to track migratory songbirds 228

Why Give Up Quickly When Fighting for a Territory? 229

The Dear Enemy Effect 235

To Stay or Go 235

Dispersal 237

Box 7.2 Opposite patterns of sex-biased dispersal in mammals and birds 238

Migration 240

The Costs and Benefits of Migration 243

Box 7.3 Behaviors to reduce the costs of flying during migration 244

Variation in Migratory Behavior 250

Box 7.4 Migratory pathways of Swainson's thrush 253

CHAPTER
8

Principles of Communication 256

Communication and Animal Signals 258

Information Use and Animal Signals 259

The Evolution of Animal Signals 262

Preexisting Traits and the Development of a Strange Display 264

The Panda Principle and Preexisting Traits 265

Preexisting Biases and the Evolution of Animal Signals 269

Box 8.1 Spiders hunting prey at night 271

Preexisting Traits versus Preexisting Biases 273

Box 8.2 Why do female moths mate with males that produce ultrasonic mimetic signals similar to those produced by predatory bats? 275

The Function of Animal Signals 278

The Adaptive Function of a Strange Display 278

Honest Communication and Threat Displays 281

Honest Signaling 284

Box 8.3 Mechanisms and measurement of animal coloration 287

When Multiple Honest Signals Are Better Than One 288

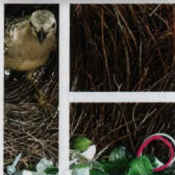

Deceitful Signaling 290

Eavesdropping on Others 295

CHAPTER

9

Reproductive Behavior 302

**Sexual Selection and the Evolution of Sex Differences 305**

Sex Differences in Reproductive Behavior 307

Box 9.1 Are sperm always cheap? 308

Sex Differences and Parental Investment 309

A Reversal in Sex Differences 310

Intrasexual Selection and Competition for Mates 313

Competition and Access to Mates 314

Coexistence of Conditional Mating Tactics 316

Coexistence of Alternative Mating Strategies 320

Sperm Competition 322

Mate Guarding and Paternity Assurance 325

Intersexual Selection and Mate Choice 328

Female Mate Choice for Direct Benefits 329

Female Mate Choice for Indirect Benefits 334

Box 9.2 Sexual selection in the peacock 337

Runaway versus Chase-away Sexual Selection 341

Cryptic Female Choice 343

Sexual Conflict 344

The Manipulation of Female Choice 344

Sexual Arms Races 347

CHAPTER

10

Mating Systems 352

**Monogamy: A Lack of Multiple Mating 355**

Why Be Monogamous? 355

Monogamy in Species with Paternal Care 358

Monogamy When Paternal Care Is Rare 360

Polyandry: Multiple Mating by Females 362

Monogamous Males and Polyandrous Females 362

Box 10.1 Sexual parasitism, dwarf males, and the evolution of gigolos 364

Polyandry and Indirect Genetic Benefits 367

Box 10.2 Extra-pair paternity and good genes in birds 371

Polyandry and Direct Benefits 377

Polygyny: Multiple Mating by Males 380

Female Defense Polygyny 381

Resource Defense Polygyny 383

Lek Polygyny 386

Scramble Competition Polygyny 392

Box 10.3 Lekking females in a sex-role reversed pipefish 394

Polygynandry and Promiscuity: Multiple Mating by Both Sexes 396

Polygynandry 396

Promiscuity 397

CHAPTER
11

Parental Care 400

Offspring Value and Parental Investment 402

- Parental Care Decisions 402
- Parental Favoritism in Offspring Care and Production 407
- Parental Favoritism in Humans 409
- Family Conflict 411

To Care or Not to Care 414

- The Costs and Benefits of Parental Care 414
- Sexual Conflict and Parental Care: Who Cares? 415

Box 11.1 Why do females provide all of the care in treehoppers? 418

- Why Do Females Care? 419
- Why Do Males Care? 421

Box 11.2 Reactions of nest-defending bluegill males to potential egg and fry predators under two conditions 422

Discriminating Parental Care 427

- Recognizing One's Own Offspring 427

Box 11.3 Why do parents in some species adopt genetic strangers of their own species? 430

- Interspecific Brood Parasitism 430
- Choosing the Correct Host 434
- Coevolutionary Arms Races 435
- The Evolution of Interspecific Brood Parasitism 439

CHAPTER
12

Principles of Social Evolution 444

Box 12.1 The major evolutionary transitions 47

Altruism and the Levels of Selection 448

- Individual versus Group Selection 449
- Altruism and the Role of Kin Selection 450

Box 12.2 Calculating genetic relatedness 452

Kin Selection and Inclusive Fitness Theory 453

- Challenges to Kin Selection and Inclusive Fitness Theory 455

Box 12.3 Altruism in amoebae 455

- Haplodiploidy and the Evolution of Eusociality 458
- Testing the Haplodiploidy Hypothesis 460

- Inclusive Fitness and Monogamy in Eusocial Insects 461

Box 12.4 Division of labor in clonal trematode flatworms 463

- Sterility and Caste Differentiation 467

Social Conflict in Animal Societies 470

- Reproductive Conflict 470

CHAPTER

13

Social Behavior and Sociality 476

**The Evolution of Social Behavior 478**

Forms of Social Behavior 479

Mutual Benefit 479

Box 13.1 How do groups of animals decide where to go? 480**Box 13.2** Social network analysis 485

Altruism and Reciprocity 487

Non-cooperative Social Behaviors:
Selfishness and Spite 491**Individual Differences in Social Behavior 491**

Personalities in Social Species 492

The Evolution of Cooperative Breeding 493

Reproductive Cooperation and Kin Selection 494

Reproductive Benefits and Cooperative Breeding 495

Box 13.3 Mobbing and kinship in groups of Siberian jays 496

Reproductive Costs and Cooperative Breeding 500

Reproductive Conflict in Cooperative Breeders 504

Reproductive Suppression 504

Reproductive Skew, Extra-pair Paternity, and Social Structure 507

Box 13.4 Why do males and females both have elaborate traits in social species? 508

CHAPTER

14

Human Behavior 512

**Communication 514**

The Development and Evolutionary History of Human Speech 515

Box 14.1 Ethical studies of humans and other animals 517

The Neurophysiology of Speech 519

The Adaptive Value of Speech 521

Reproductive Behavior 523

An Evolutionary Analysis of Human Mate Choice 524

Mate Choice by Women 524

Box 14.2 Female choice and the features of dominant versus attractive men 526**Box 14.3** Human mate choice in an online world 528

Mate Choice by Men 532

Reproductive and Sexual Conflict in Humans 535

Extreme Sexual Conflict in Humans:
Polygamy and Extramarital Affairs 538

Coercive Sex 540

Practical Applications of Behavioral Theory 543

Evolutionary Medicine 544

The Triumph of an Evolutionary Analysis of Human Behavior 546
