

Table of contents

Chapter 1	Futures research and science: introduction	9
	<i>Patrick van der Duin</i>	9
1	Introduction	9
2	The terminology of futures research	12
3	Futures research as a science?	13
4	Overview of the book	15
	References	19
Chapter 2	Inside the foresight mind	21
	<i>Peter Hayward</i>	21
1	Introduction	21
2	Conscious animals	22
3	The psychological understanding of futures thought	24
3.1	Cognitivism and future time perspective	26
3.2	The clinical interest in futures thinking	27
3.3	Developmental psychology and futures thinking	30
3.4	The self and futures thought	31
3.5	Metacognition and its role in creating agentic futures thought	33
3.6	The 'fallacy' of thinking about thought	34
4	Conclusion	35
	References	37

This book is financially supported by the Dutch Scientific Council for Governmental Research

Chapter 3	Futures studies from a human and social perspective	39
	<i>Eleonora Barbieri Masini</i>	
1	Introduction	39
2	Social sciences, sociology and futures studies: the need for interdisciplinarity and possibly transdisciplinarity	41
3	Why a human and social perspective for futures studies	43
4	Futures studies and philosophical and ethical perspectives	45
5	The importance of images and visions in futures studies	47
6	Limits to futures studies	50
7	Conclusion	52
	References	53
Chapter 4	Dealing with the future in economics	57
	<i>Cornelius Hazeu</i>	
1	Introduction	57
2	Modelling the future means using 'if-then' reasoning as the core of economists' methodology	58
3	From plans and predictions to explorations	61
4	The long term in economic models and the 'Lucas Critique'	64
5	The role of institutions	66
6	Conclusions	67
	References	68
Chapter 5	On the philosophical foundations of futures research	69
	<i>Joseph Voros</i>	
1	Introduction	69
2	Why bother with philosophy?	71
3	Futures research as an 'action science' using 'images of the future'	72
4	A classification schema for inquiry paradigms	75
5	Comparison of inquiry paradigms	77
6	Futures research methods through the paradigms	80
7	Conclusion	83
	Appendix	83
	References	86

Chapter 6	Macrohistory, macrohistorians and futures studies	91
	<i>Sohail Inayatullah</i>	
1	Introduction	91
2	History of social systems	91
3	Historical and epistemic context	93
4	Cyclical and linear	96
5	Metaphors of time	99
6	The future from macrohistory	101
7	Conclusion	109
	References	113
Chapter 7	Geography, planning and the future	115
	<i>Ela Krawczyk</i>	
1	Introduction	115
2	Geography: space and time	116
3	Planning and the future	117
3.1	Urban planning until 1945	119
3.2	Post-war period (1945 - mid 1960s)	121
3.3	The mid 1960s and 1970s	123
3.4	The 1980s	126
3.5	The 1990s to present	127
4	Final thoughts	128
	References	130
Chapter 8	The end is nigh ... but are we there yet?	
	Futures and the environment	133
	<i>Graham H May</i>	
1	Introduction	133
2	Implicit futures	134
3	The explicit future	135
4	The collapse of industrial society unless...	135
5	Sustainability	138
6	Timescale	140
7	Methods	141
8	The sceptics	144
9	Some concluding thoughts	145
	References	146

Chapter 9	Managing the future	149
	<i>Patrick van der Duin and Erik den Hartigh</i>	
	1 Introduction	149
	2 Strategy	150
	2.1 Outside-in, static	151
	2.2 Inside-out, static	152
	2.3 Outside-in, dynamic	153
	2.4 Inside-out, dynamic	154
	3 Innovation	156
	4 Concluding remarks	161
	References	164
Chapter 10	Astronomy: observing the past and predicting the future	167
	<i>Dap Hartmann</i>	
	1 Introduction	167
	2 Astronomy and Physics	169
	3 Peril from within the solar system	172
	4 The fate of our Sun	173
	5 Watching history unfold	174
	6 Conclusion	181
	References	182
Chapter 11	Future-oriented Technology Analyses: The literature and its disciplines	183
	<i>Alan L. Porter</i>	
	1 Introduction	183
	2 Methods	185
	3 Basic results: FTA Publications	187
	4 Disciplinary contributions to the FTA Literature	193
	5 Domains	196
	6 Discussion	200
	Acknowledgements	201
Chapter 12	Futures research and science: summary and some afterthoughts	203
	<i>Patrick van der Duin</i>	203
	References	203
